accessible, and practical guide to compliance with anti-money laundering law for financial professionals, corporate investigators, business managers, and all personnel of financial institutions who are required, under penalty of hefty fines, to get anti-money laundering training. Money laundering is endemic. As much as 5 percent of global GDP (\$3.6 trillion) is laundered by criminals each year. It ' s no wonder that every financial institution in the United States—including banks, credit card companies, insurers, securities brokerages, private funds, and money service businesses—must comply with complex examination, training, and reporting requirements

mandated by a welter of federal anti-money laundering (AML) laws. Ignorance of crime is no excuse before the law. Financial institutions and businesses that unknowingly serve as conduits for money laundering are no less liable to prosecution and fines than those that condone or abet it. In *Anti-Money Laundering in a Nutshell: Awareness and Compliance for Financial Personnel and Business Managers*, Kevin Sullivan draws on a distinguished career as an AML agent and consultant to teach personnel in financial institutions what money laundering is, who does it, how they do it, how to prevent it, how to detect it, and how to report it in compliance with federal law. He

traces the dynamic interplay among employees, regulatory examiners, compliance officers, fraud and forensic accountants and technologists, criminal investigators, and prosecutors in following up on reports, catching launderers, and protecting the integrity and reputations of financial institutions and businesses. In particular, corporate investigators will gain rich insights winnowed from the author's experiences as a New York State and federal investigator.

Governments around the world have made the fight against money laundering and the financing of terrorism a priority. Among its effort is the implementation of the Financial Action Task Force Recommendations, specifically Recommendation 1. The FATF Recommendations (Recommendation 1) requires that countries mandate financial institutions and designated non-financial businesses and professions (DNFBPs), to adopt a risk-based approach to combating money laundering and terrorist

financing. This book aims to provide a clear understanding of what the risk-based approach involves. In addition to this, it differentiates the risk-based approach from the rule-based approach and determines if the risk-based approach interferes with the human rights of high-risk customers. Internationally, this book would be the first comprehensive book on the subject of the Risk-Based Approach. This book would help financial institutions and designated non-financial institutions with any problem regarding the application of the risk-based approach. Financial institutions/DNFBPs who implement the risk-based approach, in line with the guidance given in this book, will be well-placed to avoid the consequences of inappropriate de-risking behaviour. Although there are quite a
