In the business world, recent years have seen a growing acknowledgement of the value of intangible assets rather than physical assets. This has precipitated a crisis in the accounting industry: the accounting representations relied upon for years can no longer be taken for granted. Here, Norman Macintosh argues that we now need to understand accounting in a different manner. Offering several different ways of looking at accounting and accountants, he draws upon the work of eminent thinkers such as Barthes, Baudrillard, Derrida, Foucault, Lyotard and Bakhtin. In doing this, he develops revolutionary insights into the nature of accounting, pioneering the introduction of contemporary poststructuralist ideas into accounting theory and practice. With a wide range of examples and case studies, this revolutionary new work will be essential reading for academic and professional accountants alike along with all those with an interest in the future of accounting.

Around 19 boards across 14 states follow NCERT textbooks as chief teaching-learning resource. Thereby, these books become immensely significant study resource for school students in our country. Our NCERT Solutions Series aims to enhance the thinking and learning abilities of students by Explanatory Solutions. The questions have been grouped in sets of Test your understanding, Do it yourself and Chapter End exercises. Accountancy for class 12th covers the entire syllabus into 10 Chapters.
