This exploration of the technical and engineering aspects of automated production systems provides a comprehensive and balanced coverage of the subject. It covers cutting-edge technologies of production automation and material handling, and how these technologies are used to construct modern manufacturing systems.

Explains how faculty members can improve their teaching methods or how accounting units can improve their curricula/programs.

For all courses in construction accounting and construction finance, and for courses in engineering economics taught in construction management programs. This book helps construction professionals and construction management students master the principles of financial management, and adapt and apply them to the challenge of profitably managing construction companies. It integrates content that has traditionally been taught through separate accounting, finance, and engineering economics texts. Students learn how to account for a construction company's financial resources; how to manage its costs, profits, and cash flows; how to evaluate different sources of funding a company's cash needs; and how to quantitatively analyze financial decisions. Readers gain hands-on experience through 220 example problems and over 390 practice problems, many of them based on situations actually encountered by the author. This edition adds more than 100 new discussion questions, and presents financial equations and accounting transactions more visually to support more intuitive learning.

Intended for any principles, financial, managerial, or computerized accounting course of accounting course where additional coverage of Excel is desired. The book also serves as a stand-alone core text for a computerized accounting course.

With this fourth edition, accountants will acquire a practical set of tools and the confidence they need to use them effectively in making business decisions. It better reflects a more conceptual and decision-making approach to the material. The authors follow a "macro- to micro-" strategy by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle. The objective is to establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. This motivates accountants by grounding the discussion in the real world, showing them the relevance of the topics covered to their careers.
