This book examines the legal and the accounting process from basic transaction analysis through to the preparation of financial statements. A broad framework for financial statements is used, encompassing international standards and Islamic financial accounting standards. It provides a context for understanding what is "Islamic accounting" and allows students to appreciate how Islamic values can influence the disclosure of financial information. The practicalities of preparing financial statements in accordance with the Islamic Shariah are covered, along with specific aspects of Islamic finance and how to account for Shariah compliant instruments. It provides students with skills to understand and prepare accounting information relevant to

decision making in an Islamic environment through real life examples and cases. Tentative Table of contents: • Introduction to Islamic Accounting • The Recording Process • Adjusting the Accounts • Completing the Accounting Cycle • Accounting for Assets • Accounting for Liabilities • Accounting for Equity • Accounting for Sukuk • Zakat Accounting • Takaful Accounting • Islamic Commercial Law • Accounting for Islamic Financial Institutions • Islamic Corporate Governance and Sustainability • Auditing: an Islamic Perspective

Accounting Principles and Practice describes the principles and conventions which provide the structure of Accounting practice. Many of the questions are taken from the past examinations of the Royal Society of Arts, the Association of Certified and Corporate Accountants, the Society of Incorporated Accountants, and the Institute of Chartered Accountants. This book is divided into 19 chapters and begins with a brief introduction to the double entry system of accounting. Considerable chapters are devoted to the Accounting techniques concerning the management of different types of accounts, receipts, payments, and expenditures. Other chapters examine the validity of the principles involved and of the limitations of the conventions. This text is based upon the conviction that the oft-quoted distinction between theory and practice is disastrously misleading. It demonstrates that good theory and good practice are inseparable. This book will prove useful to accountants and accounting students.
