to generate the financial statements of the business entity. / GENERAL JOURNAL vs GENERAL LEDGER (Comparison Table)1. Meaning Journal is the first entry of financial transaction that is rightly summarized and recorded as per the double entry system. Ledger is recorded from the journal in a "T" format and is the source of trial balance, income statement, and balance sheet.2. Which is more important? Journal is more important than ledger because if it is done wrong, ledger can't be done right. Ledger is dependent upon the correctness of a journal because if the journal is recorded right, the ledger will follow along.3. Format The format of a journal is simple and we include date, particulars, ledger folio, debit amount and credit amount. The format of the ledger is "T" format where we use date, particulars, and amount in each side.4. Label Journal is called "book of original entry". Ledger is called "book of second entry".5. An act of recording The act of journaling is called journalizing. The act of ledgering is called posting.6. How is the entry recorded? In a journal, the entry is recorded as per the date of the transaction. In ledger, the entry is recorded account-wise.7. Narration In a journal, the narration is must to understand the nature of entry. In ledger, the narration is optional.8. Necessity of balancing. Balancing is not required in journal. Balancing is mandatory in ledger.

**Excerpt from Principles of Double-Entry**

**Bookkeeping** The purpose of this treatise, as its

title implies, is to explain the principles which underlie the art of accounting by the double-entry method. It deals with the interpretation rather than the routine of bookkeeping, and limits the

discussion to the three essential forms - the journal entry, the ledger account and the balance sheet. It does not propose any change in the routine, but it does propose a decided change in the

interpretation of accounts and in the method of reporting results. What I claim for the book is that it solves the problem of placing double-entry

bookkeeping upon a rational basis; and to the best of my knowledge and belief it presents the first and only solution of that problem. It is one of the

strangest things in the history of the arts and sciences that this great system of accounting, which, by reason of its compactness and

convenience, has come into almost universal use, should have attained so high a degree of

development on the practical side, while on the theoretical side it is and always has been in a state of utter confusion. As a rule, the study of a useful

art has a certain value as mental discipline; the art

of accounting is the one exception to the rule. Aside from the so-called occult sciences, there is nothing which so tends to bewilder the mind and to dull the faculty of reason as the study of double-entry bookkeeping in the form in which it is customary to present it.
