Ethical Obligations and Decision-Making in Accounting gives students a robust ethical framework that is crucial for accountants in the post-Enron era. Incorporating the principles of the AICPA code and other systems of ethics, Mintz and Morris show accounting students how a commitment to ethics can enable accounting professionals to meet their ethical obligations both to investors and creditors. No other book so comprehensively examines the elements of the financial reporting system - including the ethics of the internal control environment and the effectiveness of board of director and audit committee oversight - that determine the ethical standard of the accounting process.

Contract Governance

Providing a clear and concise overview of the conduct of applied research studies in accounting, Malcolm Smith presents the principal building blocks of how to implement research in accounting and related fields.

Essentials of Marketing Research: Putting Research into Practice, an exciting new practical guide by Kenneth E. Clow and Karen E. James offers a hands-on, applied approach to developing the fundamental data analysis skills necessary for making better management decisions using marketing research results. Each chapter opens by describing an actual research study related to the chapter content, with rich examples of contemporary research practices skillfully drawn from interviews with marketing research professionals and published practitioner studies. Clow and James explore the latest research techniques, including social media and other online methodologies, and they examine current statistical methods of analyzing data. With emphasis on how to interpret marketing research results and how to use those findings to make effective management decisions, the authors offer a unique learning-by-doing approach to understanding data analysis, interpreting data, and applying results to decision-making.

Providing students with the skills to prepare and analyze company-only and consolidated financial statements, this book also looks at the theory behind asset valuation and income determination, and encourages students to develop an awareness of the limitations of conventional financial statements. teaching and learning aids, such as discussion questions, reference to source material, further reading suggestions and worked examples. It is designed for undergraduate 2nd year financial accounting courses, 2nd/3rd year undergraduate business courses, and 1st year MBA/DMS courses.

Electronic Inspection Copy available for instructors here `Management for Social Enterprise is a great introduction to the rich variety of social enterprises in the UK. It is also a useful tool to help us to build more effective social enterprises that really deliver on their missions by people who have hands on experience. This is just what the rapidly growing social enterprise sector needs, a management manual to help us take social enterprises to the next level by people who have hands on experience' - Sophi Tranchell, Managing Director of Divine Chocolate Ltd and Cabinet Office sponsored Social Enterprise Ambassador `The recent explosive growth in the number of social enterprises, their diverse and dynamic nature, and the upsurge in research about them all makes this a potentially bewildering field of knowledge to explore. This book provides a clear and timely guide to the management challenges involved in understanding and running social enterprises, and underlines why their unique nature requires something more than just standard business school wisdom' - Ken Peattie, Professor of Marketing and Strategy, Cardiff Business School, and Director of the ESRC Centre for Business Relationships, Accountability, Sustainability and Society `Provides a good introduction to the management of social enterprises touching on a broad range of topics and will help those involved in managing social enterprises and those trying to understand more about the sector. It draws on the experience of those who have worked in the social enterprise sector in a range of countries and are passionate about developing it' - Fergus Lyon, Professor of Enterprise and Organizations, Middlesex University Overviews the key business topics required by social entrepreneurs, and managers in social enterprises

Management for Social Enterprise covers strategy, finance, ethics, social accounting, marketing and people management. Written in direct, accessible language by a team of authors currently teaching and researching in this sector, each chapter is fully supported with learning resources. Chapters include brief overviews, further reading, suggested web resources and, importantly, international case studies, drawing on real-life business examples. This book is essential reading for students and practitioners of Social Entrepreneurship and Social Enterprise, but will also be of use to anyone with an interest in management, corporate responsibility, ethics or community studies. A Critical Guide

African Books in Print

Index Catalog of the Scranton Public Library Authors and Subjects, June 30, 1902

Study & Master Accounting was developed with the help of practising teachers, and covers all the requirements of the National Curriculum Statement for accounting.

This book introduces and develops Contract Governance as a new approach to contract theory. While the concept of governance has already been developed in Williamson's seminal article, it has, ironically, not received much attention in general contract law theory. Indeed, Contract Governance appears to be an important and necessary complement to corporate governance and in fact, as the second, equally important pillar of governance research in the core of private law. With this in mind, Grundmann, Möslin, and Riesenhuber provide a novel approach in setting an international and interdisciplinary research agenda for developing contract law scholarship. Contract Governance focuses particularly on the ways in which a governance perspective leads to research questions that have been neglected in traditional contract law scholarship, and how, from a governance perspective, the questions are dealt with in a different manner and style. Combining substantive chapters and commentaries, this collection of essays addresses an array of topics, including: third party impact and contract governance problems in herd behaviour; governance of networks of contracts; governance in long-term contractual relationships; contract governance and rule setting; and contract governance and political dimensions.

Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

Putting Research Into Practice

The present collection of articles grew out of a workshop on Vietnamese linguistics in 2009 at the University of Stuttgart, Germany. To our knowledge, no workshop with a comparable scope has been held outside of Vietnam for the past 20 years, or even longer. Given the important typological status of Vietnamese as a paradigm case of an isolating language, the volume covers the most relevant fields in linguistics: syntax, semantics, phonology, and the lexicon. A guiding principle in assembling the chapters for this volume has been to take an inclusive stance as far as the commitment to different frameworks and research methodologies is concerned. All the contributors are proponents of recent developments in their individual areas of specialization. The editors have taken special care to cater for a readership which should be as broad as possible. This means that each contribution is self-contained and does not presuppose any knowledge of Vietnamese. The volume is recommended to general linguists, comparative linguists, typologists and to researchers specializing in languages of East and South East Asia.

The search for a means to an end to apartheid erupts into conflict between a black township youth and his "old-fashioned" black teacher.
