Enhancements in technology have changed how we live and learn. Working with learning resources across devices, whether smartphones, tablets, or laptop computers, empowers students to drive their own learning by putting increasingly intelligent technology into their hands. Whether the goal is to become an accountant, a businessperson, or simply an informed consumer of accounting information, Financial and Managerial Accounting has helped generations of students succeed. Its leading-edge accounting content, paired with state-of-the-art technology, supports student learning and elevates understanding of key accounting principles. Financial and Managerial Accounting also delivers innovative technology to help student performance. Connect Accounting provides students with a media-rich eBook version of the textbook and offers instant grading and feedback for assignments that are completed online. Our system for completing exercise and problem material takes accounting content to the next level, delivering assessment material in a more intuitive, less restrictive format that adapts to the needs of today's students.

This volume of Advances in Management Accounting explores a variety of current issues through rigorous academic research. Topics include the link between CEO compensation and the 2008 financial crisis, the association between performance-based pay and employee honesty, and more.

Recent research has revealed that most articles published in top US accounting journals come from institutions based in the US or a small number of other English-speaking countries (Jones and Roberts, 2005). It has also been shown that the research paradigm favoured by US journals is financial economics, with the result that articles on accounting history or social and behavioural accounting are very scarce. European journals exhibit a more diverse content. Nevertheless, as shown by some studies, British authors are the main contributors to these journals. As a consequence, the assertion has been made that the published literature is not perfectly representative of the diversity of European accounting research. The aim of this study is to test the validity of this assertion by comparing the content of eighteen major academic journals in accounting over five years (2000-2004) with the set of papers presented at the EAA congress in 2003, 2004 and 2005. The results give some support to the assertion that the diversity of European accounting research is imperfectly reflected in academic journals. They also are consistent with the idea that non English-speaking scholars are at a competitive disadvantage in the race for publication in recognized periodicals.

This is a refereed, academic research annual, devoted to publishing articles about advancements in the development of accounting and its related disciplines from an international perspective. This serial examines how these developments affect the financial reporting and disclosure practices, taxation, management accounting practices, and auditing of multinational corporations, as well as their effect on the education of professional accountants worldwide.

Based on a ten-year examination of control systems in over 50 U.S. businesses, this book broadens the definition of control and establishes a critical bridge between the disciplines of strategy and accounting and control. In addition to the more traditional diagnostic control systems, Simons identifies three new control systems that allow strategic change: belief systems that communicate core values and provide inspiration and direction, boundary systems that frame the strategic domain and define the limits of freedom, and interactive systems that provide flexibility in adapting to competitive environments and encourage organizational learning. These four control systems, according to Simons, will provide managers with the basic levers for pursuing strategic objectives.

In response to concerns over the viability of the academic discipline of accounting we investigate trends in accounting research by examining papers published in six top accounting journals from 1960 to 2007. We use citations made by accounting papers as a proxy for their antecedent ideas and examine trends in citations, topics, and methodologies, in aggregate and by journal. Our results suggest that the growing body of accounting research draws increasingly from both finance and economics. Financial accounting topics and archival methodologies are becoming more dominant over time relative to other topics and methodologies, although these trends vary by journal. Although most concerns we discuss are recent, we find that the situation today is the result of trends set in motion decades ago with an explicit decision by influential researchers to move the discipline from a normative perspective to a positive perspective. Given its current state accounting research may be broadly characterized as research into the effect of economic events on the process of summarizing, analyzing, verifying, and reporting standardized financial information, and on the effects of reported information on economic events.

Loose Leaf for Fundamental Accounting Principles

Accounting research

WAIT Accounting Research Papers

College Accounting by Wild, Richardson, and Shaw draws upon the success of Wild's Fundamental Accounting Principles text. Its innovation is reflected in its extensive use of small business examples, the integration of new computerized learning tools, superior end-of-chapter material, and a highly engaging, pedagogical design. Inclusion of technology products such as Connect, Connect, Excel Templates, and QuickBooks Pro 2010 software provides students with every possible advantage as they strive to understand the key concepts of accounting and their role in business.

Wild, Managerial Accounting responds to the market's need for an integrated solution with balanced managerial content that has a corporate approach throughout. Its innovation is reflected in its extensive use of small business examples, the integration of new technology learning tools, superior end-of-chapter material, and a highly engaging, pedagogical design. McGraw-Hill Education's complete digital solution, Connect, provides students every advantage as they strive to understand the key concepts of managerial accounting and its role in business. Wild, Managerial Accounting can be used in partnership with Wild, Financial Accounting Fundamentals (FAF) for the introductory financial accounting course preceding the managerial course in a two-course sequence. Wild, FAF provides an integrated solution that uses the same pedagogy and framework as Wild, Managerial Accounting. Connect Accounting provides a complete digital solution with a robust online learning and homework management system, an integrated media-rich eBook, assignable end-of-chapter material, algorithmic functionality, and reporting capabilities. Contained within Connect Accounting is an adaptive learning system, LearnSmart, which is designed to help students learn faster, study more efficiently, and retain more knowledge for greater success. In addition, Interactive Presentations deliver learning objectives in an interactive environment, giving students access to course-critical content anytime, anywhere. Guided Examples provide students with narrated and animated, step-by-step walkthroughs of algorithmic versions of assigned exercises.

Papers Presented at the 1982 Accounting Research Convocation on the Subject of Accounting Research: Challenges of the Eighties

This e-book aims to investigate users, use and usefulness of voluntary disclosure narrative. There has been a substantial increase in voluntary disclosure narrative provided by companies over the last decade. This increase has been seen within company annual reports, stand alone social and environmental reports and specific web site disclosure.
