As with any industry, the education sector goes through frequent changes due to modern technological advancements. It is every educator's duty to keep up with these shifting requirements and alter their teaching style to best fit the needs of their classroom. Pre-Service and In-Service Teacher Education: Concepts, Methodologies, Tools, and Applications explores the current state of pre-service teacher programs as well as continuing education initiatives for in-service educators. It also emphasizes the growing role of technology in teacher skill development and training as well as key pedagogical developments and methods. Highlighting a range of topics such as teacher preparation programs, teaching standards, and fieldwork and practicum experiences, this multi-volume book is designed for pre-service teachers, teacher educators, researchers, professionals, and academics in the education field.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

In Asia's Computer Challenge, Jason Dedrick and Kenneth L. Kraemer delve into these questions and emerge with an explanation of the rapid rise of the computer industry in the Asia-Pacific region. Offering a systematic comparison of the historical development of the computer industries of Japan, Hong Kong, Korea, Singapore, and Taiwan, the book provides a solid basis for examining the relative influence of both government policy and market forces on the development of computer enterprises within each country. This probing inquiry into the quickly evolving computer industry and the competition it creates between countries and companies will appeal to scholars of business and economics, technology studies, Japan and East Asia studies, and to a broader audience of professionals within the computer industry, particularly those working for global companies.

Discover a comprehensive introduction to IT technical support as Andrews/Dark/West's COMPTIA A+ GUIDE TO IT TECHNICAL SUPPORT, 10E explains how to work with users as well as install, maintain, troubleshoot and network computer hardware and software. This step-by-step, highly visual best-selling approach uses CompTIA A+ Exam objectives as a framework to prepare you for 220-1001 and 220-1002 certification exams. Each chapter covers core and advanced topics while emphasizing practical application of the most current technology, techniques and industry standards. You study the latest hardware, security, Active Directory, operational procedures, basics of scripting, virtualization, cloud computing, mobile devices and Windows 10 as you prepare for success as an IT support technician or administrator. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The biennial Digital Review of Asia Pacific is a comprehensive guide to the state-of-practice and trends in information and communication technologies for development (ICTD) in the Asia Pacific region. This fourth edition (2009-2010) features 30 economies and four sub-regional groupings. The chapters provide updated information on ICT infrastructure, industries, content and services, key programs, enabling policies and regulation, education and capacity building, open source, and research and development initiatives, as well as ICTD challenges in each of the economies covered. The common framework that underpins these reports allows readers to undertake a comparative analysis and assess progress across Asia Pacific. In addition, regional overviews provide a synthesis of ICTD trends, regulatory issues, and lessons for managing innovation in the network economy. The thematic chapters focus on issues in ICT in education, a key area in ICTD. The authors are drawn from government, academe, industry and civil society, providing a broad perspective on the use of ICTs for human development.

As "market referees", regulators contribute to the delivery of essential public utilities. Their organisational culture, behaviour and governance are important factors in how regulators, and the sectors they oversee, perform. The OECD Performance Assessment Framework for Economic Regulators (PAFER) looks at the institutions, processes and practices that can create an organisational culture of performance and results.

The biennial Digital Review of Asia Pacific is a comprehensive guide to the state-of-practice and trends in ICT for development (ICT4D) in Asia Pacific, carrying 31 updated country reports on the theme of ICT and education. Introduction to Information Systems, 9th Edition delivers an essential resource for undergraduate business majors seeking ways to harness information technology systems to succeed in their current or future jobs. The book assists readers in developing a foundational understanding of information systems and technology and apply it to common business problems. This International Adaptation covers applications of the latest technologies with the addition of new cases from Europe, Middle East, Africa, Australia, and Asia-Pacific countries. It focuses on global business environment for students to understand the norms of using technology while operating on online platforms for exploring new avenues in different geographical locations. The book includes real business scenarios of how latest technologies such as Big Data, Cloud Computing, Blockchain, and IoT are perceived and adopted across countries. New cases highlight key technology issues faced by organizations such as designing and implementing IT security policies, dealing with ethical dilemma of securing customer data, moving IT infrastructure to cloud, and identifying how AI can be used to improve the efficiency of business operations.

The Involvement of EU Law in Private Law Relationships

The involvement of the EU in regulating private conduct and relationships between individuals is increasing. As a result, EU law affects the scope of private autonomy in ever wider contexts, sparking tensions with fundamental concepts of national private law systems. This volume offers a descriptive and normative account of the involvement of EU law in private law relationships. The recurring theme in the collected papers is the scope of policy objectives which are apt to legitimise the European Union's as yet unsystematic tendency to serve as a source of restrictions of private autonomy. The nature and purpose of the involvement of European Union law in private law relationships is investigated by the authors from both the substantive and the constitutional perspective. The papers look at such sectors regulating private law relationships as consumer law, labour law, competition law, equal treatment law and the law of remedies. While focusing on private law relationships the authors investigate more general concepts of EU law, such as the Internal Market freedoms and general principles of law, and the different modes of ensuring the effective application of EU secondary law.
