China is the largest emerging market in the world, yet Western MNCs have invested significantly less there than their Asian MNC counterparts. Luo systematically compares Western and Asian investment strategies and their performance in the China market and finds lessons that Westerners must heed. He also reviews and analyzes new economic and regulatory environments (e.g., WTO) in China and their potential effect on all foreign investors. Clearly written and readable by anyone reasonably familiar with matters of world trade and investment, the book illustrates its points with case studies drawn from

Luo's own research and is difficult to find elsewhere. The result is a needed contribution to the literature on international investment in the China market, primarily for upper level executives and scholars specializing in emerging markets and international business. Safety, Reliability, Risk and Life-Cycle Performance of Structures and Infrastructures contains the plenary lectures and papers presented at the 11th International Conference on STRUCTURAL SAFETY AND RELIABILITY (ICOSSAR2013, New York, NY, USA, 16-20 June 2013), and covers major aspects of safety, reliability, risk and life-cycle performance of str

A Quick Guide to Human Resource Testing is a quick reference guide for human resource (HR) practitioners who use or plan to use assessment instruments in any context. It includes explanations, tips, case studies and suggestions to help practitioners get the most out of their HR testing. Those in charge of recruiting and selecting new staff face a decision-making process that needs to be responsible in its implementation and to produce a positive and wide-ranging outcome. The cost of a wrong selection decision has been estimated to be anywhere between one and a half times and five times the salary of the job in question. Studies have shown that appropriate assessment tools enhance the chances of making good selection and recruitment decisions. Testing is also important to the HR practitioner in a variety of other

contexts, including team building, change management and ongoing organisational needs. Good practice and appropriate use of tests are as vital to these areas as they are in the selection and recruitment of staff.

From its small headwaters in Hall County, Georgia, the North Oconee winds nearly seventy miles, tumbling over granite outcroppings at Hurricane Shoals and on to Athens, where it meets the Middle Oconee. From there, the Oconee courses 220 miles through east-central Georgia to meet the Ocmulgee convergence near Lumber City, forming the Altamaha River, which flows to the Atlantic Ocean. As the Oconee's importance as a recreational amenity has grown over the years, University of Georgia students and instructors, the Altamaha Riverkeeper, Georgia River Network, Upper Oconee Watershed Network, and the North Oconee River Greenway have worked together to create a plan for water trails and recreational

trails along the river as it flows through Athens. In the Oconee River User's Guide, both novice and experienced water sports enthusiasts will find all the information required to enjoy the river, including detailed maps, put in and take out suggestions, fishing and camping locations, mile-by-mile points of interest, and an illustrated guide to the animals and plants commonly seen in and around the river. Daytrippers will enjoy Joe Cook's fascinating description of the cultural and natural heritage of this richly diverse waterway. The Oconee River is home to seventy-four species of fish, including the Altamaha shiner, found only in the Altamaha River basin, as well as thirty-seven species of salamanders and frogs and forty-three species of reptiles, including the American alligator, found in the lower Oconee downstream of Milledgeville. FEATURES: an introduction and overview of the river chapters describing each river section with detailed maps and notes on river access and points of interest a compact natural history guide featuring species of interest found along Georgia's rivers notes on safety and boating etiquette a fishing primer notes on organizations working to protect the river S2SIMSAP and SlMTlM are computer programs that have been developed to simulate the stand growth and development of natural and treated even-aged northern hardwood stands. SIMSAP begins with species distributions by quality classes in sapling stands after regeneration. SIMTIM, the poletimber-sawtimber-harvest phase, uses stocking guides based on quadratic mean stand diameter, number of trees, and basal area per acre of trees in the main crown canopy. Using available data, the connecting phases of the models have been tebted to

determine the effects of silvicultural treatments (or no treatment) on long-term stand response. The models are coded in FORTRAN 77 and are available on mainframe and IBM compatible microcomputers with a minimum of 256 K.S3. This book explores what makes a book readable by bringing together the relevant literature and theories, and situating them within a unified account. It provides a single resource that offers a principled discussion of the issues and their applications.

From its headwaters on the southern slope of the Tennessee Valley divide near Dahlonega to its confluence with the Oostanaula to form the Coosa in Rome, the Etowah is a river full of interesting surprises. Paddle over Native American fish weirs and past the Etowah Indian Mounds, one of the most intact Mississippian Culture sites in the Southeast. See the quarter-mile tunnel created to divert the Etowah during Georgia's gold rush and the pilings from antebellum bridges burned in the Civil War. This guide offers all the

information needed for even novice paddlers to feel comfortable
jumping in a boat and heading downstream, including detailed,
accurate maps; put in/take out and optimal river flow information;
mile-by-mile points of interest; and an illustrated natural history
guide to help identify animals and plants commonly seen in and around
the river. A fishing primer offers tips to understand the habits of
some of the many native fish species found in the Etowah, from trout
in the river's upper reaches to bass and bream in the midsection and
catfish and drum below Lake Allatoona. Along the way, river explorers
will come to understand the threats facing this unique Georgia place,
and the guide offers suggestions for how to take action to help
protect the Etowah and keep its beauty and biodiversity safe for
future explorers. A Wormsloe Foundation nature book.
