

## Across The Great Barrier Frontier Magic 2 Patricia C Wrede

*Snow White and Rose Red live on the edge of the forest that conceals the elusive border of Faerie. They know enough about Faerie lands and mortal magic to be concerned when they find two human sorcerers setting spells near the border. And when the kindly, intelligent black bear wanders into their cottage some months later, they realize the connection between his plight and the sorcery they saw in the forest. This romantic version of the classic fairy tale features an updated introduction by its editor, Terri Windling.*

*Magic and intrigue go hand in hand in Mairelon the Magician and The Magician's Ward, two fast-paced novels filled with mystery and romance, set against the intricate backdrop of Regency England. When a stranger offers her a small fortune to break into a traveling magician's wagon, Kim doesn't hesitate. Having grown up a waif in the dirty streets of London, Kim isn't above a bit of breaking-and-entering. A hard life and lean times have schooled her in one lesson: steal from them before they steal from you. But when the magician catches her in the act, Kim thinks she's done for. Until he suggests she become his apprentice; then the real trouble begins. Kim soon finds herself entangled with murderers, thieves, and cloak-and-dagger politics, all while trying to learn how to become both a proper lady and a magician in her own right. *Winner of the Thomas Cook Travel Book Award For the Chinese, the Great Wall of China has defined much more than a physical barrier. Over the centuries it has represented a psychological frontier - within it lies the Celestial Kingdom, the compass of all civilization. Beyond lies a barbaric world of chaos and exile. In Frontiers of Heaven, author Stanley Stewart recounts his wanderings halfway across Asia. The journey takes him from Shanghai to the banks of the Indus, and along the way he encounters the modern Chinese for whom these regions beyond the Wall still hold the same morbid fascination. Today, the great western province of Xinjiang is still a land of exile, the destination of soldiers, reluctant settlers, political prisoners, and disgraced officials. Whether describing the lost cities of Central Asia, a Buddhist monastery in the shadow of Tibet, or a love affair in Xi'an, Stewart tells his story with charm and affection.*

*"With impeccable research and flawless prose, Chevalier perfectly conjures the grandeur of the pristine Wild West . . . and the everyday adventurers—male and female—who were bold enough or foolish enough to be drawn to the unknown. She crafts for us an excellent experience." —USA Today* From internationally bestselling author Tracy Chevalier, author of *A Single Thread*, comes a riveting drama of a pioneer family on the American frontier 1838: James and Sadie Goodenough have settled where their wagon got stuck – in the muddy, stagnant swamps of northwest Ohio. They and their five children work relentlessly to tame their patch of land, buying saplings from a local tree man known as John Appleseed so they can cultivate the fifty apple trees required to stake their claim on the property. But the orchard they plant sows the seeds of a long battle. James loves the apples, reminders of an easier life back in Connecticut; while Sadie prefers the applejack they make, an alcoholic refuge from brutal frontier life. 1853: Their youngest child Robert is wandering through Gold Rush California. Restless and haunted by the broken family he left behind, he has made his way alone across the country. In the redwood and giant sequoia groves he finds some solace, collecting seeds for a naturalist who sells plants from the new world to the gardeners of England. But you can run only so far, even in America, and when Robert's past makes an unexpected appearance he must decide whether to strike out again or stake his own claim to a home at last. Chevalier tells a fierce, beautifully crafted story in *At the Edge of the Orchard*, her most graceful and richly imagined work yet.

*"High-style fantasy and adventure" in the complete Lyra series by the author of the Enchanted Forest Chronicles (The New York Times). Shadow Magic: While Alkyra's noblemen squabble, an ancient enemy, the Lithmern, raises an army. And as the head of the Noble House of Brenn attempts to organize an alliance, the princess Alethia celebrates her twentieth birthday. She is quick-witted, beautiful, and handy with a throwing knife. But on the next night, she passes through a dark corridor on her way to the banquet hall, and never emerges from the shadows. The Lithmern have kidnapped the princess. To find her way*

home, Alethia will have to learn to trust in the old tales, whose legends of magic and daring hold the only hope of saving her kingdom. *Daughter of Witches*: There is no worse time to visit Drinn than during the Midwinter Festival, when the city gates are sealed so that no outsider can witness the temple's secret rituals. In an inn, where a young woman named Ranira works as an indentured servant for a brutal innkeeper, three guests have overstayed their welcome. Attempting to protect Ranira from her master's cruelty, the three reveal their magical powers and attract the attention of the temple guards. Now, to save her new friends from certain death, Ranira must unleash the power that cost her parents their lives. *The Harp of Imach Thyssel*: When Emereck and Flindaran leave a caravan in search of adventure, it isn't long before they stumble upon great danger. Emereck, a trained minstrel, and Flindaran, a nobleman masquerading as a tramp, have found a long-abandoned castle, and in it, one of Lyra's most sought-after treasures: the Harp of Imach Thyssel. To keep it from falling into the wrong hands, Emereck will have to learn to harness its strength to create and destroy, with the fate of the kingdom hanging in the balance. *Caught in Crystal*: For more than a decade, Kayl has run a modest country inn. She opened it with her husband, and they managed it together until a summer illness took him away, leaving her alone with their two children. The three of them get by, living happily together as the years pass, but everything changes the day a sorceress named Corrana asks for a room. Now, to save her family and her world, Kayl will have to unlock a side of herself that she buried long ago. *The Raven Ring*: When Eleret's mother is killed, she must travel to reclaim the belongings her mother left behind. The overland journey to the city of Ciaron is treacherous, but Eleret has no fear. She straps a dagger to her leg and sets off to recover one of her mother's prized possessions: a ring etched with a raven. Eleret doesn't know what's special about her mother's ring, but someone wanted it badly enough to kill for it. And to make it home in one piece, she'll need to unlock the mysteries of the ring her mother died to protect.

There may be no story today with a wider gap between fact and fiction than the relationship between the United States and Mexico. Wall or no wall, deeply intertwined social, economic, business, cultural, and personal relationships mean the US-Mexico border is more like a seam than a barrier, weaving together two economies and cultures. Mexico faces huge crime and corruption problems, but its remarkable transformation over the past two decades has made it a more educated, prosperous, and innovative nation than most Americans realize. Through portraits of business leaders, migrants, chefs, movie directors, police officers, and media and sports executives, Andrew Selee looks at this emerging Mexico, showing how it increasingly influences our daily lives in the United States in surprising ways--the jobs we do, the goods we consume, and even the new technology and entertainment we enjoy. From the Mexican entrepreneur in Missouri who saved the US nail industry, to the city leaders who were visionary enough to build a bridge over the border fence so the people of San Diego and Tijuana could share a single international airport, to the connections between innovators in Mexico's emerging tech hub in Guadalajara and those in Silicon Valley, Mexicans and Americans together have been creating productive connections that now blur the boundaries that once separated us from each other.

History in our day is still a story, and yet one from which we expect to tell the truth - not just the facts, the names and events of the past, but the invisible order and forces behind them. How can the language of history balance these seemingly contrary tasks - the narrative, the scientific, and the political? This is the question Jacques Ranciere explores in "The names of history", a meditation on the poetics of historical knowledge. In the works of writers from Jules Michelet to Fernand Braudel, Ranciere traces an ongoing revolution in historical study, a movement that challenged, in the practice of language, the opposition of science and literature. By way of a commentary on Erich Auerbach, he shows how fictional narrative intertwines with historical narrative to produce a "truth" that retains mythical elements. The poetics of knowledge Ranciere develops here is an attempt to identify the literary procedures by which historical discourse escapes literature and gives itself the status of a science. His book is also an appreciation of Braudel, whose work in the Annales school greatly advanced this project. Ranciere follows and extends Braudel's discursive production of new agencies of history, which accounts for both the material conditions in which history takes place and the language in which it is written.

The idea of the Arctic Ocean as a mediterranean sea is a shock to those of us--and that includes most of us--who cannot shake ourselves free of the Mercatorean vision. Yet this theme is repeated by many of the eminent contributors to this volume: as Michael Marsden states, "It is difficult to impress upon the public and industry at large that the most

essential quality of the Arctic is not cold, or gold, or polar bears, but a central position in the world community." This book, then, is about the North as a frontier, and about Canada's relations with the world beyond that frontier. It is about the Arctic community of which Canada is one of the major members, along with the Soviet Union, the United States, Denmark, Iceland, and Norway. It is also an exercise in perspective. Canadians have long been aware of the significance of their Atlantic and Pacific frontiers and of the implications of their Southern frontier. This volume points out that Canada is not a three-sided country. While it does not neglect the military importance of the Arctic, it endeavours to widen the scope of interest. But it does not present the familiar arguments about the surpassing importance of the Arctic. It deflates as well as inflates. Its purpose is to assess as precisely as possible the implications of the Arctic frontier, not to induce either visions or nightmares. It is intended not only for Canadians but for all those who are interested in the polar regions or in the shape of the world at large. The papers in this volume were assembled in collaboration by the Canadian Institute of International Affairs and the Arctic Institute of North America.

*The prequel to the New York Times bestseller The Texan Sprawling 1840s Texas comes alive in the hands of Joan Johnston, New York Times bestselling author of The Cowboy and The Texan. Introducing the unforgettable Creed dynasty, transporting us back to a wild, lawless frontier, Johnston brings us a stirring, passionate story of Texas Ranger Jarrett Creed and the free-spirited beauty who captures his heart—a woman sworn to love no man. FRONTIER WOMAN Captured by Comanches as a boy, Jarrett Creed grew to manhood torn between two worlds. But with the young republic under siege from ravaging Mexican armies and marauding Indian tribes alike, he made his choice. Now, as a secret government mission brings the Texas Ranger to lovely Cricket Stewart's door, he must choose again. The youngest daughter of a wealthy gentleman planter, Cricket lives life as she pleases and vows never to be a wife to any man. Until the day Jarrett Creed saves her from avenging Comanches . . . by claiming her as his bride. The last thing either expects is to fall in love. But as a traitorous conspiracy and a secret tragedy test their newfound union, a wild-spirited beauty and a Texas lawman will discover just how far they will go for their precious homeland—and for a love that could free them from the sorrows of the past.*

*In an alternate frontier America, Eff must travel beyond the Great Barrier and come to terms with her magic abilities--and those of her twin brother--to stop the newest threat encroaching on the settlers.*

*Kim, a streetwise girl disguised as a boy, and Mairelon, an itinerant magician dressed as a dandy, share adventures in a Regency England that is populated with sorcerers and riddled with magic.*

*The Sahara has long been portrayed as a barrier that divides the Mediterranean world from Africa proper and isolates the countries of the Maghrib from their southern and eastern neighbors. Rather than viewing the desert as an isolating barrier, this volume takes up historian Fernand Braudel's description of the Sahara as "the second face of the Mediterranean." The essays recast the history of the region with the Sahara at its center, uncovering a story of densely interdependent networks that span the desert's vast expanse. They explore the relationship between the desert's "islands" and "shores" and the connections and commonalities that unite the region. Contributors draw on extensive ethnographic and historical research to address topics such as trade and migration; local notions of place, territoriality, and movement; Saharan cities; and the links among ecological, regional, and world-historical approaches to understanding the Sahara.*

*A prodigiously researched biography of Vannevar Bush, one of America's most awe-inspiring polymaths and the secret force behind the biggest technological breakthroughs of the twentieth century. As the inventor and public entrepreneur who launched the Manhattan Project, helped to create the military-industrial complex, conceived a permanent system of government support for science and engineering, and anticipated both the personal computer and the Internet, Vannevar Bush is the twentieth century's Ben Franklin. In this engaging look at one of America's most awe-inspiring polymaths, writer G. Pascal Zachary brings to life an American original—a man of his time, ours, and beyond. Zachary details how Bush cofounded Raytheon and helped build one of the most powerful early computers in the world at MIT. During World War II, he served as Roosevelt's adviser and chief contact on all matters of military technology, including the atomic bomb. He launched the Manhattan Project and oversaw a collection of 6,000 civilian scientists who designed scores of new weapons. After the war, his attention turned to the future. He wrote essays that anticipated the rise of the Internet and boldly equated national security with research strength, outlining a system of permanent federal funding for university research that endures to this day. However, Bush's hopeful vision of science and technology was leavened by an understanding of the darker possibilities. While cheering after witnessing the Trinity atomic test, he warned against the perils of a nuclear arms race. He led a secret appeal to convince President Truman not to test the Hydrogen Bomb and campaigned against the Red Scare. Elegantly and expertly relayed by Zachary, Vannevar's story is a grand tour of the digital leviathan we know as the modern American life.*

*In this best-selling novel, Patrick Smith tells the story of three generations of the MacIveys, a Florida family who battle the hardships of the frontier to rise from a dirt-poor Cracker life to the wealth and standing of real estate tycoons. The story opens in 1858, when Tobias MacIvey arrives in the Florida wilderness to start a new life with his wife and infant son, and ends two generations later in 1968 with Solomon MacIvey, who realizes that the land has been exploited far beyond human need. The sweeping story that emerges is a rich, rugged Florida history featuring a memorable cast of crusty, indomitable Crackers battling wild animals, rustlers, Confederate deserters, mosquitoes, starvation, hurricanes, and freezes to carve a kingdom out of the swamp. But their most formidable adversary turns out to be greed, including finally their own. Love and tenderness are here too: the hopes and passions of each new generation, friendships with the persecuted blacks and Indians, and respect for the land and its wildlife. Patrick Smith's novel is now available for young readers. A teacher's manual is available for using *A Land Remembered* to teach language arts, social studies, and science coordinated with the Sunshine State Standards of the Florida Department of Education.*

The U.S. may have put the first man on the moon, but it was the Soviet space program that made Valentina Tereshkova the first woman in space. It took years to catch up, but soon NASA's first female astronauts were racing past milestones of their own. The trail-blazing women of Group 9, NASA's first mixed gender class, had the challenging task of convincing the powers that be that a woman's place is in space, but they discovered that NASA had plenty to learn about how to make space travel possible for everyone.

COSTA BOOK OF THE YEAR AWARD WINNER LONGLISTED FOR THE 2017 MAN BOOKER PRIZE "A true leftfield wonder: *Days Without End* is a violent, superbly lyrical western offering a sweeping vision of America in the making."—Kazuo Ishiguro, Booker Prize winning author of *The Remains of the Day* and *The Buried Giant* From the two-time Man Booker Prize finalist Sebastian Barry, "a master storyteller" (*Wall Street Journal*), comes a powerful new novel of duty and family set against the American Indian and Civil Wars Thomas McNulty, aged barely seventeen and having fled the Great Famine in Ireland, signs up for the U.S. Army in the 1850s. With his brother in arms, John Cole, Thomas goes on to fight in the Indian Wars—against the Sioux and the Yurok—and, ultimately, the Civil War. Orphans of terrible hardships themselves, the men find these days to be vivid and alive, despite the horrors they see and are complicit in. Moving from the plains of Wyoming to Tennessee, Sebastian Barry's latest work is a masterpiece of atmosphere and language. An intensely poignant story of two men and the makeshift family they create with a young Sioux girl, Winona, *Days Without End* is a fresh and haunting portrait of the most fateful years in American history and is a novel never to be forgotten.

This hugely influential work marked a turning point in US history and culture, arguing that the nation's expansion into the Great West was directly linked to its unique spirit: a rugged individualism forged at the juncture between civilization and wilderness, which – for better or worse – lies at the heart of American identity today. Throughout history, some books have changed the world. They have transformed the way we see ourselves – and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives – and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are.

Late Essays: 2006-2016 will be available January 2018. For decades the Magistrate has been a loyal servant of the Empire, running the affairs of a tiny frontier settlement and ignoring the impending war with the barbarians. When interrogation experts arrive, however, he witnesses the Empire's cruel and unjust treatment of prisoners of war. Jolted into sympathy for their victims, he commits a quixotic act of rebellion that brands him an enemy of the state. J. M. Coetzee's prize-winning novel is a startling allegory of the war between oppressor and oppressed. The Magistrate is not simply a man living through a crisis of conscience in an obscure place in remote times; his situation is that of all men living in unbearable complicity with regimes that ignore justice and decency. Mark Rylance (Wolf Hall, Bridge of Spies), Ciro Guerra and producer Michael Fitzgerald are teaming up to bring J.M. Coetzee's *Waiting for the Barbarians* to the big screen.

***In this remarkable oral history collection, thirty-three participants in the turbulent epic that began with the day of infamy at Pearl Harbor and ended with the signing of the surrender documents in Tokyo Harbor tell their stories. Their remembrances of heartbreak, frustration, heroism, hope, and triumph were collected over a period of twenty-five years by John T. Mason. Their recollections reveal perspectives and facts not included in traditional works of history. Each selection, introduced with a preface that places it in the context of the Pacific War, takes the reader behind the scenes to present the personal, untold stories of naval history. Included are Admiral William S. Sullivan's account of the problems involved in clearing Manila Harbor of some five hundred wrecked vessels left by the departing Japanese and Admiral Thomas C. Kinkaid's description of the communications breakdown at the Battle of Leyte Gulf. There are also the very personal recollections of humor and horror told by the unknown actors in the war: the hospital corpsman, the coxswain, and the machinist's mate. Originally published in 1986, this volume is an unusual and lasting tribute to the ingenuity and teamwork demonstrated by America's forces in the Pacific as well as a celebration of the human spirit***

***Eighteenth-century Kentucky beckoned to hunters, surveyors, and settlers from the mid-Atlantic coast colonies as a source of game, land, and new trade opportunities. Unfortunately, the Appalachian Mountains formed a daunting barrier that left only two primary roads to this fertile Eden. The steep grades and dense forests of the Cumberland Gap rendered the Wilderness Road impassable to wagons, and the northern route extending from southeastern Pennsylvania became the first main thoroughfare to the rugged West, winding along the Ohio River and linking Maysville to Lexington in the heart of the Bluegrass. Kentucky's Frontier Highway reveals the astounding history of the Maysville Road, a route that served as a theater of local settlement, an engine of economic development, a symbol of the national political process, and an essential part of the Underground Railroad. Authors Karl Raitz and Nancy O'Malley chart its transformation from an ancient footpath used by Native Americans and early settlers to a central highway, examining the effect that its development had on the evolution of transportation technology as well as the usage and abandonment of other thoroughfares, and illustrating how this historic road shaped the wider American landscape.***

***A comprehensive history of the Sino-Russian border, one of the longest and most important land borders in the world The Sino-Russian border, once the world's longest land border, has received scant attention in histories about the margins of empires. Beyond the Steppe Frontier rectifies this by exploring the demarcation's remarkable transformation—from a vaguely marked frontier in the seventeenth century to its twentieth-century incarnation as a tightly patrolled barrier girded by watchtowers, barbed wire, and border guards. Through the perspectives of locals, including railroad employees, herdsman, and smugglers from both sides, Sören Urbansky explores the daily life of communities and their entanglements with transnational and global flows of people, commodities, and ideas. Urbansky challenges top-down interpretations by stressing the significance of the local population in supporting, and undermining, border making. Because Russian, Chinese, and native worlds are intricately interwoven, national separations largely remained invisible at the border between the two largest Eurasian empires. This overlapping and mingling came to an end only when the border gained geopolitical significance during the twentieth century. Relying on a wealth of sources culled from little-known archives from across Eurasia, Urbansky demonstrates how states succeeded in suppressing traditional borderland cultures by cutting kin, cultural, economic, and religious connections across the state perimeter, through laws, physical force, deportation, reeducation, forced assimilation, and propaganda. Beyond the Steppe Frontier sheds critical new light on a pivotal geographical periphery and expands our understanding of how borders are determined.***

The Instant New York Times Bestseller National Bestseller "[The] authors' finest work to date." —Wall Street Journal The explosive true saga of the legendary figure Daniel Boone and the bloody struggle for America's frontier by two bestselling authors at the height of their writing power—Bob Drury and Tom Clavin. It is the mid-eighteenth century, and in the thirteen colonies founded by Great Britain, anxious colonists desperate to conquer and settle North America's "First Frontier" beyond the Appalachian Mountains commence a series of bloody battles. These violent conflicts are waged against the Native American tribes whose lands they covet, the French, and the mother country itself in an American Revolution destined to reverberate around the world. This is the setting of Blood and Treasure, and the guide to this epic narrative is America's first and arguably greatest pathfinder, Daniel Boone—not the coonskin cap-wearing caricature of popular culture but the flesh-and-blood frontiersman and Revolutionary War hero whose explorations into the forested frontier beyond the great mountains would become the stuff of legend. Now, thanks to painstaking research by two award-winning authors, the story of the brutal birth of the United States is told through the eyes of both the ordinary and larger-than-life men and women who witnessed it. This fast-paced and fiery narrative, fueled by contemporary diaries and journals, newspaper reports, and eyewitness accounts, is a stirring chronicle of the conflict over America's "First Frontier" that places the reader at the center of this remarkable epoch and its gripping tales of courage and sacrifice.

In the second magical volume of the Enchanter's Child duology, the bestselling author of the Septimus Heap series, Angie Sage, crafts a stunning finale filled with humor, drama, and nonstop action, just right for fantasy-adventure lovers. In the first book of the Enchanter's Child duology, Alex discovered the truth: Not only does she possess magical powers but her father is Hagos Ravenstarr, who was once the king's Enchanter. Alex is pursued by the fiendish Twilight Hauntings, monstrous Enchantments created because a prophecy foretold the king's death at the hands of an Enchanter's Child. The Twilight Hauntings are designed to rid the land of all Enchanters and their children, but Alex has other ideas. Why should she be forced to leave the place where she belongs? So now Alex is on a mission to destroy the Twilight Hauntings. And to do so she must find the very thing that created them—a magical talisman called the Tau. But where is it? In her search for the Tau, Alex enlists the reluctant help of her father and a strange assortment of people along the way. As she travels, Alex hones her magical skills and learns that even family and friends can surprise her. Praise for the first book in the Enchanter's Child duology, Twilight Hauntings: "Intricate worldbuilding, richly evocative settings, nuanced characters, deftly woven plotting, and wry humor. An unmitigated delight." —Kirkus Reviews (starred review) "Fans of fantasy and adventure will snap this up and eagerly await the sequel." —School Library Journal (starred review) "Sage deftly crafts an endearing and familiar fantasy story, expertly characterizing distinct, extreme personalities. Fantasy fans will highly anticipate the next steps in Alex's journey in the projected sequel of the Enchanter's Child duology." —Bulletin of the Center for Children's Books

At the foot of the Elwha River, the muddy outpost of Port Bonita is about to boom, fueled by a ragtag band of dizzyingly disparate men and women unified only in their visions of a more prosperous future. A failed accountant by the name of Ethan Thornburgh has just arrived in Port Bonita to reclaim the woman he loves and start a family. Ethan's obsession with a brighter future impels the damming of the mighty Elwha to harness its power and put Port Bonita on the map. More than a century later, his great-great grandson, a middle manager at a failing fish-packing plant, is destined to oversee the undoing of that vision, as the great Thornburgh dam is marked for demolition, having blocked the very lifeline that could have sustained the town. West of Here is a grand and playful odyssey, a multilayered saga of destiny and greed, adventure and passion, that chronicles the life of one small town, turning America's history into myth, and myth into a nation's shared experience.

*From #1 New York Times bestselling author Patricia C. Wrede, the fantastic conclusion to her tale of magic on the western frontier. Eff is an unlucky thirteenth child...but also the seventh daughter in her family. Her twin brother, Lan, is a powerful double seventh son. Her life at the edge of the Great Barrier Spell is different from anyone else's that she knows. When the government forms an expedition to map the Far West, Eff has the opportunity to travel farther than anyone in the world. With Lan, William, Professor Torgeson, Wash, and Professor Ochiba, Eff finds that nothing on the wild frontier is as they expected. There are strange findings in their research, a long prairie winter spent in too-close quarters, and more new species, magical and otherwise, dangerous and benign, than they ever expected to find. And then spring comes, and the explorers realize how tenuous life near the Great Barrier Spell may be if they don't find a way to stop a magical flood in a hurry. Eff's unique way of viewing magic has saved the settlers time and again, but this time all of Columbia is at stake if she should fail.*

*Why have so many central and inner cities in Europe, North America and Australia been so radically revamped in the last three decades, converting urban decay into new chic? Will the process continue in the twenty-first century or has it ended? What does this mean for the people who live there? Can they do anything about it? This book challenges conventional wisdom, which holds gentrification to be the simple outcome of new middle-class tastes and a demand for urban living. It reveals gentrification as part of a much larger shift in the political economy and culture of the late twentieth century. Documenting in gritty detail the conflicts that gentrification brings to the new urban 'frontiers', the author explores the interconnections of urban policy, patterns of investment,*

eviction, and homelessness. The failure of liberal urban policy and the end of the 1980s financial boom have made the end-of-the-century city a darker and more dangerous place. Public policy and the private market are conspiring against minorities, working people, the poor, and the homeless as never before. In the emerging revanchist city, gentrification has become part of this policy of revenge.

Chemistry and chemical engineering have changed significantly in the last decade. They have broadened their scope into biology, nanotechnology, materials science, computation, and advanced methods of process systems engineering and control so much that the programs in most chemistry and chemical engineering departments now barely resemble the classical notion of chemistry. *Beyond the Molecular Frontier* brings together research, discovery, and invention across the entire spectrum of the chemical sciences from fundamental, molecular-level chemistry to large-scale chemical processing technology. This reflects the way the field has evolved, the synergy at universities between research and education in chemistry and chemical engineering, and the way chemists and chemical engineers work together in industry. The astonishing developments in science and engineering during the 20th century have made it possible to dream of new goals that might previously have been considered unthinkable. This book identifies the key opportunities and challenges for the chemical sciences, from basic research to societal needs and from terrorism defense to environmental protection, and it looks at the ways in which chemists and chemical engineers can work together to contribute to an improved future.

Eff must finally get over believing she is bad luck and accept that her special training in Aphrikan magic, and being the twin of the seventh son of a seventh son, give her extraordinary power to combat evil magical creatures.

China and Russia are rising economic and political powers that share thousands of miles of border. Despite their proximity, their interactions with each other - and with their third neighbour Mongolia - are rarely discussed. Although the three countries share a boundary, their traditions, languages and worldviews are remarkably different. *Frontier Encounters* presents a wide range of views on how the borders between these unique countries are enacted, produced, and crossed. It sheds light on global uncertainties: China's search for energy resources and the employment of its huge population, Russia's fear of Chinese migration, and the precarious independence of Mongolia as its neighbours negotiate to extract its plentiful resources. Bringing together anthropologists, sociologists and economists, this timely collection of essays offers new perspectives on an area that is currently of enormous economic, strategic and geo-political relevance.

WINNER OF THE PULITZER PRIZE A new and eye-opening interpretation of the meaning of the frontier, from early westward expansion to Trump's border wall. Ever since this nation's inception, the idea of an open and ever-expanding frontier has been central to American identity. Symbolizing a future of endless promise, it was the foundation of the United States' belief in itself as an exceptional nation - democratic, individualistic, forward-looking. Today, though, America has a new symbol: the border wall. In *The End of the Myth*, acclaimed historian Greg Grandin explores the meaning of the frontier throughout the full sweep of U.S. history - from the American Revolution to the War of 1898, the New Deal to the election of 2016. For centuries, he shows, America's constant expansion - fighting wars and opening markets - served as a "gate of escape," helping to deflect domestic political and economic conflicts outward. But this deflection meant that the country's problems, from racism to inequality, were never confronted directly. And now, the combined catastrophe of the 2008 financial meltdown and our unwinnable wars in the Middle East have slammed this gate shut, bringing political passions that had long been directed elsewhere back home. It is this new reality, Grandin says, that explains the rise of reactionary populism and racist nationalism, the extreme anger and polarization that catapulted Trump to the presidency. The border wall may or may not be built, but it will survive as a rallying point, an allegorical tombstone marking the end of American exceptionalism.

From New York Times #1 bestselling author Patricia C. Wrede, the second in the series of magic on the western frontier. Eff is riding west, away from the safety of the frontier city she's always known.... Eff could be a powerful magician if she wanted to. Except she's not sure she wants that kind of responsibility. Everyone keeps waiting for her to do something amazing--or to fail in a spectacular way. Worse, her twin brother, Lan, a powerful double seventh son, is jealous of all the attention she's been getting. Even as Eff protests that she's just an ordinary girl, she's asked to travel past the Barrier Spell with one of the new professors at her father's school. The land west of the Barrier is full of dangers, both magical and wild. Eff will need to use all her strength--magical and otherwise--to come safely back home. With wit, magic, and a touch of good pioneer sense, Patricia C. Wrede once again weaves a fantastic tale of the very wild west.
