Instruction and assessment are so common to teaching and learning that for many readers this may be second nature. There are certainly many kinds of instruction and assessment available to instructors, and these are chosen based on many factors. Thinking beyond standard content tests, considering other, innovative assessments, we may enjoy a richer picture of what students know or understand by investigating prior knowledge, misconceptions, motivations, or self-concept. The book is organized into four general sections: the first section describes the processes by which assessments are constructed and used. The second section focuses on what is learned from assessments in an informal environment, including the use of practice exams and feedback provided to help students reflect on their own learning. Formal classroom assessments and the decisions associated with different assessments and techniques comprises the third section. The final section focuses on assessment goals and innovative investigations of student learning with descriptions of new assessments and new online tools for measuring student understanding.

In this book, Dr. Billings shares the "secret sauce" which has made the *Acellus Learning System* a game changer for thousands of schools coast-to-coast. *Acellus* makes a science of the learning process. It contains tools to recover discouraged students and to accelerate the learning process. In these pages, the author shares the tools, the techniques, and the magic of *Acellus* that is changing education, discussing important aspects of the system: "What is it worth? - What happens when a student gets stuck? - How does *Acellus* accelerate the learning process?" Dr. Maria Sanchez, Chairman International Academy of Science

*EXPLORE THE WORLD OF CHEESE BY ASKING YOURSELF ONE SIMPLE QUESTION: WHAT CHEESES DO I ALREADY LOVE? This is the first book of its kind to be organized not by country, milk type, or any other technical classification. The Book of Cheese maps the world of cheese using nine familiar favorites, what author Liz Thorpe calls the Gateway Cheeses. From basics like Swiss, blue, and cheddar, Liz leads the way to more adventurous types. Love Brie? Liz shows you how to find other Brie-like cheeses, from the mild Moses Sleeper to the pungent Fromage de Meaux. Her revolutionary approach allows food lovers to focus on what they really care about: finding more cheeses to enjoy. Complete with flavor and aroma wheels, charts guiding you through different intensities and availabilities, and gorgeous photography, this is the only book on cheese you will ever need.*

Airman Certification Standards

"This book is organized around three concepts fundamental to OS construction: virtualization (of CPU and memory), concurrency (locks and condition variables), and persistence (disks, RAIDS, and file systems)"--Back cover.

The Federal Aviation Administration (FAA) has published the Private Pilot - Airplane Airman Certification Standards (ACS) document to communicate the aeronautical knowledge, risk management, and flight proficiency standards for the private pilot certification in the airplane category, single-engine land and sea; and multiengine land and sea classes. This ACS incorporates and supersedes the previous Private Pilot Practical Test Standards for Airplane, FAA-S-8081-14. The FAA views the ACS as the foundation of its transition to a more integrated and systematic approach to airman certification. The ACS is part of the safety management system (SMS) framework that the FAA uses to mitigate risks associated with airman certification training and testing. Specifically, the ACS, associated guidance, and test question components of the airman certification system are constructed around the four functional components of an SMS: Safety Policy that defines and describes aeronautical knowledge, flight proficiency, and risk management as integrated components of the airman certification system; Safety Risk Management processes through which internal and external stakeholders identify and evaluate regulatory changes, safety recommendations and other factors that require modification of airman testing and training materials; Safety Assurance processes to ensure the prompt and appropriate incorporation of changes arising from new regulations and safety recommendations; and Safety Promotion in the form of ongoing engagement with both external stakeholders (e.g., the aviation training industry) and FAA policy divisions. The FAA has developed this ACS and its associated guidance in collaboration with a diverse group of aviation training experts. The goal is to drive a systematic approach to all components of the airman certification system, including knowledge test question development and conduct of the practical test. The FAA acknowledges and appreciates the many hours that these aviation experts have contributed toward this goal. This level of collaboration, a hallmark of a robust safety culture, strengthens and enhances aviation safety at every level of the airman certification system.

This is a review manual for candidates wanting an ACSM credential. It combines content from 'ACSM's Health and Fitness Certification Review' and 'ACSM's Clinical Certification Review' into one resource.

The authors--a once-skeptical chemistry professor and a director of assessment sensitive to the concerns of her teacher colleagues--use a personal voice to describe the basics of outcomes-based assessment. The purpose of the book is to empower faculty to develop and maintain ownership of assessment by articulating the learning outcomes and evidence of learning that are appropriate for their courses and programs. The authors offer readers a guide to the not always tidy process of articulating expectations, defining criteria and standards, and aligning course content consistently with desired outcomes. The wealth of examples and stories, including accounts of successes and false starts, provide a realistic and honest guide to what's involved in the institutionalization of assessment.

*This guide is separated into first-term and second-term general chemistry material. Each section contains 8 chapters of material that also aligns to most general chemistry textbooks for a seamless addition to study materials for students. Each chapter is designed with an introductory section of the material including common representations and where to find this material in a textbook. The second section provides worked examples of typical, multiple choice questions including how the correct answer is determined as well as how the incorrect answers were determined. Also included for each study problem is a listing of the corresponding practice questions that use that concept. The final section is a series of practice problems to test the concepts collectively. The key is provided on a separate page for all study and practice problems.*
