*This book familiarizes the reader with some recent trends in the theory and practice of thrombolysis. It covers the field of fibrinolysis from the standpoint of basic scientists and clinicians and delivers the state-of-the-art information on the biochemistry and pharmacology of fibrinolysis, as well as related novel methodological and diagnostic tools in the field. An introductory chapter summarizes the basic molecular mechanisms in fibrinolysis (plasminogen, its endogenous activators and their inhibitors, plasmin and its inhibitors). Recent developments in our understanding of fibrin formation are described in the context of its impact on fibrinolysis. The discussion of neutrophil extracellular traps in the modulation of fibrin assembly and the consequences regarding plasminogen activation and plasmin action addresses a novel aspect of fibrinolysis.*

Portfolio Decision Analysis: Improved Methods for Resource Allocation provides an extensive, up-to-date coverage of decision analytic methods which help firms and public organizations allocate resources to 'lumpy' investment opportunities while explicitly recognizing relevant financial and non-financial evaluation criteria and the presence of alternative investment opportunities. In particular, it discusses the evolution of these methods, presents new methodological advances and illustrates their use across several application domains. The book offers a many-faceted treatment of portfolio decision analysis (PDA). Among other things, it (i) synthesizes the state-of-play in PDA, (ii) describes novel methodologies, (iii) fosters the deployment of these methodologies, and (iv) contributes to the strengthening of research on PDA. Portfolio problems are widely regarded as the single most important application context of decision analysis, and, with its extensive and unique coverage of these problems, this book is a much-needed addition to the literature. The book also presents innovative treatments of new methodological approaches and their uses in applications. The intended audience consists of practitioners and researchers who wish to gain a good understanding of portfolio decision analysis and insights into how PDA methods can be leveraged in different application contexts. The book can also be employed in courses at the post-graduate level.

This volume, one in a series resulting from Project SPAN (Social Studies/Social Science Education: Priorities, Practices, and Needs), reviews and analyzes the current state of K-12 social studies. A major purpose of the review and analysis was to form a basis for recommendations for future directions that might be taken to improve social studies. The report contains six sections. The first section provides a broad and integrative analysis of the interrelated topics of rationales, definitions, approaches, goals, and objectives of social studies. The second section, "Curriculum Organization in Social Studies," describes the typical pattern of social studies programs from kindergarten through grade 12, stating that despite numerous variations that have occurred, the dominant pattern throughout the nation is one that was established more than 60 years ago. "Social Studies Curriculum Materials," the third section of the volume, describes the great extent to which students, teachers, administrators, and the public accept and rely on curriculum materials as essential aids to teaching, learning, and classroom management. Foremost among curriculum materials being used are textbooks. The topic of the fourth section is "Social Studies Teachers." There is general agreement that the teacher is "the central figure," the "key," or "the magic ingredient" in the learning process. The fifth section, "Instructional Practices in Social Studies," presents a detailed report on what

teachers do. The last section, "Barriers to Change in Social Studies," focusing on the fact that the new social studies had relatively little impact on the schools, explores reasons for lack of change in schools. (Author/RM)

Why every ACT question can only have one valid answer, no matter how much it might seem otherwise sometimes... How to look at ACT questions the same way ACT, Inc. does when it writes them... Why it's so important to work with real test questions from ACT, Inc....and why you shouldn't pay much attention to the official written explanations for those questions... What you're actually supposed to do when the ACT asks you about an author's attitude... The important implications of viewing time as an investment on test day... Why focusing on the wrong answers can be just as important as finding the right one...and how to do it effectively... The simple formula that allows you to crank out a top-scoring essay (that is, if you even need to take the ACT Writing test in the first place)... The special grammatical rules tested on the ACT English section-which may differ from what's commonly accepted in a high school or college classroom... The unwritten rules for every kind of ACT question... The many ways to approach an ACT Math question, and which ones are likely to work best for you... Why every real ACT Math question can potentially be answered in under 30 seconds... And much, much more than we can fit in this space...

***The name velvet spider describes the dark and shiny appearance of members of the family Eresidae. Some species also have brightly-colored highlights, such as the red, white, and black ladybird spiders of Europe and North Asia. This family also includes some of the world's most cooperative spider species. Social species can be very abundant in parts of tropical Africa and Asia with conspicuous colonies dotting the landscape. Social colonies may consist of hundreds of closely-related individuals that participate in dramatic mass attacks on prey and care for their young. The ecology of these social species is fascinating and has been the subject of several landmark scientific papers. By contrast,***

*most kinds of velvet spider are rarely encountered. Most species keep well hidden or dig burrows and live underground. This monograph provides a generic-level review of Eresidae documented with collections of photographs, scanning electron micrographs, and illustrations. A key to the nine genera and other major lineages is provided. A new phylogeny of Eresidae based on molecular sequence data expands on a previously published analysis. Cybertaxonomic enhancements include an interactive map of the specimens used in the study explorable using Google Earth, specimen records uploaded to GBIF, and molecular sequence alignments and other data archived on Dryad. An EDIT Integrated Research grant provided principal funding for this project.*

*Hijuelos' novel tells the story of Mr. Ives, who was adopted from a foundling's home as a child. When we first meet him in the 1950s, Mr. Ives is very much a product of his time. He has a successful career in advertising, a wife and two children, and believes he is on his way to pursuing the typical American dream. But the dream is shattered when his son Robert, who is studying for the priesthood, is killed violently at Christmas. Overwhelmed by grief and threatened by a loss of faith in humankind, Mr. Ives begins to question the very foundations of his life. Part love story--of a man for his wife, for his children, for God--and part meditation on how a person can find spiritual peace in the midst of crisis, Mr. Ives' Christmas is a beautifully written, tender and passionate story of a man trying to put his life in perspective. In the expert hands of Oscar Hijuelos, the novel speaks eloquently to the most basic and fulfilling aspects of life for all of us.*

Elizabeth Cady Stanton—along with her comrade-in-arms, Susan B. Anthony—was one of the most important leaders of the movement to gain American women the vote. But, as Vivian Gornick argues in this passionate, vivid biographical essay, Stanton is also the greatest feminist thinker of the nineteenth century. Endowed with a philosophical cast of mind large enough to grasp the immensity that women's rights addressed, Stanton developed a devotion to equality uniquely American in character. Her writing and life make clear why feminism as a liberation movement has flourished here as nowhere else in the world. Born in 1815 into a conservative family of privilege, Stanton was radicalized by her experience in the abolitionist movement. Attending the first international conference on slavery in London in 1840, she found herself amazed when the conference officials refused to seat her because of her sex. At that moment she realized that "In the eyes of the world I was not as I was in my own eyes, I was only a woman." At the same moment she saw what it meant for the American republic to have failed to deliver on its fundamental promise of equality for all. In her last public address, "The Solitude of Self," (delivered in 1892), she argued for women's political equality on the grounds that loneliness is the human condition, and that each citizen therefore needs the tools to fight alone for his or her interests. Vivian Gornick first encountered "The Solitude of Self" thirty years ago. Of that moment Gornick writes, "I hardly knew who Stanton was, much less what this speech meant in

her life, or in our history, but it I can still remember thinking with excitement and gratitude, as I read these words for the first time, eighty years after they were written, ' We are beginning where she left off.' " The Solitude of Self is a profound, distilled meditation on what makes American feminism American from one of the finest critics of our time.

The revolution of 1905 in the Russian-ruled Kingdom of Poland marked the consolidation of major new influences on the political scene. As he examines the emergence of a mass political culture in Poland, Robert E. Blobaum offers the first history in any Western language of this watershed period. Drawing on extensive archival research to explore the history of Poland's revolutionary upheavals, Blobaum departs from traditional interpretations of these events as peripheral to an essentially Russian movement that reached a climax in the Russian Revolution of 1917. He demonstrates that, although Polish independence was not formally recognized until after World War I, the social and political conditions necessary for nationhood were established in the years around 1905.

Schools are an attractive entry point to improve children's diets, as their eating habits can be shaped during childhood and the information disseminated from school can reach adults through children. We implemented a cluster-randomized trial in 12 schools in peri-urban Viet Nam to assess if two school-based interventions increased knowledge of healthy diets among children and their parents, as well as children's consumption of healthy foods. First, children were given lessons about food before school lunch and encouraged to share the lessons with their parents. Second, children were provided with healthy snacks for five weeks to reinforce messages about healthy eating. We found that in the short term, the nutrition lessons raised the knowledge index score of the children by 0.35 standard deviation. After six months, this intervention retained its effectiveness only for the children who also received free access to fruit, emphasizing the linkage between knowledge and practice. By itself, free access to fruit at school increased the children's daily fruit consumption by half a portion, but not at the expense of home fruit consumption. Access to healthy foods at school can therefore be an effective measure to raise children's healthy consumption. Child-parent communication was not a reliable channel for knowledge dissemination in our setting.
