

Addicted To Unhappiness Free Yourself From Moods And Behaviors That Undermine Relationships Work And The Life You Want

Dr. Stevens’ research identifies specific learnable beliefs and skills—not general, inherited traits--that cause people to be happy and successful.

As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today’s rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the thing that makes iGen distinct from every generation before them: they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world. Unrecognized needs for unhappiness are created when parenting styles based on discipline, permissiveness, neglect and/or excessive expectations condition children to equate unhappiness with love. These learned needs for unhappiness persist into adulthood and lead to maladaptive behaviors including eating disorders, compulsive gambling, disastrous romantic choices, substance abuse, problems at work, work-life balance issues, and more. Addicted to Unhappiness supplies readers with powerful tools, including self-assessments, checklists, diaries, and exercises, to overcome their needs for unhappiness.Readers will also learn how to navigate inevitable moments of backsliding without becoming discouraged.This book is an invaluable guide for all those wishing to improve the quality of their lives. Contentment is a super power. If you can learn the skills of contentment, your life will be better in so many ways: You’ll enjoy your life more. Your relationship will be stronger. You’ll be better at meeting people. You’ll be healthier, and good at forming healthy habits. You’ll like and trust yourself more. You’ll be jealous less. You’ll be less angry and more at peace. You’ll be happier with your body. You’ll be happier no matter what you’re doing or who you’re with. Those are a lot of benefits, from one small bundle of skills. Putting some time in learning the skills of contentment is worth the effect and will pay off for the rest of your life.

Kinematics of the Brain Activities

The Happiness Project (Revised Edition)

Loving an Addict, Loving Yourself

A Memoir

Women Who Love Too Much

How to Identify and Eliminate Unhealthy Relationships

In thirty-one meditations, the author implores his readers to break through illusion, the great obstacle to love.

Our human capacity for responsible agency infuses our lived experience yet seems impossible to situate fully within a materialistic scientific worldview. This book indicates how we can reconcile scientific and personal perspectives without eroding the integrity of either. The structural solution both amends foundational assumptions for understanding scientific activity, meaning and reality, and also recognizes our own participation in constituting each of these domains. The book reanalyzes the requirements for scientific objectivity, and then reconstructs and aligns both an external/causal and an internal/subjective account of our potential for genuine mental causation and responsibility. An Appendix presents original experimental data from the author's journey. This book is intended for anyone who has struggled with the tensions between scientific and humanistic conceptions of ourselves; for anyone interested in a conceptually unified solution to diverse problems in philosophy of science, mind and meaning; and for scientists wanting to take authentic responsibility for their science.

Mixing Christian spirituality, Buddhist parables, Islamic sayings, Hindu breathing exercises, and psychological insight, spiritualist and Jesuit priest Anthony de Mello challenges readers to identify our most submerged, darkest feeling, accept them, not let them rule us, and allow this new awareness of ourselves to change us. "This book made me happy in the first five pages." —AJ Jacobs, author of The Year of Living Biblically: One Man's Humble Quest to Follow the Bible as Literally as Possible Award-winning author Gretchen Rubin is back with a bang, with The Happiness Project. The author of the bestselling 40 Ways to Look at Winston Churchill has produced a work that is "a cross between the Dalai Lama's The Art of Happiness and Elizabeth Gilbert's Eat, Pray, Love." (Sonya Lyubomirsky, author of The How of Happiness: A Scientific Approach to Getting the Life You Want) In the eyes of Julie and Julia, The Happiness Project describes one person's year-long attempt to discover what leads to true contentment. Drawing at once on cutting-edge science, classical philosophy, and real-world applicability, Rubin has written an engaging, eminently reliable chronicle of transformation.

How to Let Go of Anxiety and Free Yourself from Obsessive Rumination

You Can Choose to Be Happy

WHAT IF we have fallen in love with unhappiness? Although we all wish to be happy, many of us fall into a set pattern of failures when we find ourselves in certain circumstances. On the conscious level, we think we are earnestly seeking happiness, but unconsciously, we may be choosing the patterns of thinking and action that will eventually lead us to unhappiness. According to the author, Ryuho okawa, surprisingly 80 to 90 percent of the people have had symptoms of the Unhappiness Syndrome which are patterns of thinking that invite unhappiness. In this book, Okawa diagnoses the 28 common habits of the Unhappiness Syndrome and offers prescriptions for changing them so that we can cure ourselves of this syndrome. The path to happiness begins with becoming aware of the negative patterns that we fall into. Find out whether you fall into any of the 28 patterns so that you can free yourself from worries, distress, and emotional pain. With the prescriptions offered in this book, you can start to think and act in a way that attracts happiness and open a path to a positive, bright, and happy future! Common Symptoms of the Unhappiness Syndrome are:

Envyng Other people’s success
Struggling with weak enthusiasm
Living in constant fear of being hurt
Feeling trapped by the past
Never having enough time for yourself
Not getting along with your boss
Struggling financially
Fearing death
Constantly having family conflicts and more
Find the cures and free yourself from unhappiness today!

Recounts the addiction and recovery of the world-renowned solo artist and former lead singer and songwriter of Soul Coughing

After enduring her share of codependent relationships, author Jacqueline Williams knew she needed to change her behavior patterns. Through a great deal of soul-searching, therapy, and prayer, Williams came to understand her codependency and how to eradicate it from her relationships.Written especially for women, Confessions of a Codependent: How to Identify and Eliminate

Unhealthy Relationships defines codependent relationships, explains why they are so self-destructive, and explores why these relationships can at times lead to physical violence.Confessions of a Codependent shares other women's stories of codependent, abusive, and/or dysfunctional relationships, as well as the ways these women were able to leave them and move on to healthier partnerships. Confessions of a Codependent also includes practical advice on how to recognize signs that your relationship may be heading toward emotional and/or physical abuse, how to move away from self-defeating and self-destructive behaviors, and resources that you can use to escape a codependent relationship.If you're struggling in your current relationship and feel trapped by codependency, break the cycle with Confessions of a Codependent!

Drawing upon their years of counseling experience, the bestselling author team of Martha and William Pieper explain how parenting styles based on discipline and excessive expectations condition children to equate unhappiness with love. This often persists into adulthood, leading to behaviors including eating disorders, compulsive gambling, disastrous romantic choices, substance abuse,

and more. This book supplies readers with powerful tools, including self-assessments, checklists, diaries, and exercises, to overcome their need for unhappiness.

Lost Connections

The authors offer unique insights into the factors that make us susceptible to dietary and lifestyle excesses, and present ways to restore the biological processes designed by nature to keep us running at maximum efficiency and vitality. A wake-up call to even the most health conscious people, The Pleasure Trap boldly challenges conventional wisdom about sickness and unhappiness in today's contemporary culture, and offers groundbreaking solutions for achieving change. Authors Douglas Lise!, Ph.D., and Alan Goldhamer, D.C., provide a fascinating new perspective on how modern life can turn so many smart, savvy people into the unwitting saboteurs of their own well-being. Inspired by stunning original research, comprehensive clinical studies, and their successes with thousands of patients, the authors construct a new paradigm for the psychology of health, offering fresh hope for anyone stuck in a self-destructive rut. Integrating principals of evolutionary biology with trailblazing, proactive strategies for well

Why am I feeling so negative? Why am I unable to maintain a good relationship with others? Why is it that I am always preoccupied? Why? Why? Why? The question "why" keeps bothering us. These issues continuously hound us and many a time we feel that we are stuck somewhere. Our life's journey is a process of finding answers to these questions. But how many of us succeed in the search for the answers? "Evolution has accelerated our most deep-seated survival instincts."—David Perlmutter, MD, Author, #1 New York Times Bestseller, Grain Brain and Brain Maker The New York Times–bestselling author of Fat Chance reveals the corporate scheme to sell pleasure, driving the international epidemic of addiction, depression, and chronic disease. While researching the toxic and addictive properties of sugar for his New York Times bestseller Fat Chance, Robert Lustig made an alarming discovery—our pursuit of happiness is being subverted by a culture of addiction and depression from which we may never recover. Dopamine is the "reward" neurotransmitter that tells our brains we want more; yet every substance or behavior that releases dopamine in the extreme leads to addiction. Serotonin is the "contentment" neurotransmitter that tells our brains we don't need any more; yet its deficiency leads to depression. Ideally, both are in optimal supply. Yet dopamine evolved to overwhelm serotonin—because our ancestors were more likely to survive if they were constantly motivated—with the result that constant desire can chemically destroy our ability to feel happiness, while sending us down the slippery slope to addiction. In the last forty years, government legislation and subsidies have promoted ever-available temptation (sugar, drugs, social media, porn) combined with constant stress (work, home, money, Internet), with the end result of an unprecedented epidemic of addiction, anxiety, depression, and chronic disease. And with the advent of neuromarketing, corporate America has successfully imprisoned us in an endless loop of desire and consumption from which there is no obvious escape. With his customary wit and inciseness, Lustig not only reveals the science that drives these states of mind, he points his finger directly at the corporations that helped create this mess, and the government actors who facilitated it, and he offers solutions we can all use in the pursuit of happiness, even in the face of overwhelming opposition. Always fearless and provocative, Lustig marshals a call to action, with seminal implications for our health, our well-being, and our culture.

Based on the highly effective, proven Therapeutic Lifestyle Change (TLC) program: a practical plan for natural ways to treat depression -- without medication In the past decade, depression rates have skyrocketed, and one in four Americans suffer from major depression at some point in their lives. Where have we gone wrong? Dr. Stephen Ilardi sheds light on our current predicament and reminds us that our bodies were never designed for the sleep-deprived, hurried pace of twenty-first century life. Inspired by the extraordinary resilience of aboriginal groups like the Kaluli of Papua New Guinea, Dr. Ilardi prescribes an easy-to-follow, clinically proven program that harks back to what our bodies were originally made for and what they continue to need with these six components: Brain Food Don't Think, Do Antidepressant Exercise Let There Be Light Get Connected Habits of Healthy Sleep The Depression Cure's holistic approach has been met with great success rates, helping even those who have failed to respond to traditional medications. For anyone looking to supplement their treatment, The Depression Cure offers hope and a practical path to wellness for anyone.

Freeing Yourself from Behaviors that Undermines Work, Relationships, and the Life You Want

A Novel

Master Your Mind and Defy the Odds - Clean Edition

The Art of Caregiving

Substance and Non-substance Addiction

“Pollan keeps you turning the pages . . . clear-eyed and assured.” —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, How to Change Your Mind is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a man on an exciting and unexpected new frontier in our understanding of the mind, and our place in the world. The true subject of Pollan’s “mental travelogue” is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives. “Read this book and experience the freedom to create your reality.” —Deepak Chopra, MD, author of Total Meditation Don't believe everything your mind telling you. Are you a chronic overthinker? Do you obsess to the point of feeling anxious, hopeless, angry, or stressed out? Have you ever tried to “think your way out” of one of these negative thought spirals, only to fall in deeper? Let’s face it: trying to escape your thoughts—or control them—just doesn’t work, and can actually make you more miserable in the long run. So, how can you overcome your addiction to thinking? In Can’t Stop Thinking, psychotherapist and spiritual counselor Nancy Colier offers the keys to breaking free from the obsessive rumination that drives stress, worry, and anxiety. Using powerful tools grounded in the ancient wisdom of mindfulness and evidence-based acceptance and commitment therapy (ACT), you’ll learn how to observe and gain distance from troubling thoughts, put an end to harsh self-criticism, and manage difficult feelings like resentment and shame. If you’re ready to discover a life beyond your thoughts—one of self-compassion, presence, and peace—it’s time to stop thinking and start living.

When Joey, a bouncy happy kangaroo, has a series of bad dreams, his parents lovingly help him understand them. Children will be fascinated and enlightened as Joey learns to make sense of his bad dreams and to put himself back to sleep feeling comforted and in charge.

A totalitarian regime has ordered all books to be destroyed, but one of the book burners suddenly realizes their merit.

What the New Science of Psychedelics Teaches Us About Consciousness, Dying, Addiction, Depression, and Transcendence

A novel

The Unhappiness Syndrome

The Science Behind the Corporate Takeover of Our Bodies and Brains

Fahrenheit 451

A Workbook for Overcoming Addictions

This book focuses on the similarities and differences between substance and non-substance addictions. It discusses in detail the mechanisms, diagnosis and treatment of substance and non-substance addictions, and addresses selected prospects that will shape future studies on addiction. Addiction is a global problem that costs millions of lives tremendous damage year after year. There are mainly two types of addition: substance addiction (e.g., nicotine, alcohol, cannabis, heroin, stimulants, etc.) and non-substance addiction (e.g., gambling, computer gaming, internet, etc.). Based on existing evidence, both types of addiction produce negative impacts on individuals' physical, mental, social and financial well-being, and share certain common mechanisms, which involve a dysfunction of the neural reward system and specific gene transcription factors. However, there are also key differences between these two types of addiction. Covering these aspects systematically, the book will provide researchers and graduate students alike a better understanding of drug and behavioral addictions.

New York Times Bestseller Over 2.5 million copies sold For David Goggins, childhood was a nightmare - poverty, prejudice, and physical abuse colored his days and haunted his nights. But through self-discipline, mental toughness, and hard work, Goggins transformed himself from a depressed, overweight young man with no future into a U.S. Armed Forces icon and one of the world's top endurance athletes. The only man in history to complete elite training as a Navy SEAL, Army Ranger, and Air Force Tactical Air Controller, he went on to set records in numerous endurance events, inspiring Outside magazine to name him The Fittest (Real) Man in America. In this curse-word-free edition of Can't Hurt Me, he shares his astonishing life story and reveals that most of us tap into only 40% of our capabilities. Goggins calls this The 40% Rule, and his story illuminates a path that anyone can follow to push past pain, demolish fear, and reach their full potential.

A stress management expert explains the growing problem of stress addiction and offers a step-by-step program for alleviating it, demonstrating how women can overcome repetitive, destructive behaviors with a regimen of self-empowerment, exercise and self-care, healthy narcissism, diet, and renewed humor and sensuality.

Why We Suffer is the amazing story of what mainstream psychology has failed to teach the world. The author, Peter Michaelson, is a former journalist and science writer who has been in private practice as a psychotherapist for more than 25 years. This book reveals how we hide from our awareness--through resistance, denial, and psychological defenses--the existence of a hidden flaw in our psyche. This unconscious, mental-emotional processing dysfunction is a grave danger to each of us personally and to each of us collectively. Through our defense system, we cover up awareness of this inner dysfunction.This flaw in human nature produces irrationality, self-defeat, and negative emotions. It gets the best of us only when we fail to become conscious of it. When we expose it, we begin to remedy the problem. When this flaw no longer contaminates our inner life, we feel, just for starters, our goodness and our value more fully, and we're more respectful of the goodness and value of others.Most of us have problems or challenges we would like to resolve. Collectively, we also have challenging national and worldwide problems that need to be corrected. We may not be up to these challenges if we're not conscious enough of our inner dynamics. Handicapped by a lack of self-knowledge, how can we trust ourselves to avoid conflict and self-defeat? We will fail repeatedly to learn from history.A lot of good ideas are in circulation for making ourselves and the world a better place.

But good ideas aren't enough in themselves. This hidden flaw can keep good ideas from being acted on because it compels us, at best, to be indecisive, confused, and prone to dissension. At worst, it produces self-defeat and self-destruction. This negative effect consistently trumps our good ideas and best intentions.This book reveals essential knowledge that humankind has been reluctant to accept. This knowledge involves our hidden, unconscious collusion in producing self-defeating emotions and behaviors. The key to taking charge of your life involves seeing more clearly than ever how our emotional nature is processed within us.

The brain, as it was popular for years, is not a computer. The brain structure and mechanism are developed by evolutionary roles of nature. Basic physical roles in nature as well as tendencies in plants and instincts in animals are previous ways for integration with nature. The evolution of hard relations between substances to biological soft behaviors of life can be traced along with evolution of integration centers. If gravity center is the integration center for substance interaction to stay in a balance condition, digesting system is the integration center for plant tendency to grow by turning toward light and nerve system is integration center for primary animal instinct to protect its survival, brain has been developed in millions of years for front lobe as human integration center to fulfill his self-identity and effective self-protection. This book is all about a new way to understand human brain.

Are you feeling exasperated and helpless about your family member's addiction? Are you at your wit's end, having tried everything you can think of to make them stop? If someone you love is engaging in addictive behaviors such as alcohol and drug misuse, eating disorders, smoking, gambling, Internet addiction, sex addiction, compulsive overspending, or relationship addiction, you are undoubtedly experiencing unpredictability in your relationship. Some of the most common emotions you will experience include: - Guilt and shame - Anger and anxiety - Confusion and powerlessness Whether the addict in your life is your spouse, partner, child, friend, or colleague, the key to changing this reality for yourself lies in shifting your focus from your loved one's addiction to you own self-care. This book presents a dramatically fresh approach to help you get off the roller-coaster chaos of addiction, maintain your own sanity and serenity, and live your best life.

You are not doomed by your genes and hardwired to be a certain way for the rest of your life. A new science is emerging that empowers all human beings to create the reality they choose. In Breaking the Habit of Being Yourself, renowned author, speaker, researcher, and chiropractor Dr. Joe Dispenza combines the fields of quantum physics, neuroscience, brain chemistry, biology, and genetics to show you what is truly possible. Not only will you be given the necessary knowledge to change any aspect of yourself, but you will be taught the step-by-step tools to apply what you learn in order to make measurable changes in any area of your life. Dr. Joe demystifies ancient understandings and bridges the gap between science and spirituality. Through his powerful workshops and lectures, thousands of people in 24 different countries have used these principles to change from the inside out. Once you break the habit of being yourself and truly change your mind, your life will never be the same!

The New York Times bestseller All around us people are looking at their phones too much, eating too much, drinking too much. Our world is addicted to fleeting distracting pleasures that get us nowhere. Dr Anna Lembke provides a clear way back to a balanced life. This book is about pleasure. It's also about pain. Most importantly, it's about how to find the delicate balance between the two, and why now more than ever finding balance is essential. We're living in a time of unprecedented access to high-reward, high-dopamine stimuli: drugs, food, news, gambling, shopping, gaming, texting, sexting, Facebooking, Instagramming, YouTubeing, tweeting... The increased numbers, variety, and potency is staggering. The smartphone is the modern-day hypodermic needle, delivering digital dopamine 24/7 for a wired generation. As such we've all become vulnerable to compulsive overconsumption. In Dopamine Nation, Dr. Anna Lembke, psychiatrist and author, explores the exciting new scientific discoveries that explain why the relentless pursuit of pleasure leads to pain...and what to do about it. Condensing complex neuroscience into easy-to-understand metaphors, Lembke illustrates how finding contentment and connectedness means keeping dopamine in check. The lived experiences of her patients are the gripping fabric of her narrative. Their riveting stories of suffering and redemption give us all hope for managing our consumption and transforming our lives. In essence, Dopamine Nation shows that the secret to finding balance is combining the science of desire with the wisdom of recovery. 'Dr Anna Lembke is a whiz on why we get hooked on things - and how we can enjoy pleasurable things in healthier doses.' - The Guardian

THE MILLION COPY INTERNATIONAL BESTSELLER Drawn from 3,000 years of the history of power, this is the definitive guide to help readers achieve for themselves what Queen Elizabeth I, Henry Kissinger, Louis XIV and Machiavelli learnt the hard way. Law 1: Never outshine the master Law 2: Never put too much trust in friends; learn how to use enemies Law 3: Conceal your intentions Law 4: Always say less than necessary. The text is bold and elegant, laid out in black and red throughout and replete with fables and unique word sculptures. The 48 laws are illustrated through the tactics, triumphs and failures of great figures from the past who have wielded - or been victimised by - power. _____ (From the Playboy interview with Jay-Z, April 2003) PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In The 48 Laws of Power, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, Volume Three, was wack. People set high standards for me, and I love it.

This recently updated guide is written for people living with depression, their families, and anyone interested in gaining a basic understanding of this illness and its treatment and management. The guide gives information on: what depression is and how it is diagnosed the different kinds of depression the causes and current theories of depression the different kinds of treatments available frequently asked questions and concerns about medication the process of recovery and effective relapse prevention how family members can relate to a person with depression how to explain depression to children. This guide will help people with depression, along with their family and friends, to understand and navigate through the realities of depression, and the options available to them as they move toward recovery." A guidebook to beating internet addiction and screen overuse and for living a fuller life There's no escaping it—we live in a digital world. We work, play, socialize, and learn online, and the Internet provides many amazing opportunities. Unfortunately, because of our basic biology, we're all susceptible to overuse and addiction to screens. Video games, social media, porn, and even scrolling online, taps into that pleasurable dopamine reward system. So, when is it time to log off or put the phone down and get help? Can't Stop Thinking

The 10th anniversary edition of A New Earth with a new preface by Eckhart Tolle. With his bestselling spiritual guide The Power of Now, Eckhart Tolle inspired millions of readers to discover the freedom and joy of a life lived "in the now." In A New Earth, Tolle expands on these powerful ideas to show how transcending our ego-based state of consciousness is not only essential to personal happiness, but also the key to ending conflict and suffering throughout the world. Tolle de jealousy, and unhappiness, and shows readers how to awaken to a new state of consciousness and follow the path to a truly fulfilling existence. Illuminating, enlightening, and uplifting, A New Earth is a profoundly spiritual manifesto for a better way of life—and for building a better world.

When catastrophic illness strikes, someone close to the patient—a spouse, child, grandchild, or close friend—inevitably joins that patient on the arduous journey through treatment and recovery. Surprisingly, health-care professionals largely acknowledge that personal caregivers have more influence over the patient's experience in the short and long term than any medical professional. That means that if you find yourself in the role of caregiver, you are—or can be—one of the gre you how to create moments filled with positive energy, hope, abundant love, occasional laughter, and people (including you) who sparkle with a life-giving, joyful attitude, even amidst grave illness.

NEW YORK TIMES BEST SELLER • A TODAY SHOW #ReadWithJenna BOOK CLUB PICK! • Finalist for the WOMEN'S PRIZE Yaa Gyasi's stunning follow-up to her acclaimed national best seller Homegoing is a powerful, raw, intimate, deeply layered novel about a Ghanaian family in Alabama. Gifty is a sixth-year PhD candidate in neuroscience at the Stanford University School of Medicine studying reward-seeking behavior in mice and the neural circuits of depression and addiction. Her brother's heroin overdose after an ankle injury left him hooked on OxyContin. Her suicidal mother is living in her bed. Gifty is determined to discover the scientific basis for the suffering she sees all around her. But even as she turns to the hard sciences to unlock the mystery of her family's loss, she finds herself hungering for her childhood faith and grappling with the evangelical church in which she was raised, whose promise of salvation remains as tantalizing as it is elusive. Transcended by depression and addiction and grief—a novel about faith, science, religion, love. Exquisitely written, emotionally searing, this is an exceptionally powerful follow-up to Gyasi's phenomenal debut.
