This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

Wisdom at Work

Between the 18th and 19th centuries, Britain experienced massive leaps in technological, scientific, and economical advancement

Experience is making a comeback. Learn how to repurpose your wisdom. At age 52, after selling the company he founded and ran as CEO for 24 years, rebel boutique hotelier Chip Conley was looking at an open horizon in midlife. Then he received a call from the young founders of Airbnb, asking him to help grow their disruptive start-up into a global hospitality giant. He had the industry experience, but Conley was lacking in the digital fluency of his 20-something colleagues. He didn’t write code, or have an Uber or Lyft app on his phone, was twice the age of the average Airbnb employee, and would be reporting to a CEO young enough to be his son. Conley quickly discovered that while he’d been hired as a teacher and mentor, he was also in many ways a student and intern. What emerged is the secret to thriving as a mid-life worker: learning to marry wisdom and experience with curiosity, a beginner’s mind, and a willingness to evolve, all hallmarks of the “Modern Elder.” In a world that venerates the new, bright, and shiny, many of us are left feeling invisible, undervalued, and threatened by the “digital natives” nipping at our heels. But Conley argues that experience is on the brink of a comeback. Because at a time when power is shifting younger, companies are finally waking up to the value of the humility, emotional intelligence, and wisdom that come with age. And while digital skills might have only the shelf life of the latest fad or gadget, the human skills that mid-career workers possess—like good judgment, specialized knowledge, and the ability to collaborate and coach - never expire. Part manifesto and part playbook, Wisdom@Work ignites an urgent conversation about ageism in the workplace, calling on us to treat age as we would other type of diversity. In the process, Conley liberates the term “elder” from the stigma of “elderly,” and inspires us to embrace wisdom as a path to growing whole, not old. Whether you’ve been forced to make a mid-career change, are choosing to work past retirement age, or are struggling to keep up with the millennials rising up the ranks, Wisdom@Work will help you write your next chapter
