Basic Finance: An Introduction to Financial Institutions, Investments, and Management

Part A: Structure and Mechanisms

Unlike other government and not-for-profit (NFP) books, this one is directed at potential users rather than preparers of financial reports. It demonstrates the significance of reported information and shows users (managers, investors, taxpayers, legislators, trustees) how to interpret and analyze accounting information.

Essentials of Advanced Financial Accounting is an up-to-date and highly illustrated presentation of the accounting and reporting principles and procedures used in a variety of business entities. The book is ideal for instructors who have only a single term or semester to teach the core elements of the advanced accounting material that is most frequently represented on the CPA exam; this text contains the essential information on consolidations, multinational entities, partnerships, and governmental and not-for-profit entities. Most one-term courses are unable to cover all the topics included in a traditional comprehensive advanced accounting text. In recognition of time constraints, this text is structured to provide the most efficient use of the time available, while maintaining all the learning support and ancillary materials that cover these essential topics. For students and instructors who would like to cover a wider set of topics, we invite you to examine our comprehensive text, Advanced Accounting, which is now in its ninth edition. The text is highly illustrated with complete presentations of worksheets, schedules, and financial statements so that students can see the development of each topic. Inclusion of all recent FASB and GASB pronouncements and the continuing deliberations of the authoritative bodies provide a current and contemporary text for students preparing for the CPA Examination and current practice. The book's building block approach introduces concepts with simple examples and then gradually introduces complexity, allowing students to easily keep pace with the material.

The Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States Including Dissenting Views

Rev. ed. of: Financial reporting, financial statement analysis, and valuation: a strategic perspective / Clyde P. Stickney, Paul R. Brown, James M. Wahlen. 6th ed.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.
