

Advantages And Disadvantages Of Various Educational Impact

Excerpt from Skew Arches: Advantages and Disadvantages of Different Methods of Construction The author was led to make the investigations contained in this little treatise by a desire to satisfy his own mind as to the relative advantages of several different methods which have been employed in the construction of Skew Arches. The two important points of comparison that naturally suggest themselves to the investigator are: 1st. Relative security; 2d. Relative facility of construction. A discussion and comparison of three modes of construction, with special reference to these points, will be found in the following pages, together with brief descriptions of the manner of making the necessary draughts, patterns, templates, etc. The paper first appeared in Van Nostrand's Engineering Magazine, for which it was written. Fit, Drunk and Smarter has been created to empower college-aged students. The author, a Chicago based fitness professional, "trains" young adults on how to maintain safety and achieve balance in all aspects of daily life. Students learn control over alcohol so it won't control them! Everything from physiological and legal ramifications to caloric realities...the truths behind alcohol consumption are revealed. This book does not promote drinking! Instead it provides students with tools such as a B.A.C. (Blood Alcohol Content) chart to prevent the notorious statistics of bingeing and overdosing on our nation's campuses! Through valuable dietary recommendations and the signature ten minute workout (10 Minute Tone), students are taught how to maintain optimal health while keeping off the "freshman fifteen" for good!

This book presents a comparison analysis of two cancer treatment therapies: carbon ion therapy and protontherapy. It is divided in 5 sections. The first ones gives the reader a brief history of Radiotherapy and types of radiation. In the second section, the techniques and equipments, including new ones in development such as Cyclinac , Laser and DWA, are described. The third section describes biophysical (such as stopping power and LET) and biological (such as RBE and OER) properties, the fundamental experiments and clinical area. The fourth section presents models and the fifth section compares both techniques, showing advantages and disadvantages of each, and their similarities.

Seminar paper from the year 2008 in the subject Business economics - Accounting and Taxes, grade: 2,0, University of Glamorgan, 14 entries in the bibliography, language: English, abstract: Sustainability is developing in as important target for an increasing number of industries and governments. Especially in a faster moving world, which is determined by quarterly period reports, a long term orientation can be a competitive advantage for unlisted companies. In the 1960's by the US Department of Defense began to develop a tool to handle increasing costs. They recognised that the purchase price was not the only important criteria. Training or maintaining costs had to be considered for the total cost calculation, too. However, several definitions of Life cycle costing (LCC) exist that tend to be similar: 'monitoring the cost incurred throughout a product's life cycle' (Woodward, 1997) or 'LCC is the sum of all costs incurred during the life cycle of a building, system or product. It includes the costs of the project, development, acquisition, operation, conservation and maintenance and salvage value if it exists.' (Goralczyk, and Kulczyka, 2005). In the following essay several functions of life cycle costing will be drawn up. Furthermore, advantages, disadvantages and criticism of this procedure will be analysed.

The American Anti-Vivisection Society (AAVS) petitioned the National Institutes of Health (NIH) on April 23, 1997, to prohibit the use of animals in the production of mAb. On September 18, 1997, NIH declined to prohibit the use of mice in mAb production, stating that "the ascites method of mAb production is scientifically appropriate for some research projects and cannot be replaced." On March 26, 1998, AAVS submitted a second petition, stating that "NIH failed to provide valid scientific reasons for not supporting a proposed ban." The office of the NIH director asked the National Research Council to conduct a study of methods of producing mAb. In response to that request, the Research Council appointed the Committee on Methods of Producing Monoclonal Antibodies, to act on behalf of the Institute for Laboratory Animal Research of the Commission on Life Sciences, to conduct the study. The 11 expert members of the committee had extensive experience in biomedical research, laboratory animal medicine, animal welfare, pain research, and patient advocacy (Appendix B). The committee was asked to determine whether there was a scientific necessity for the mouse ascites method; if so, whether the method caused pain or distress; and, if so, what could be done to minimize the pain or distress. The committee was also asked to comment on available in vitro methods: to suggest what acceptable scientific rationale, if any, there was for the mouse ascites method; and to identify regulatory requirements for the continued use of the mouse ascites method. The committee held an open data-gathering meeting during which its members summarized data bearing on those questions. A 1-day workshop (Appendix A) was attended by 34 participants, 14 of whom made formal presentations. A second meeting was held to finalize the report. The present report was written on the basis of information in the literature and information presented at the meeting and the workshop.

Excerpt from An Inquiry into the Various Systems of Political Economy. Their Advantages and Disadvantages, and the Theory Most Favourable to the Increase of National Wealth N O study can be more attractive to a benevolent mind than that which involves the means of providing a plentiful national income, and insuring the happiness of the individual members of the community, by enabling them to obtain the supply of their wants through the exertions of their industry. That commerce is one of the most powerful of those means has long been acknowledged in this country: but that this truth should find an able advocate in France, at a time when her ruler is bent, upon destroying commerce, is a circumstance, as extraordinary as it is honourable, to the author of the Inquiry into the various Systems of Political Economy. The impartiality and the soundness of the views which he displays in his work give it a particular claim to the attention of the English nation: and it is with the view to render its circulation more general, that I have attempted a translation, in which I have aimed at fidelity and perspicuity. Advantages and Disadvantages of Being Different

What differences and similarities exist at work between lesbian women in various careers around the world? Lesbians and Work: The Advantages and Disadvantages of 'Comfortable Shoes' answers this crucial question, providing respected authorities presenting qualitative research methods to closely examine lesbian women's working lives. This insightful resource discusses the variability among lesbians in their experiences of and responses to workplace heteronormativity and cites the similarities among this population across geographical and national boundaries. Presented in their own words, these women's viewpoints reveal a wide spectrum of experiences—both advantages and disadvantages—of being a lesbian woman in the workplace. This book provides international perspectives on lesbians and work that can help readers making career choices to consider sexual orientation issues in choosing their career path. The book also can be used by human resource professionals as a resource to learn how to better manage sexual diversity in the workplace, provide effective training/development programs to address sexual prejudice, alter benefits requirements for employees, and avoid discrimination lawsuits. This book is a valuable resource for human resource managers, college professors in women's studies, lesbian studies, psychology and their students, and career counselors. The book was published as a special issue of the Journal of Lesbian Studies.

Excerpt from The Classification of Religions: Different Methods, Their Advantages and Disadvantages D. Classifications from racial relationships and from actually traceable mutual historical influences (including linguistic and other genealogical schemes). All of these methods of grouping (even those under A) have their value, often a very great one. They only over step their province when they claim to be the sole legitimate method or even the best method. They can at most do what it is possible for a classification to do, viz., illustrate a certain general phase, relationship, tendency, etc. Each must in the nature of the case omit the special advantages of the others; yet through all, the general character of the subject may be seen, just as one can see and recognize the same landscape from different points of view, while in each new standpoint we get new and otherwise impossible impressions. He will know it best who is at pains to view it from all the available points. So in the study of religions, the most varied views should be most welcome, so long as they are not partial, overdrawn, or fantastically colored. Only by various classifications and methods of study is it possible to bring out the manifoldness of the great idea. Early Americans were suspicious of centralized authority and executive power. Casting away the yoke of England and its king, the founding fathers shared in this distrust as they set out to pen the Constitution. Weighing a need for consolidated leadership with a demand for states' rights, they established a large federal republic with limited dominion over the states, leaving most of the governing responsibility with the former colonies. With this dual system of federalism, the national government held the powers of war, taxation, and commerce, and the ability to pass the laws necessary to uphold these functions. Although the federal role has grown substantially since then, states and local governments continue to perform most of the duties in civil and criminal law, business and professional licensing, the management of infrastructure and public services: roads, schools, libraries, sanitation, land use and development, and etc. Despite the critical roles of state and local governments, there is little awareness-or understanding-of the nature and operations of the federal system. This Very Short Introduction provides a concise overview of federalism, from its origins and evolution to the key events and constitutional decisions that have defined its framework. Although the primary focus is on the United States, other federal systems, including Brazil, Canada, India, Germany, Russia, South Africa, Switzerland, and the EU, are addressed.

Seminar paper from the year 2004 in the subject Business economics - Personnel and Organisation, grade: 2,3, University of Tübingen (Fachsprachzentrum Tübingen), course: Business English I, 3 entries in the bibliography, language: English, abstract: Industrial action is any organized action, such as stopping work or refusing to work normally, which aims to obtain better pay and working conditions. It is used to remedy a grievance or to resolve a dispute of any matter of mutual interest between employer and employee. Industrial action can mean a total stoppage of work or a performance of work only partly withheld, e.g. slowing down or insisting on exaggerated observances of work regulations and safety provisions. In this case we speak of a go-slow or a work-to-rule.

There is no doubt that electronic marketing has contributed positively in the life of modern societies, mainly the consuming societies. It allowed purchasing of materials cheaply without any limit, and without any restrictions. It also gave the chance to make a free selection and comparison between the prices of goods at the electronic department stores throughout the Internet. All such facilities are given to the consumers in a very short time without causing them to leave their office or home. In addition, the Electronic Marketing has exterminated the monopoly of goods and materials, all such acts of course are for the consumer's benefit. However, in addition to such advantages there are many disadvantages of such type of marketing; the Electronic Marketing has deleted the privacy of the consumer, because all of his movements through the Internet have been divulged and under control, in addition to lack of exclusive security through the Internet. Accordingly, many losses equally occurred to the customer and the merchant due to such acts of hackers who reveal the information and credit cards details. In addition, the Electronic Marketing caused many merchants, agents and monopolists to be vanquished because it gave the chance for direct communications between the producer and the consumer without passing through them; as such, many of such merchants have been yielded away from the way of this new technology. The Electronic Marketing was able to cause an upset down in many concepts and standards of economic science that have existed for so many years. Doors are still open for every new in this assumption and endless world as there are no limits that can stop such human ambition.

describes various project delivery methods for major airport capital projects. The guidebook also evaluates the impacts, advantages, and disadvantages of these various project delivery methods. The project delivery methods discussed include design-bid-build (DBB), construction manager at risk (CMR), and design-build (DB). The guidebook offers a two-tiered project delivery selection framework that may be used by owners of airport projects to evaluate the pros and cons of each delivery method and select the most appropriate method for their project. Tier 1 is an analytical delivery decision approach that is designed to help the user understand the attributes of each project delivery method and whether the delivery method is appropriate for their specific circumstance. Tier 2 uses a weighted-matrix delivery decision approach that allows users to prioritize their objectives and, based on the prioritized objectives, select the delivery method that is best suited for their project. The report will be helpful to airports with determining the most appropriate project delivery methods (e.g., DBB, DB, or CMR) for various types of airport capital projects.

Seminar paper from the year 2013 in the subject Economics - International Economic Relations, grade: 2,0, University of applied sciences Frankfurt a. M., course: Advanced Business English, language: English, abstract: Globalization is one of the major topics and challenges of our time. It describes the process of the worldwide increasing interconnection of economy, politics, culture and environment. This compression affects individuals, society and institutions as well as countries. It can help to increase prosperity, social justice and global networking in order to make the world more equal. In the following seminar paper, the prime importance will be the look at the effects of globalization on the world economy in general. Despite the advantages of globalization, the negative side with all the disadvantages should not be neglected. Therefore, it is essential to look at the advantages and disadvantages that are created by globalization. The question is to ask, if globalization really has the force to make the world more equal and who are the winners or the losers of it ? The available seminar paper tries to answer that question with a critical analysis of the topic. Chapter two pays attention to the fact what globalization really is and tries to identify the major characteristics of globalization. Chapter three concentrates on the consequences and effects of globalization on the world economy. The fourth chapter tries to identify the advantages and disadvantages. The seminar paper ends with a short result in chapter five, providing a short summary of the whole theme.
