This innovative text is the first to examine the contemporary psychological experience of African Americans through the lens of a positive, strengths-based model. It combats the deficit perspective that has permeated the psychological literature about African Americans by focusing on the strengths that have facilitated their growth and resilience—while also considering existing challenges and struggles. The author examines in depth the

Rethinking How to Build Inclusive Organizations Race, Work, and Leadership is a rare and important compilation of essays that examines how race matters in people's experience of work and leadership. What does it mean to be black in corporate America today? How are racial dynamics in organizations

changing? How do we build inclusive organizations? Inspired by and developed in conjunction with the research and programming for Harvard Business School's commemoration of the fiftieth anniversary of the founding of the HBS African American Student Union, this groundbreaking book shines new light on these and other timely questions and illuminates the present-day dynamics of race in the workplace. Contributions from top scholars, researchers, and practitioners in leadership, organizational behavior, psychology, sociology, and

education test the relevance of long-held assumptions and reconsider the research approaches and interventions needed to understand and advance African Americans in work settings and leadership roles. At a time when--following a peak in 2002--there are fewer African American men and women in corporate leadership roles, *Race, Work, and Leadership* will stimulate new scholarship and dialogue on the organizational and leadership challenges of African Americans and become the indispensable reference for anyone committed to understanding, studying, and

The criminal justice system has driven a wedge between black men

and their children. African American men are involved in the criminal justice system, whether through incarceration, probation, or parole, at near epidemic levels. At the same time, the criminal justice system has made little or no institutional efforts to maintain or support continuing relationships between these men and their families. Consequently, African American families are harmed by this in countless ways, from the psychological, physical, and material suffering experienced by the men themselves, to losses felt by their mates, children, and extended family members. The volume opens with an introduction and brief review by R. Robin Miller, Sandra Lee Browning, and Lisa M. Spruance, outlining the impacts of

incarceration on the African American family. Brad Tripp, explores changes in family relationships and the identity of incarcerated African American fathers. Mary Balthazar and Lula King discuss the loss of the protective effect of marital and nonmarital relationships and its impact on incarcerated African American men, and the implications for African American men and those who work with them in the helping professions. Theresa Clark explores the relationship between visits by family and friends and the nature of inmate behavior. In a research note, Olga Grinstead, Bonnie Faigeles, Carrie Bancroft, and Barry Zack investigate the actual costs families incur to maintain contact with family members, be it emotional,

social, or financial. Patricia E. O'Connor uses data from sociolinguistic interviews of male inmates from a maximum security prison to study how some of these men manage to continue to fulfill the fatherhood role long-distance. In a concluding chapter, Sandra Lee Browning, Robin Miller, and Lisa Spruance focus on actions of the criminal justice system that undermine the black family, on reasons that black male inmate fathers are studied so rarely, and discuss the role restorative justice may play. This insightful volume fills a void in the literature on the role of African American men in the functioning of families. It will be of interest to students of African American studies, social workers, and policy makers.

NATIONAL BOOK CRITICS CIRCLE AWARD WINNER • The first full history of Black America's shocking mistreatment as unwilling and unwitting experimental subjects at the hands of the medical establishment. No one concerned with issues of public health and racial justice can afford not to read this masterful book. "[Washington] has unearthed a shocking amount of information and shaped it into a riveting, carefully documented book." —New York Times From the era of slavery to the present day, starting with the earliest encounters between Black Americans and Western medical researchers and the racist pseudoscience that resulted, Medical Apartheid details the ways both slaves and freedmen were used in hospitals for

experiments conducted without their knowledge—a tradition that continues today within some black populations. It reveals how Blacks have historically been prey to grave-robbing as well as unauthorized autopsies and dissections. Moving into the twentieth century, it shows how the pseudoscience of eugenics and social Darwinism was used to justify experimental exploitation and shoddy medical treatment of Blacks. Shocking new details about the government's notorious Tuskegee experiment are revealed, as are similar, less-well-known medical atrocities conducted by the government, the armed forces, prisons, and private institutions. The product of years of prodigious research into medical journals and experimental reports long

undisturbed, Medical Apartheid reveals the hidden underbelly of scientific research and makes possible, for the first time, an understanding of the roots of the African American health deficit. At last, it provides the fullest possible context for comprehending the behavioral fallout that has caused Black Americans to view researchers—and indeed the whole medical establishment—with such deep distrust.

There is an ongoing debate as to whether African American Studies is a discipline, or multidisciplinary or interdisciplinary field. Some scholars assert that African American Studies use a well-defined common approach in examining history, politics, and the family in the same way as scholars in the disciplines of economics, sociology, and political science. Other scholars consider

Access Free African American Paper Topics

African American Studies multidisciplinary, a field somewhat comparable to the field of education in which scholars employ a variety of disciplinary lenses--be they anthropological, psychological, historical, etc., --to study the African world experience. In this model the boundaries between traditional disciplines are accepted, and researches in African American Studies simply conduct

discipline based an analysis of particular topics. Finally, another group of scholars insists that African American Studies is interdisciplinary, an enterprise that generates distinctive analyses by combining perspectives from different traditional disciplines and synthesizing them into a unique framework of analysis.

The lack of African Americans in leadership roles within the academy creates a real crisis in the leadership pipeline. One of the problems could be that the pathways to leadership for African Americans

are less visible. They can see the end result but may be less clear about how to get there. Oftentimes, understanding these pathways to leadership is less academic in nature and more informal and/or relational. Thus, the relationship between leadership and mentorship for African Americans is especially important to advancing in the academy. Further guidance and understanding of steps to advancement from

At least, there is some agreement that its achievement of institutional acceptance with separate programs, departments, and granting of advanced degrees warrants its treatment as a legitimate field of pursuit in and of itself--but indeed, this is where the agreement ends. On a range of topics, scholars in the field of African-American Studies hold decidedly different opinions. What ought we to include as African-American Studies? By posing the question, "What does the loss of any one life mean to the rest of the nation?" Lowery examines the cumulative effect of decades of racially biased policing in segregated neighborhoods with failing schools, crumbling infrastructure and too few jobs. Studded with moments of joy, and

This volume contains selected papers from the Sixth Conference for African American Researchers in the Mathematical Sciences (CAARMS), held at Morgan State University in Baltimore (MD). The CAARMS organizes this annual conference showcasing the current research primarily, but not exclusively, of African Americans in the mathematical sciences. Since the first conference in 1995, significant numbers of researchers have presented their current work in technical talks, and graduate students have presented their work in organized poster sessions. Research topics include mathematics

(number theory, analysis, topology, differential equations, algebra, combinatorics, etc.), mathematical physics, mathematical biology, operations research, probability and statistics, and computer science. In addition to the invited talks, tutorials and group discussions on various topics are organized to stimulate, nurture, and encourage increased participation by African Americans and other underrepresented groups in the mathematical sciences. These events create an ideal forum for mentoring and networking where attendees can meet researchers and graduate students who are interested in the same fields. Sifting through a wealth of materials, from the colonial era to today, Yacovone reveals the systematic ways in which white supremacist ideology has infiltrated American culture and how it has been at the heart of our collective national identity. And, the author argues that it is the North, not the South, that bears

that have profoundly influenced history and culture by producing the nation's and the world's leaders. The few black students who attended Ivy League schools in the decades following WWII not only went on to greatly influence black America and the nation in general, but unquestionably awakened these most traditional and selective of American spaces. In the twentieth century, black youth were in the vanguard of the black freedom movement and educational reform. Upending the Ivory Tower illuminates how the Black Power movement, which was borne out of an effort to edify the most disfranchised of the black masses, also took root in the hallowed halls of America's most esteemed institutions of higher

education. Between the close of WWII and 1975, the civil rights and Black Power movements transformed the demographics and operation of the Ivy League on and off campus. As desegregators and racial pioneers, black students, staff, and faculty used their status in the black intelligentsia to enhance their predominantly white institutions while advancing black freedom. Although they were often marginalized because of their race and class, the newcomers altered educational policies and inserted blackness into the curricula and culture of the unabashedly exclusive and starkly white schools. This book attempts to complete the narrative of higher education history, while adding a much needed nuance to the history of the

Black Power movement. It tells the stories of those students, professors, staff, and administrators who pushed for change at the risk of losing what privilege they had. Putting their status, and sometimes even their lives, in jeopardy, black activists negotiated, protested, and demonstrated to create opportunities for the generations that followed. The enrichments these change agents made endure in the diversity initiatives and activism surrounding issues of race that exist in the modern Ivy League. Unpending the Ivory Tower not only informs the civil rights and Black Power movements of the postwar era but also provides critical context for the Black Lives Matter movement that is growing in the

streets and on campuses throughout the country today. As higher education continues to be a catalyst for change, there is no one better to inform today's activists than those who transformed our country's past and paved the way for its future.

Retention of African Americans on campus is a burning issue for the black community, and a moral and financial one for predominantly white institutions of higher education. This book offers fresh insights and new strategies developed by fifteen scholars concerned by the new climate in which affirmative action is being challenged and eliminated. This is the first book devoted specifically to retention of African Americans in higher education, and is unique in

addressing the distinct but inter-related concerns of all three affected constituencies: students, faculty and administrators. Each is considered in a separate section. The student section shifts attention from, to paraphrase McNairy, "fixing the student" to focussing on higher education's need to examine and, where appropriate, revise policies, curriculum, support services and campus climate. Responding to the new agenda shaped by the opponents of affirmative action, but rejecting the defensive "x percent solutions" espoused by its proponents, this book puts forward new solutions that will provoke debate. Section II begins with a survey of the literature on African American administrators, and presents a

Delphi study of twelve administrators to provide an understanding of pathways and barriers to success. The contributors then consider the importance of developing community support and creating alliances, the role of mentoring, and the setting of clear expectations between the individual and the institution. Starting with the recognition that African Americans represent less than five percent of full-time faculty, the chapters in the final section examine the effects of the dismantling of affirmative action, the consequences of faculty salaries trailing more lucrative non-academic employment, the declining enrollment of students of color, the politics of promotion and tenure, and issues of identity and
