The entrepreneur is involved in the dance of two questions – what is needed and what is possible. The interplay of these two questions is an ongoing process and innovation varies internationally and regionally, depending on differing legal and policy systems, variations in the development of education and skill development, in social processes and in knowledge transfer. This book explores innovation and networks in entrepreneurship with an interdisciplinary approach, focusing on how old and new knowledge can be combined to produce radical innovation. These chapters combine themes of entrepreneurship, innovation and networks with a specifically European focus, highlighting the wide variations at the national, regional and business level. These variations suggest the need to break with traditional stereotypes about Southern and Northern Europe. The book takes a Schumpeterian perspective, emphasising the importance of looking at the history of entrepreneurship and innovation, paying particular attention to the neglected area of innovation in services within firms.

Managing Disruption & Improving Outcomes by Having Conversations that Really Matter With Foreword by Arie van Bennekum, Co-Author of The Agile Manifesto In Responsive Agile Coaching Niall McShane draws on over a decade of agile coaching experience to document a clear and well-researched model that lifts the lid on how agile coaching actually works. The book starts by defining what the role of agile coach has become in recent times before putting forward a field-tested and theoretically sound model for conducting agile coaching conversations. Packed full of real life stories from authentic coaching work you'll laugh and cry with the characters as you learn what it takes to be one of the best agile coaches in the current market. Drawing from areas such as neuroscience, mindfulness, behavioral psychology and unlearning theory this book is focused on when and how to have conversations that matter with clients during times of change. The central point in the book argues that agile coaches are more than the sum of their competencies; they need to execute the right "moves and steps" during coaching conversations. The model Niall outlines is built around one moment that matters in all agile coaching conversations; Niall calls this the responsive moment. Sensing this moment and responding in a way that best serves the needs of the client and the organization is what the book guides you to be able to do (consistently). The Responsive Agile Coaching model is a dynamic flow-based approach to delivering agile coaching as a service. It dispels the thinking that agile coaching needs to be delivered by a person with the title of agile coach and aims to "open source" it as a skill anyone can develop. This book puts the 'coaching' back into agile coaching by providing a model to balance the agile expert and coaching elements of agile coaching. Responsive Agile Coaching is part theory, part practical guide book and part story telling. The book has been written to cater for readers from all backgrounds who are looking to change the way they work; managers, leaders, change agents as well as agile coaches will find insights and inspiration in this book.
