Mankind comes face to face with extraterrestrial life in this short fiction reprint anthology from Clarkesworld publisher Neil Clarke. They Are Strangers from Far Lands . . . Science fiction writers have been using aliens as a metaphor for the other for over one hundred years. Superman has otherworldly origins, and his struggles to blend in on our planet are a clear metaphor for immigration. Earth’s adopted son is just one example of this “Alien Among Us” narrative. There are stories of assimilation, or the failure to do so. Stories of resistance to the forces of naturalization. Stories told from the alien viewpoint. Stories that use aliens as a manifestation of the fears and worries of specific places and eras. Stories that transcend location and time, speaking to universal issues of group identity and its relationship to the Other. Nearly thirty authors in this reprint anthology grapple both the best and worst aspects of human nature, and they do so in utterly compelling and entertaining ways. Not One of Us is a collection of stories that aren’t afraid to tackle thorny and often controversial issues of race, nationalism, religion, political ideology, and other ways in which humanity divides itself.

There is a terrorist bomb plot being set in motion against London banks: Terrorists have been brought into Britain by the mysterious Mr Smith, who can procure passports as easily as he can do away with people he doesn't care for. But where does the plot start? In Aldershot, an unsuspecting Registrar of Births, Marriages and Deaths, named Sasha, finds herself the target of a man, Kit Hatton, hell-bent on getting some bogus birth certificates from her, by hook or by crook. But by the time the terrorists have found their way into Britain, both Kit and his accomplice, Gary, are dead, and Gary has Sasha's name and address in his back pocket.

This book is designed to engage students' interest and promote their writing abilities while teaching them to think critically and creatively. Dowden takes an activist stance on critical thinking, asking students to create and revise arguments rather than simply recognizing and criticizing them. His book emphasizes inductive reasoning and the analysis of individual claims in the beginning, leaving deductive arguments for consideration later in the course.

“Fascinating. Doidge’s book is a remarkable and hopeful portrait of the endless adaptability of the human brain.”—Oliver Sacks, MD, author of The Man Who Mistook His Wife for a Hat What is neuroplasticity? Is it possible to change your brain? Norman Doidge’s inspiring guide to the new brain science explains all of

this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they’ve transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

This novel follows the amazing journey of Joe Green, a military veteran and DoD engineering contractor who has questions about his own strange experiences and questions about secret technologies which he learns of in his work on black projects. Joe progressively discovers more about amazing Top Secret government research into UFOs and extraterrestrials. Journeying to Area 51, his life is on the line as he, a reporter, and a fellow scientist seek to reveal the truth about the government conspiracy to suppress knowledge of extraterrestrial intervention in our evolution. Will US military security stop them beaming their message to the world? Will Joe Green sacrifice himself to protect humanity? Alien Rapture - written as science-fiction - is based on the life of Edgar A. Fouche - a whistleblower who has disclosed information about the TR3B - an advanced triangular aircraft. He has used a fictionalized story to disclose other information he had been given, while protecting his sources.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

*In one year’s time, two events in the author’s life herald a future of turmoil and tragedy, the aftermath of which he continues to deal with today. At the age of twelve, he had his first drink--a can of beer--in a church parking lot. That summer, he took a job in a bar around the corner from the house he grew up in. He was thirteen. and so began his love affair with alcohol and with bartending. the book traces his descent into alcoholic oblivion as he moved from one bartending job to another. Ironically, he knew he was an alcoholic but failed to understand the meaning of the concept "It's the first drink that gets you drunk." As a consequence, it took him twenty-seven years to face the reality of his disease, but then after almost twenty years of sobriety, he once again*

*“A unique alien invasion story that focuses on the human and the myriad ways we see and don’t see our own world. Mesmerizing.” —Jeff VanderMeer A blend of searing social commentary and speculative fiction, Chana Porter’s fresh, pointed debut explores a strange new world in the wake of a benign alien invasion. Trina FastHorse Goldberg-Oneka is a fifty-year-old trans woman whose life is irreversibly altered in the wake of a gentle—but nonetheless world-changing—invasion by an alien entity called The Seep. Through The Seep, everything is connected. Capitalism falls, hierarchies and barriers are broken down; if something can be imagined, it is possible. Trina and her wife, Deeba, live blissfully under The Seep’s utopian influence—until Deeba begins to imagine what it might be like to be reborn as a baby, which will give her the chance at an even better life. Using Seeptech to make this dream a reality, Deeba moves on to a new existence, leaving Trina devastated. Heartbroken and deep into an alcoholic binge, Trina follows a lost boy she encounters, embarking on an unexpected quest. In her attempt to save him from The Seep, she will confront not only one of its most avid devotees, but the terrifying void that Deeba has left behind. A strange new elegy of love and loss, The Seep explores grief, alienation, and the ache of moving on.*

*World-renowned actress Charlotte Graham's trip to a luxury spa is cut short when she's forced to track a killer in this charming cozy mystery Charlotte Graham is a legend of the silver screen, a bona fide star straight out of the golden age of Hollywood. She has Oscars on her shelf, money in the bank . . .and a knack for solving murders. It’s been a few years since someone put a real bullet in a prop revolver, tricking Charlotte into killing her Broadway costar, but because she found the culprit herself, her friends drop her a line any time they need a sleuth. And Charlotte doesn't mind; compared to the stress of life as a*

Hollywood legend, catching criminals is a breeze. On a cleanse at a friend’s health spa, Charlotte is put on a draconian regimen of health food and clean living. So when a fellow visitor overdoses on barbiturates and drowns, Charlotte suspects foul play. Healthy living is all well and good, but nothing gets a girl’s blood moving like a nice, old-fashioned murder. For fans of Hollywood, Broadway, or old-fashioned glamour, Charlotte Graham is as refreshing as an ice-cold gin martini. This book is a delightful reminder that even the most cunning killer can’t keep a good actress down. Murder at the Spa is the 1st book in the Charlotte Graham Mysteries, but you may enjoy reading the series in any order.

Perfect for fans of Jenny Milchman, Linda Castillo, and Lisa Gardner—the first book in a suspenseful new crime thriller series featuring the tough but haunted police chief Lizzie Snow, a big-city cop with a mission, taking on a small town with a dark side. Moving from Boston to remote Bearkill, Maine, isn’t homicide cop Lizzie Snow’s idea of a step up. But breaking away from tragedy and personal betrayal is at least a step in the right direction. Her dead sister’s fate still torments her, as does her long-missing niece’s disappearance. Lizzie hopes to find the mysteriously vanished child here, amid the coming ice and snow. But in the Great North Woods, something darker and more dangerous than punishing winter is also bound for Bearkill. The town is a world apart in more than distance—full of people who see everything, say little, and know more than they’ll share with an outsider. The only exceptions are the handsome state cop who once badly broke Lizzie’s heart and desperately wants another chance—and Lizzie’s new boss, sheriff Cody Chevrier, who’s counting on her years of homicide experience to help him solve his most troubling case, before it’s too late. A rash of freak accidents and suicides has left a string of dead men—all former local cops. Now the same cruel eyes that watched them die are on Lizzie—and so is the pressure to find out what sort of monster has his hooks in this town, what his ruthless game is, and just how brutally he’ll play to win. Whatever the truth is, its twisted roots lie in the desolate backwoods of Aroostook County: where the desperate disappear, the corrupt find shelter, and the innocent lose everything. It’s there that a cunning and utterly cold-blooded killer plans the fate of the helpless lives at his mercy—one of whom may be the lost child Lizzie will do anything to save. As a blizzard bears down, and Bearkill’s dark secrets claw their way to the surface, Lizzie gears up for a showdown that could leave the deep, driven snow stained blood red. Praise for Winter at the Door “Sarah Graves writes with grace and intelligence, and a love for her state shines through in this stylish debut of a new series set against Maine’s dark and foreboding forests. John Scully was just another busted-up soldier from a score of little-known conflicts, intending to live out his life on the coast of Maine. But that was before he discovered the injured alien craft up on Jacob’s Notch. If it hadn’t been for the baby, maybe he wouldn’t have gotten involved. But the crew was hurt and hungry, with no way to get home.
