NEW YORK TIMES BESTSELLER • The unapologetic, laugh-you-ass-off military memoir both vets and civilians have been waiting for, from a five-tour Army Ranger turned YouTube phenomenon and zealous advocate for veterans Members of the military ’ s special operations branches share a closely guarded secret: They love their job. They relish the opportunity to fight. They are thankful for it, even, and hopeful that maybe, possibly, they ’ ll also get to kill a bunch of bad guys while they ’ re at it. You don ’ t necessarily need to thank them for their service—the pleasure is all theirs. In this hilarious and personal memoir, readers ride shotgun alongside former Army Ranger and private military contractor and current social media phenomenon Mat Best, into the action and its aftermath, both abroad and at home. From surviving a skin infection in the swampy armpit of America (aka Columbus, Georgia) to kicking down doors on the outskirts of Ramadi, from blowing up a truck full of enemy combatants to witnessing the effects of a suicide bombing right in front of your face, Thank You for My Service gives readers who love America and love the good guys fresh insight into what it ’ s really like inside the helmet of the men and women in uniform. It ’ s also a sobering yet steady glimpse at life for veterans after the fighting stops, when the enemy becomes self-doubt or despair and you begin to wonder why anyone should be thanking you for anything, least of all your service. How do you keep going when something you love turns you into somebody you hate? For veterans and their friends and families, Thank You for My Service will offer comfort, in the form of a million laughs, and counsel, as a blueprint for what to do after the war ends and the real fight begins. And for civilians, this is the insider account of military life you won ’ t find anywhere else, told with equal amounts of heart and balls. It ’ s Deadpoet meets Captain America, except one went to business school and one went to therapy, and it ’ s anyone ’ s guess which is which.

**The implementation of a TMS solution is a highly complex and mission critical project. If executed correctly a good TMS can deliver a number of benefits to the organization in terms of optimization, greater efficiency, reduced errors and improved revenue through accurate invoicing. However a number of projects fail to realize these benefits for a host of reasons such as an incorrect product selection, over customization of the system and lack of detailed processes. The evaluation and selection of the right transportation management system is a very critical step in the successful implementation of a TMS product as well as ensuring that the organization is able to realize the benefits expected from the system. Transportation Management with SAP TM 9 is a guide for CIO/COOs evaluating options for various transportation management solutions available in the market and helps inappropriate decision making before investing in the book can help decision makers with product selection and help to create a business case for management approval and design a future roadmap for the organization. The book provides a comprehensive understanding of what SAP transportation management is and is useful for teams involved in TM Implementation and roll outs to ensure preparedness. The book explains end-to-end freight life cycle processes, functional system landscape, implementation challenges and post go-live precautions required to optimize investments in SAP TM. Transportation Management with SAP TM 9 also acts as a step by step implementation guide with details of configuration required to set up a TMS system. This book covers the upgrade of SAP TMS to SAP TM8 which will be useful for existing clients who are a TMS system. Nonavailability of SAP TM skilled resources is a major challenge faced by organizations and the book provides a detailed compliance building plan along with skill set requirements to create a competent and trained workforce for manage-transformation. The current book available in the market on SAP TM is based on Version 6 release which does not cover air freight processes.
