From the moment the baby arrived, it was obvious that he was the boss. The boss baby is used to getting his way - drinks made to order 24/7, his private jet plane, and meetings around the clock. But when his demands aren't getting proper responses, he has to go to new lengths to achieve the attention he deserves. Marla Frazee brings her signature wit and humour - along with adorable illustrations - to a book that explores the effect of one family's very unusual new arrival.

How many daddy hugs does it take to say I love you? Cuddle and count with this hug & read book!

Newbery Medalist Cynthia Rylant and two-time Caldecott Honoree Marla Frazee imagine a God living among us in this spirited and moving collection of illustrated poems. What if God was living a human existence? What might God do to pass the time? Write a fan letter? Get a desk job? Make spaghetti? Take a bath? Get a dog? A sublime book for all ages, God Got a Dog celebrates the simple things in our world while taking a long, close look at what it means to be human. The soft, reflective, and often humorous words and pictures create a glimpse into everyday life through wide and wondering eyes that blends the familiar with the profoundly spiritual. These poems were originally published by HarperCollins without illustrations as part of a larger collection entitled God Went to Beauty School #2083.

Celebrate all of the glittering stars in the sky in this tender Classic Board Book by acclaimed author Mary Lyn Ray and Caldecott Honor winner Marla Frazee! A star is how you know it's almost night. As soon as you see one, there's another, and another. And the dark that comes doesn't feel so dark. What if you could have a star? Look very closely in this lovely Classic Board Book for all kinds of stars both near and far...because stars are everywhere. Not just in the sky.

A guide to understanding the inner workings and outer limits of technology and why we should never assume that computers always get it right. In Artificial Unintelligence, Meredith Broussard argues that our collective enthusiasm for applying computer technology to every aspect of life has resulted in a tremendous amount of poorly designed systems. We are so eager to do everything digitally--hiring, driving, paying bills, even choosing romantic partners--that we have stopped demanding that our technology actually work. Broussard, a software developer and journalist, reminds us that there are fundamental limits to what we can (and should) do with technology. With this book, she offers a guide to understanding the inner workings and outer limits of technology--and issues a warning that we should never assume that computers always get things right. Making a case against technohauvinism--the belief that technology is always the solution--Broussard argues that it's just not true that social problems would inevitably retreat before a digitally enabled Utopia. To prove her point, she undertakes a series of adventures in computer programming. She goes for an alarming ride in a driverless car, concluding "the cyborg future is not coming any time soon"; uses artificial intelligence to investigate why students can't pass standardized tests; deploys machine learning to predict which passengers survived the Titanic disaster; and attempts to repair the U.S. campaign finance system by building AI software. If we understand the limits of what we can do with technology, Broussard tells us, we can make better choices about what we should do with it to make the world better for everyone.

A group biography of seven enduring and beloved games, and the story of why—and how—we play them. Checkers, backgammon, chess, and Go. Poker, Scrabble, and bridge. These seven games, ancient and modern, fascinate millions of people worldwide. In Seven Games, Oliver Roeder charts their origins and historical importance, the delightful arcana of their rules, and the ways their design makes them pleasurable. Roeder introduces thrilling competitors, such as evangelical minister Marion Tinsley, who across forty years lost only three games of checkers; Shusai, the Master, the last Go champion of imperial Japan, defending tradition against “modern rationalism”; and an IBM engineer who created a backgammon program so capable at self-learning that NASA used it on the space shuttle. He delves into the history and lore of each game: backgammon boards in ancient Egypt, the Indian origins of chess, how certain shells from a particular beach in Japan make the finest white Go stones. Beyond the cultural and personal stories, Roeder explores why games, seemingly trivial pastimes, speak so deeply to the human soul. He introduces an early philosopher of games, the aptly named Bernard Suits, and visits an Oxford cosmologist who has perfected a computer that can effectively play bridge, a game as complicated as human language itself. Throughout, Roeder tells the compelling story of how humans, pursuing scientific glory and competitive advantage, have invented AI programs better than any human player, and what that means for the games—and for us. Funny, fascinating, and profound, Seven Games is a story of obsession, psychology, history, and how play makes us human.

From the bestselling author of "Bear Snores On" comes this hilariously illustrated story that teaches young readers the concept of counting from one to five and back again. Full color.

Olivia always knew her younger sister would get into trouble, but she never realized the undercurrents of disaster would grow to a raging flood... Olivia was always the sensible one. The responsible sister. She took after their father, a man as cold and driven as the Cape Cod wind, a man possessed by an inner need to be respected and successful. She would be the one to take over his million-dollar businesses. She would become the unwavering compass and resilient caretaker of the Logan family -- whether she wanted to or not. But Belinda belonged only to herself. Flighty, flirtatious, and possessed of a beauty that promised her a privileged life, Belinda was lavished with attention. Mother and Father, family friends, boys from school, they all adored Belinda. And as she matured into a young woman, her beauty became even more haunting. She vowed never to grow up, to remain forever an enchanting little girl to be worshiped and cared for. Then came that fateful night, when Olivia was awakened by the low whistle of the wind off the ocean...a whistle that became an unearthly wail coming from Belinda's bedroom. It was the tragic night that their father would forbid them to speak of ever again. The night they would never forget. The night that would send generations of Logans down an unavoidable path of lies, deceit, and heartbreak.

From award-winning author Liz Garton Scanlon and celebrated artist Frann Preston-Gannon comes a gorgeously illustrated, lyrical counting book that will have young readers ’ imaginations taking flight. One dark bird is perched up high, with a view of the town and a taste of the sky. Then she ’s joined by two more, then three, then four. Before long, there are hundreds of starlings dancing across the sky—and avoiding a hunting hawk with one of the most spectacular tricks in the animal kingdom. Then, when night comes, the starlings begin to depart, until finally there is just one dark bird perched way up high, with a view of the town and a taste of the sky.
