This book covers the entire field of research in the area of minor tranquillizers and its application to current clinical practice in the treatment of anxiety and insomnia. These drugs are principally the benzodiazepines and related drugs with a similar mechanism of action, such as zolpidem and zopiclone. The molecular mechanism of action of benzodiazepines is described, focussing on the interaction of these drugs with the different isoform of the GABAA^o receptor, and the consequences of this for brain function. Recent advances in this knowledge have provided a framework for defining the physiochemical nature of the interaction between such drugs and their receptor protein, and thus pave the way for the design of new anxiolytic and hypnotic drugs. The animal models available for evaluating the potential of such new therapeutic agents in the treatment of anxiety and insomnia are discussed. Furthermore, understanding of the physiological regulation of the GABAA receptor may provide insights into the aetiopathology of these diseases. The clinical use of benzodiazepines and related drugs in the

treatment of anxiety, insomnia, epilepsy and as anaesthetics are explored. The advantages and limitations of such treatments are discussed, and the impact of drugs evaluated. A chapter is devoted to the issue of independence, the clinical pertinence of tolerance and dependence, and evaluates treatment options that may minimise the risk of dependence.

Southern California is not all sun, sand, and surf in this gripping collection of noir tales from T. Jefferson Parker, Don Winslow, Maria Lima, and others. San Diego is home to miles of beaches, Balboa Park, a world-famous zoo, and some of the country's most expensive home and resort real estate. Yet the city also houses a few items that aren't actively promoted by the visitor's bureau: a number of the country's most corrupt politicians, border-related crimes, terrorists, and the occasional earthquakes. A noir feast! In the fifty-plus years since Raymond Chandler set *Playback* in Esmeralda, his name for La Jolla, the population has grown by more than a million, and crime has proliferated as well. San Diego of the past and the present offers the book's contributors a rich selection of settings, from the cross on Mount Soledad to the piers of Ocean Beach, and perpetrators and victims from the residents of its wealthiest enclaves to the inhabitants of its

Lawrence, Diane Clark & Astrid Bear, Debra Ginsberg, Morgan Hunt, Ken Kuhlken, Taffy Cannon, Don Winslow, Cameron Pierce Hughes, Lisa Brackmann, Gabriel R. Barillas, Gar Anthony Haywood, Luis Alberto Urrea, and Maria Lima.

“When it’s done right, noir is a darkly delicious thrill: smart, sharp-tongued, surprising. The knife goes in at the end with a twist. San Diego Noir, a new 15-story collection by some of the region’s best writers, has all that going for it, and the steady supply of hometown references makes it even more fun.” —The San Diego Union-Tribune

Recent scholarship points to a "new institutionalism" just as recent political developments point to a trend toward democratization. If institutions matter, and if legislatures are the democratic institutions in which the voice of the people speaks, then the organization of legislatures—bi- or unicameral—has important consequences for democracy.

The Buyer's Guide to Sourcing Castings from India provides an independent survey of the casting industry in India and profiles 184 individual foundries that have export

potential. It begins by comparing the Indian scenario to the global scene, devoting particular attention to technologies that already exist in India, from pattern making to moulding, metal preparation, and inspection and testing practices. The guide gives complete consolidated details for various foundries along with contact details (address, phone number, and contact person, names of Chairman/Director, e-mail address and website). It also examines the organizational details of foundries such as type of organization, year of incorporation, range of products, quality certification (ISO/QS, etc.), manpower in various departments, industry sectors catered for, facilities and infrastructure. The guide analyses the key performance indicators of foundries including annual turnover, export figures, products exported and countries exported to. Information is also given on installed and spare capacities of the foundries as well as the weight range of castings handled. Commercial aspects prevailing in the industry are also examined, such as pattern development time, sample submission time and payment terms. There is also important information on the Indian economy including the business climate, economic policies, regulatory environment and taxation as well as on the strengths of the Indian castings industry. Particular attention is given to industry-related logistical issues. This guide will be an essential resource for specialist buyers, importers and consulting companies looking to locate prospective partners for outsourcing their casting requirements from India.

There is a flourishing literature on citizenship education in China that is mostly unknown in the West. Liberal political theorists often assume that only in democracy should citizens be prepared for their future responsibilities, yet citizenship education in China has undergone a number of transformations as the political system has sought to cope with market reforms, globalization and pressures both externally and within the country for broader political reforms. Over the past decade, Chinese scholars have been struggling for official recognition of citizenship education as a key component of the school curriculum in these changing contexts. This book analyzes the citizenship education issues under discussion within China, and aims to provide a voice for its scholars at a time when China's international role is becoming increasingly important.
