This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Intended for introductory and advanced courses in software engineering. The ninth edition of Software Engineering presents a broad perspective of software engineering, focusing on the processes and techniques fundamental to the creation of reliable, software systems. Increased coverage of agile methods and software reuse, along with coverage of 'traditional' plan-driven software engineering, gives readers the most up-to-date view of the field currently available. Practical case studies, a full set of easy-to-access supplements, and extensive web resources make teaching the course easier than ever. The book is now structured into four parts: 1: Introduction to Software Engineering 2: Dependability and Security 3: Advanced Software Engineering 4: Software Engineering Management Timber construction is one of the most prevalent methods of constructing buildings in North America and an increasingly significant method of construction in Europe and the rest of the world. Timber Engineering deals not only with the structural aspects of timber construction, structural components, joints and systems based on solid timber and engineered wood products, but also material behaviour and properties on a wood element level. Produced by internationally renowned experts in the field, this book represents the state of the art in research on the understanding of the material behaviour of solid wood and engineered wood products. There is no comparable compendium currently available on the topic - the subjects represented include the most recent phenomena of timber engineering and the newest development of practice-related research. Grouped into three different sections, 'Basic properties of wood-based structural elements', 'Design aspects on timber structures' and 'Joints and structural assemblies', this book focuses on key issues in the understanding of timber as a modern engineered construction material with controlled and documented properties the background for design of structural systems based on timber and engineered wood products the background for structural design of joints in structural timber systems Furthermore, this invaluable book contains advanced teaching material for all technical schools and universities involved in timber engineering. It also provides an essential resource for timber engineering students and researchers, as well as practicing structural and civil engineers.

A Sunday Times bestseller. Shortlisted for the Wilbur Smith Adventure Writing Prize. Simon Scarrow's veteran Roman soldier heroes face a cunning and relentless enemy in BRITANNIA, the unforgettable fourteenth novel in the bestselling Eagles of the Empire series. Roman Britain, AD 52. The western tribes prepare to make a stand. But can they match the discipline and courage of the legionaries? Wounded Centurion Macro remains behind in charge of the fort as Prefect Cato leads an invasion deep into the hills. Cato's mission: to cement Rome's triumph over the natives by crushing the Druid stronghold. But with winter drawing in, the terrain is barely passable through icy rain and snowstorms. When Macro's patrols report that the natives in the vicinity of the garrison are thinning out, a terrible suspicion takes shape in the battle-scarred soldier's mind. Has the acting Governor, Legate Quintatus, underestimated the enemy? If there is a sophisticated and deadly plan afoot, it's Cato and his men who will pay the price... Includes maps, chart and author Q&A.

The Hotine–Marussi Symposium is the core meeting of a “think thank”, a group scientists in the geodetic environment working on theoretical and methodological subjects, while maintaining the foundations of geodesy to the proper level by corresponding to the strong advancements improved by technological development in the field of ICT, electronic computing, space technology, new measurement devices etc. The proceedings of the symposium cover a broad area of arguments which integrate the foundations of geodesy as a science. The common feature of the papers therefore is not on the object, but rather in the high mathematical standards with which subjects are treated.

'I have a secret. I belong to a club. And my club is the biggest, best kept secret in all of Tokyo. You can call my club the beauty lovers' Club.' Kayo is a young Tokyo housewife and mother. Outwardly, she is no different from other young mothers. But she has a secret. She belongs to a kind of a club. It involves beautiful clothes and accessories and is the most important thing in their lives. The club makes it possible for Kayo to escape the tedium of her life, and to embrace a dazzling new world. But it quickly becomes an obsession, a drug, the way to both paradise and hell. Can she find her way out of the dark underworld of debt, lies and prostitution? Or is she doomed to exchange one form of loneliness for another? A deeply absorbing novel about the 'holes' that suddenly appear in women's lives, My Beautiful Shadow is also a powerful cautionary tale about consumerism gone mad.

Ceramic Transactions, Volume 264, Proceedings of the 12th Pacific Rim Conference on Ceramic and Glass Technology Dileep Singh, Manabu Fukushima, Young-Wook Kim, Kiyoshi Shimamura, Nobuhito Imanaka, Tatsuki Ohji, Jake Amoroso, and Michael Lanagan; Editors This proceedings contains a collection of 32 papers presented at the 12th Pacific Rim Conference on Ceramic and Glass Technology (PacRim12), May 21–26, 2017 in Waikoloa, Hawaii. PacRim is a bi-annual conference held in collaboration with the ceramic societies of the Pacific Rim countries – The American Ceramic Society, The Chinese Ceramic Society, The Korean Ceramic Society, and the Australian Ceramic Society. Topics included in this collection include multiscale modeling and simulation, processing and manufacturing, nanotechnology, multifunctional materials, ceramics for energy and the environment, biomedical materials, and more

This book presents high-quality peer-reviewed papers from the International Conference on Advanced Communication and Computational Technology (ICACCT) 2019 held at the National Institute of Technology, Kurukshetra, India. The contents are broadly divided into four parts: (i) Advanced Computing, (ii) Communication and Networking, (iii) VLSI and Embedded Systems, and (iv) Optimization Techniques.The major focus is on emerging computing technologies and their applications in the domain of communication and networking. The book will prove useful for engineers and researchers working on physical, data link and transport layers of communication protocols. Also, this will be useful for industry professionals interested in manufacturing of communication devices, modems, routers etc. with enhanced computational and data handling capacities.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Celebrated for its atlas-style format, appropriately detailed anatomical illustrations, and exceptionally clear photographs of tissues and cadavers, the Seventh Edition of the award-winning Human Anatomy presents practical applications of anatomy and physiology in a highly visual format. Select Clinical Notes feature dynamic layouts that integrate text with visuals for easy reading. Clinical Cases relate clinical stories that integrate text with patient photos and diagnostic images for applied learning. Time-saving study tools, including end-of-chapter practice and review, help students arrive at a complete understanding of human anatomy. This is the standalone book. If you want the package order: 0321687949 / 9780321687944 Human Anatomy with MasteringA&P Package consists of: 0321688155 / 9780321688156 Human 0321724569 / 9780321724564 Martin's Atlas of the Human Body 0321734890 / 9780321734891 MasteringA&P with Pearson eText Student Access Code Card for Human Anatomy 0321754182 / 9780321754189 Practice Anatomy Lab 3. 0321766296 / 9780321766298 Wrap Card for Human Anatomy with MasteringA&P

Since the invention of the first working laser in 1960, development of these devices has progressed at an unprecedented rate, to the extent that the laser is now a common part of everyday life, from the semiconductor laser used in CD players and telecommunication systems to the high power eximer lasers used in manufacturing processes. *“An electrifying read . . . I haven’t read anything so terrifying since Red Dragon. — Stephen King “Magnificent, thoroughly unnerving . . . I dare you to look away.” — Justin Cronin Caleb Maddox is a San Francisco toxicologist studying the chemical effects of pain. He’s out drinking after a bad breakup when a hauntingly seductive woman sits down at his side. He talks to Emmeline over absinthe, but their encounter is fleeting. She brushes her lips on his ear and disappears. He must find her. As Caleb scours the city, he begins helping the city’s medical examiner with a serial-murder investigation. Soon the search for the killer entwines with Caleb’s hunt for Emmeline, and the closer he gets to each, the more dangerous his world becomes. “A wicked mix of Poe, The Silence of the Lambs, and Vertigo.” The Poison Artist spins a thrilling tale of obsession, damage, a man unmoored by an unspeakable past, and a woman who offers the ultimate escape. “A totally new take on the mystery-thriller genre . . . Fresh and unpredictable. The writing is top-notch . . . Grade: A.” — Cleveland Plain Dealer “Genuinely scary, in the very best way, and nastily twisty, also in the very best way . . . Hypnotic.” — Guardian * William Landay*

What can and can't be copied is a matter of law, but also of aesthetics, culture, and economics. The act of copying, and the creation and transaction of rights relating to it, evokes fundamental notions of communication and censorship, of authorship and ownership - of privilege and property. This volume conceives a new history of copyright law that has its roots in a wide range of norms and practices. The essays reach back to the very material world of craftsmanship and mechanical inventions of Renaissance Italy where, in 1469, the German master printer Johannes of Speyer obtained a five-year exclusive privilege to print in Venice and its dominions. Along the intellectual journey that follows, we encounter John Milton who, in his 1644 Areopagitica speech 'For the Liberty of Unlicensed Printing', accuses the English parliament of having been deceived by the 'fraud of some old patentees and monopolizers in the trade of bookselling' (i.e. the London Stationers' Company). Later revisionary essays investigate the regulation of the printing press in the North American colonies as a provincial and somewhat crude version of European precedents, and how, in the revolutionary France of 1789, the subtle balance that the royal decrees had established between the interests of the author, the bookseller, and the public, was shattered by the abolition of the privilege system. Contributions also address the specific evolution of rights associated with the visual and performing arts. These essays provide essential reading for anybody interested in copyright, intellectual history and current public policy choices in intellectual property. The volume is a companion to the digital archive Primary Sources on Copyright (1450-1900), funded by the UK Arts and Humanities Research Council (AHRC): www.copyrighthistory.org.

“Engineers are titans of real-world problem-solving. . . In this riveting study of how they think, [Guru Madhavan] puts behind-the-scenes geniuses . . . center stage.”—Nature In this engaging account of innovative triumphs, Guru Madhavan examines the ways in which engineers throughout history created world-changing tools, from ATMs and ZIP codes to the digital camera and the disposable diaper. Equal parts personal, practical, and profound, Applied Minds charts a path to a future where we borrow strategies from engineering to find inspired solutions to our most pressing challenges.

This book includes papers presented at the Second International Conference on Electronic Engineering and Renewable Energy (ICEERE 2020), which focus on the application of artificial intelligence techniques, emerging technology and the Internet of things in electrical and renewable energy systems, including hybrid systems, micro-grids, networking, smart health applications, smart grid, mechatronics and electric vehicles. It particularly focuses on new renewable energy technologies for agricultural and rural areas to promote the development of the Euro-Mediterranean region. Given its scope, the book is of interest to graduate students, researchers and practicing engineers working in the fields of electronic engineering and renewable energy.

An excellent source of reference on the current practice of physical modelling in geotechnics and environmental engineering. Volume One concentrates on physical modelling facilities and experimental techniques, soil characterisation, slopes, dams, liquefaction, ground improvement and reinforcement, offshore foundations and anchors, and pipelines. Review every skill and question type needed for SAT success – with eight total practice tests. The Official SAT Study Guide includes eight official SAT(R) practice tests – all of them created by the test maker. As part of the College Board’s commitment to transparency, all practice tests are available on the College Board’s website, but The Official SAT Study Guide is the only place to find them in print along with over 250 pages of additional instruction, guidance, and test information. With guidance and practice problems that reflect the most recent information, this edition takes the best-selling SAT guide and makes it even more relevant and useful. Be ready for the SAT with strategies and up-to-date information straight from the exam writers. The Official SAT Study Guide will help students get ready for the SAT with: – 8 official SAT practice tests, written in the exact same process and by the same team of authors as the actual exam – detailed descriptions of the math and evidenced based reading and writing sections – targeted practice questions for each SAT question type – seamless integration with Official SAT Practice on Khan Academy. Note: The optional SAT Essay is discontinued for weekend SAT.

The Religious Sense, the fruit of many years of dialogue with students, is an exploration of the search for meaning in life. Luigi Giussani shows that the nature of reason expresses itself in the ultimate need for truth, goodness, and beauty. These needs constitute the fabric of the religious sense, which is evident in every human being everywhere and in all times. So strong is this sense that it leads one to desire that the answer to life's mystery might reveal itself in some way.

Il volume, che si rivolge principalmente agli studenti di ingegneria e architettura, presenta le principali nozioni e metodologie della statistica descrittiva (univariata e multivariata) e inferenziale, avendo come obiettivo di fornire le competenze indispensabili per effettuare e presentare diverse tipologie di analisi statistiche. Accanto alla trattazione teorica trovano spazio numerosi esempi ed esercizi, molti di questi svolti utilizzando un software specifico per l’analisi statistica dei dati (SAS).

"Why are there no effective treatments for my condition? Why do researchers exclude patients with primary progressive multiple sclerosis from enrolling in clinical trials? Please let me know if you hear of studies that I might be allowed to enter or treatments that I could try for my condition. " Thus, in recent years, the sad lament of the patient with primary progressive MS (PPMS). This variant, often in the guise of a chronic progressive myelopathy or, less commonly, progressive cerebellar or bulbar dysfunction, usually responds poorly to corticosteroids and rarely seems to benefit to a significant degree from intensive immunosuppressive treatments. In recent years, most randomized clin ical trials have excluded PPMS patients on two counts. Clinical worsening devel ops slowly in PPMS and may not be recognized during the course of a 2-or 3-year trial even in untreated control patients. This factor alone adds to the potential for a type 2 error or, at the very least, inflates the sample size and duration of the trial. In addition, there is mounting evidence that progressive axonal degeneration and neuronal loss (rather than active, recurrent inflammation) may be important components of the pathology in this form of the disease. Although contemporary trials are evaluating whether PPMS patients may benefit from treatment with the --interferons and glatiramer acetate, preliminary, uncontrolled clinical experi ence suggests that the results may not be dramatic.

New Trends in Fuzzy Set Theory and Related Items

Presents new algorithms for determining orbits; ideal for graduate students and researchers in applied mathematics, physics, astronomy and aerospace engineering.

This open access book gathers contributions presented at the International Joint Conference on Mechanics, Design Engineering and Advanced Manufacturing (JCM 2020), held as a web conference on June 2–4, 2020. It reports on cutting-edge topics in product design and manufacturing, such as industrial methods for integrated product and

process design; innovative design; and computer-aided design. Further topics covered include virtual simulation and reverse engineering; additive manufacturing; product manufacturing; engineering methods in medicine and education; representation techniques; and nautical, aeronautics and aerospace design and modeling. The book is organized into four main parts, reflecting the focus and primary themes of the conference. The contributions presented here not only provide researchers, engineers and experts in a range of industrial engineering subfields with extensive information to support their daily work; they are also intended to stimulate new research directions, advanced applications of the methods discussed and future interdisciplinary collaborations.

This book consists of the Student's Book without answers with CD-ROM which contain all the material for the listening activities. It 10 topic-based units which contains speaking activities. The CD-ROM contains skills, grammar, vocabulary and listening exercises.
