A novel of social realism, *The Odd Women* reflects the major sexual and cultural issues of the late nineteenth century. Unlike the "New Woman" novels of the era which challenged the idea that the unmarried woman was superfluous, Gissing satirizes that image and portrays women as "odd" andmarginal in relation to an ideal. Set in a grimy, fog-ridden London, Gissing's "odd" women range from the idealistic, financially self-sufficient Mary Barfoot to the Madden sisters who struggle to subsist in low paying jobs and little chance for joy. With narrative detachment, Gissing portrayscontemporary society's blatant ambivalence towards its own period of transition. Judged by contemporary critics to be as provocative as Zola and Ibsen, Gissing produced an "intensely modern" work as the issues it raises remain the subject of contemporary debate.

*Media Today* uses convergence as a lens that puts students at the center of the profound changes in the 21st century media world. Through the convergence lens they learn to think critically about the role of media today and what these changes mean for their lives presently and in the future. The book's media systems approach helps students to look carefully at how media is created, distributed, and exhibited in the new world that the digital revolution has created. In this way, *Media Today* goes beyond the traditional mass communication textbook's focus on consuming media, to give students an in.

Enron, WorldCom, Global Crossing - the mere mention of these companies brings forth images of scandal, fraud, and large-scale corruption. But do these dark stars in media stories represent a few isolated cases or does their extensive nature of the misconduct provide evidence of a regulatory black hole in the so-called New Economy? In Pump and Dump: The Rancid Rules of the New Economy, Robert H. Tillman and Michael L. Indergaard argue that these scandals represent only the symptoms of corporate governance problem that began in the 1990s as New Economy pundits claimed that advances in technology and forms of business organization were changing the rules. A decade later, it looked more like a case of no rules. Endless revelations fraud in the wake of corporate bankruptcies left ordinary investors bewildered a employees with little or nothing. Parallels and Responses to Curricular Innovation

Immortalizes Damon Runyon in a biography of the Roaring Twenties journalist who covered the Mexican Revolution, World War I, the Lindbergh kidnapping, sports and theater

This volume explores two radical shifts in history and subsequent responses in curricular spaces: the move from oral to print culture during the transition between the 15th and 16th centuries and the rise of the Jesuits, and the move from print to digital culture during the transition between the 20th and 21st centuries and the rise of what the philosopher Jean Baudillard called "hyperreality." The curricular innovation that accompanied the first shift is considered through the rise of the Society of Jesus (the Jesuits). These men created the first "global network" of education, and developed a humanistic curriculum designed to help students navigate a complicated era of the known (human-centered) and unknown (God-centered) universe. The curricular innovation that is proposed for the current shift is guided by the question: What should be the role of undergraduate education become in the 21st century? Today, the tension between the known and unknown universe is concentrated on the interrelationships between our embodied spaces and our digitally mediated ones. As a result, today's undergraduate students should be challenged to understand how—in the objectively focused, commodified, STEM-centric landscape of higher education—the human subject is decentered by the forces of hyperreality, and in turn, how the human subject might be recentered to balance our humanness with the new realities of digital living. Therein, one finds the possibility of posthumanistic education.

**A Biography**

Brian Moore burst upon the literary scene in 1955 with this moving and brilliantly observed study of a woman imprisoned by the passage of time. He went on to be hailed as one of the best fiction writers of his generation. Alone in her room in a Belfast boarding house, Judith Hearne is almost overwhelmed by loneliness. Yet she still believes there is a chance for happiness, and she waits patiently for the moment when her life will turn from sorrowful longing to joy. By chance she meets a man - the man - and her dreams take on a brighter hue, only to be dashed once more. With skill and gentle insight, Moore depicts the disintegration of Judith Hearne' s last illusions. Clinging to the bottle for comfort, she becomes a tragic figure who speaks frankly about the human condition. Though we laugh at her foibles, we weep at her plight, and share her primal longing for love and connection. This touching story was made into a critically acclaimed motion picture in 1987.

"This undergraduate textbook provides students with the information and skills needed to be a well-rounded sports television or radio broadcaster. Students will learn how to write for broadcast, shoot and edit video, and prepare for all the additional tasks needed along the way"--

Offers meditations on cultural memory, race relations, and sexual identity in the South. This collection of poems couples engagements with topics of race and sexuality with reflections on personal and cultural histories.

*A gripping and thought-provoking work that is unlike any Civil War novel previously written, Sharpshooter takes us into the mind of one of the war's veterans as he attempts, years after the conflict, to reconstruct his experiences and to find some measure of meaning in them. A child of the divided East Tennessee mountain region, Willis Carr left home at age thirteen to follow his father and brothers on a bridge-burning mission for the Union cause. Imprisoned at Knoxville, he agreed to join the Confederate army to avoid being hanged and became a sharpshooter serving under General Longstreet. He survived several major battles, including Gettysburg, and eventually found himself guarding prisoners at the infamous Andersonville stockade, where a former slave taught him to read. After the war, haunted by his memories, Carr writes down his story, revisits the battlefields, studies photographs and drawings, listens to other veterans as they tell their stories, and pores over memoirs and other books. Above all, he imbues whatever he hears, sees, and reads with his emotions, his imaginations, and his intellect. Yet, even as an old man nearing death, he still feels that he has somehow missed the war, that something essential about it has eluded him. Finally, in a searing moment of personal revelation, a particular memory, long suppressed, rises to the surface of Carr's consciousness and draws his long quest to a poignant close.*

"This book argues for the emergence of a Tiresian poetics at the end of the nineteenth century. As Victorian and modernist writers reimagined Ovid's tale of sex change and sexual judgment, they also created a poetics that grounded artistic or performative power in figures of sexual difference - most often a feminized, often homosexual malebody, which this study links to the developing discourses of homosexuality and sexual identity."--BOOK JACKET.
