PULITZER PRIZE WINNER • A “vivid and devastating” (The New York Times) portrait of an indomitable girl—from acclaimed journalist Andrea Elliott “From its first indelible pages to its rich and startling conclusion, Invisible Child had me, by turns, stricken, inspired, outraged, illuminated, in tears, and hungering for reimmersion in its Dickensian depths.”—Ayad Akhtar, author of Homeland Elegies **ONE OF THE TEN BEST BOOKS OF THE YEAR:** The New York Times • **ONE OF THE BEST BOOKS OF THE YEAR:** The Atlantic, The New York Times Book Review, Time, NPR, Library Journal In Invisible Child, Pulitzer Prize winner Andrea Elliott follows eight dramatic years in the life of Dasani, a girl whose imagination is as soaring as the skyscrapers near her Brooklyn shelter. In this sweeping narrative, Elliott weaves the story of Dasani’s childhood with the history of her ancestors, tracing their passage from slavery to the Great Migration north. As Dasani comes of age, New York City’s homeless crisis has exploded, deepening the chasm between rich and poor. She must guide her siblings through a world riddled by hunger, violence, racism, drug addiction, and the threat of foster care. Out on the street, Dasani becomes a fierce fighter “to protect those who I love.” When she finally escapes city life to enroll in a boarding school, she faces an impossible question: What if leaving poverty means abandoning your family, and yourself? A work of luminous and riveting prose, Elliott’s Invisible Child reads like a page-turning novel. It is an astonishing story about the power of resilience, the importance of family and the cost of inequality—told through the crucible of one remarkable girl. Winner of the J. Anthony Lukas Book Prize • Finalist for the Bernstein Award and the PEN/John Kenneth Galbraith Award

'Beyond Survival' breaks new ground in the ongoing debate about health finance and financial protection from the costs of health care. The evidence and discussion support the need to consider financial protection, in addition to health status, as a policy objective when setting priorities for health systems. This book reviews the Latin American experience with health reform in the last 20 years and the fundamentals of health system financing, using new evidence to show the magnitude and mechanisms that determine the impoverishing effects of health events (diseases, accidents, and those of the life cycle). It provides options for policy makers on how to protect, and help household to protect themselves,against this impoverishment. The authors use empirical evidence from six case studies commissioned for this report, on Argentina, Chile, Colombia, Ecuador, Honduras, and Mexico. This book provides policy makers with a solid conceptual basis for decisions on the contents of mandatory health insurance benefit packages, choices of financing mechanisms, and the roles of public policy in this field. 'Beyond Survival' provides an in-depth analysis of, and organizational alternatives for, risk pooling and health insurance for financial protection. It analyzes the urgent need to extend risk pooling to the informal sector, the challenges for current social insurance arrangements, and options for policy makers to effectively extend risk pooling to the informal sector.

WINNER OF THE 2021 PULITZER PRIZE FOR FICTION NEW YORK TIMES BESTSELLER WASHINGTON POST, AMAZON, NPR, CBS SUNDAY MORNING, KIRKUS, CHICAGO PUBLIC LIBRARY, AND GOOD HOUSEKEEPING BEST BOOK OF 2020 Based on the extraordinary life of National Book Award-winning author Louise Erdrich’s grandfather who worked as a night watchman and carried the fight against Native dispossession from rural North Dakota all the way to Washington, D.C., this powerful novel explores themes of love and death with lightness and gravity and unfolds with the elegant prose, sly humor, and depth of feeling of a master craftsman. Thomas Wazhashk is the night watchman at the jewel bearing plant, the first factory located near the Turtle Mountain Reservation in rural North Dakota. He is also a Chippewa Council member who is trying to understand the consequences of a new “emancipation” bill on its way to the floor of the United States Congress. It is 1953 and he and the other council members know the bill isn’t about freedom; Congress is fed up with Indians. The bill is a “termination” that threatens the rights of Native Americans to their land and their very identity. How can the government abandon treaties made in good faith with Native Americans “for as long as the grasses shall grow, and the rivers run”? Since graduating high school, Pixie Paranteau has insisted that everyone call her Patrice. Unlike most of the girls on the reservation, Patrice, the class valedictorian, has no desire to wear herself down with a husband and kids. She makes jewel bearings at the plant, a job that barely pays her enough to support her mother and brother. Patrice’s shameful alcoholic father returns home sporadically to terrorize his wife and children and bully her for money. But Patrice needs every penny to follow her beloved older sister, Vera, who moved to the big city of Minneapolis. Vera may have disappeared; she hasn’t been in touch in months, and is rumored to have had a baby. Determined to find Vera and her child, Patrice makes a fateful trip to Minnesota that introduces her to unexpected forms of exploitation and violence, and endangers her life. Thomas and Patrice live in this impoverished reservation community along with young Chippewa boxer Wood Mountain and his mother Juggie Blue, her niece and Patrice’s best friend Valentine, and Stack Barnes, the white high school math teacher and boxing coach who is hopelessly in love with Patrice. In the Night Watchman, Louise Erdrich creates a fictional world populated with memorable characters who are forced to grapple with the worst and best impulses of human nature. Illuminating the loves and lives, the desires and ambitions of these characters with compassion, wit, and intelligence, The Night Watchman is a majestic work of fiction from this revered cultural treasure.

Based on a heart-rending and much discussed series in the Washington Post, this is the story of one woman and her family living in the projects in Washington, D.C. A transcendent piece of writing, it won the Pulitzer Prize and the Robert F. Kennedy Journalism Award. For four years Leon Dash of the Washington Post followed the lives of Rosa Lee Cunningham, her children, and five of her grandchildren, in an effort to understand the persistence of poverty and pathology within America's black underclass. Rosa Lee's life story spans a half century of hardship in the slums and housing projects of Southeast Washington, a stone's throw from the marble halls and civic monuments of the world's most prosperous nation. Yet for all of America's efforts, Rosa Lee and millions like her remain trapped in a cycle of poverty characterized by illiteracy, teenage pregnancy, drugs, and violent crime. Dash brings us into her life and the lives of her family members offering a human drama that statistics can only refer to. He also shows how some people -- including two of Rosa Lee's children -- have made it out of the ghetto, breaking the cycle to lead stable middle-class lives in the mainstream of American society.

In the tradition of The Lost City of Z and Skeletons in the Zahara, Astoria is the thrilling, true-adventure tale of the 1810 Astor Expedition, an epic, now forgotten, three-year journey to forge an American empire on the Pacific Coast. Peter Stark offers a harrowing saga in which a band of explorers battled nature, starvation, and madness to establish the first American settlement in the Pacific Northwest and opened up what would become the Oregon trail, permanently altering the nation's landscape and its global standing. Six years after Lewis and Clark's began their journey to the Pacific Northwest, two of the Eastern establishment's leading figures, John Jacob Astor and Thomas Jefferson, turned their sights to founding a colony akin to Jamestown on the West Coast and transforming the nation into a Pacific trading power. Author and correspondent for Outside magazine Peter Stark recreates this pivotal moment in American history for the first time for modern readers, drawing on original source material to tell the amazing true story of the Astor Expedition. Unfolding over the course of three years, from 1810 to 1813, Astoria is a tale of high adventure and incredible hardship in the wilderness and at sea. Of the more than one hundred-forty members of the two advance parties that reached the West Coast—one crossing the Rockies, the other rounding Cape Horn—nearly half perished by violence. Others went mad. Within one year, the expedition successfully established Fort Astoria, a trading post on the Columbia River. Though the colony would be short-lived, it opened provincial American eyes to the potential of the Western coast and its founders helped blaze the Oregon Trail.

#1 NEW YORK TIMES BESTSELLER • OPRAH’S BOOK CLUB PICK • NATIONAL BOOK AWARD LONGLIST • “An instant American classic and almost certainly the keynote nonfiction book of the American century thus far.”—Dwight Garner, The New York Times The Pulitzer Prize–winning, bestselling author of The Warmth of Other Suns examines the unspoken caste system that has shaped America and shows how our lives today are still defined by a hierarchy of human divisions. NAMED THE #1 NONFICTION BOOK OF THE YEAR BY TIME, ONE OF THE TEN BEST BOOKS OF THE YEAR BY People • The Washington Post • Publishers Weekly AND ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • O: The Oprah Magazine • NPR • Bloomberg • Christian Science Monitor • New York Post • The New York Public Library • Fortune • Smithsonian Magazine • Marie Claire • Town & Country • Slate • Library Journal • Kirkus Reviews • LibraryReads • PopMatters Winner of the Los Angeles Times Book Prize • National Book Critics Circle Award Finalist • Dayton Literary Peace Prize Finalist • PEN/John Kenneth Galbraith Award for Nonfiction Finalist • PEN/Jean Stein Book Award Longlist “As we go about our daily lives, caste is the wordless usher in a darkened theater, flashlight cast down in the aisles, guiding us to our assigned seats for a performance. The hierarchy of caste is not about feelings or morality. It is about power—which groups have it and which do not.” In this brilliant book, Isabel Wilkerson gives us a masterful portrait of an unseen phenomenon in America as she explores, through an immersive, deeply researched narrative and stories about real people, how America today and throughout its history has been shaped by a hidden caste system, a rigid hierarchy of human rankings. Beyond race, class, or other factors, there is a powerful caste system that influences people’s lives and behavior and the nation’s fate. Linking the caste systems of America, India, and Nazi Germany, Wilkerson explores eight pillars that underlie caste systems across civilizations, including divine will, bloodlines, stigma, and more. Using riveting stories about people—including Martin Luther King, Jr., baseball’s Satchel Paige, a single father and his toddler son, Wilkerson herself, and many others—she shows the ways that the insidious undertow of caste is experienced every day. She documents how the Nazis studied the racial systems in America to plan their out-cast of the Jews; she discusses why the cruel logic of caste requires that there be a bottom rung for those in the middle to measure themselves against; she writes about the surprising health costs of caste, in depression and life expectancy, and the effects of this hierarchy on our culture and politics. Finally, she points forward to ways America can move beyond the artificial and destructive separations of human divisions, toward hope in our common humanity. Beautifully written, original, and revealing, Caste: The Origins of Our Discontents is an eye-opening story of people and history, and a reexamination of what lies under the surface of ordinary lives and of American life today.

A NEW YORK TIMES BESTSELLER • The enthralling true story of the rise and reign of O-Six, the celebrated Yellowstone wolf, and the people who loved or feared her. Before men ruled the earth, there were wolves. Once abundant in North America, these majestic creatures were hunted to near extinction in the lower 48 states by the 1920s. But in recent decades, conservationists have brought wolves back to the Rockies, igniting a battle over the very soul of the West. With novelistic detail, Nate Blakeslee tells the gripping story of one of these wolves, O-Six, a charismatic alpha female named for the year of her birth. Uncommonly powerful, with gray fur and faint black ovals around each eye, O-Six is a kind and merciful leader, a fiercely intelligent fighter, and a doting mother. She is beloved by wolf watchers, particularly renowned naturalist Rick McIntyre, and becomes something of a social media star, with followers around the world. But as she raises her pups and protects her pack, O-Six is challenged on all fronts: by hunters, who compete with wolves for the elk they both prize; by cattle ranchers who are losing livestock and have the ear of politicians; and by other Yellowstone wolves who are vying for control of the park’s stunningly beautiful Lamar Valley. These forces collide in American Wolf, a riveting multigenerational saga of hardship and triumph that tells a larger story about the ongoing cultural clash in the West—between those fighting for a vanishing way of life and those committed to restoring one of the country’s most iconic landscapes.

Winner of the 2020 Society of Professors of Education Outstanding Book Award Drawing on personal stories, research, and historical events, an esteemed educator offers a vision of educational justice inspired by the rebellious spirit and methods of abolitionists. Drawing on her life’s work of teaching and researching in urban schools, Bettina Love persuasively argues that educators must teach students about racial violence, oppression, and how to make sustainable change in their communities through radical civic initiatives and movements. She argues that the US educational system is maintained by and profits from the suffering of children of color. Instead of trying to repair a flawed system, educational reformers offer survival tactics in the forms of test-taking skills, acronyms, grit labs, and character education, which Love calls the educational survival complex. To dismantle the educational survival complex and to achieve educational freedom—not merely reform—teachers, parents, and community leaders must approach education with the imagination, determination, boldness, and urgency of an abolitionist. Following in the tradition of activists like Ella Baker, Bayard Rustin, and Fannie Lou Hamer, We Want to Do More Than Survive introduces an alternative to traditional modes of educational reform and expands our ideas of civic engagement and intersectional justice.

"Dispels the myth that people of color are somehow predisposed to poor health, blaming systemic injustice in the health care system." —*New York Times Book Review*
Legendary comedian D.L. Hughley uses his "hilarious yet soul-shaking" (Black Enterprise) humor to confront racism's unjust impact on the health and wellbeing of Blacks and minorities White people love survival guides. But have you noticed they're always about ridiculous activities in locations far from home, with chapters like "How to Survive an Avalanche" or "How to Live on Bugs in the Jungle." Huh?! You know who really needs a survival guide? Black and brown Americans. For surviving their own damn country! Minority populations wake up every day in a battle for their health and safety. Thankfully, legendary activist-comedian D.L. Hughley offers How to Survive America, a fearless satire that exposes racism's unjust toll on our bodies and minds. Even before COVID-19 disproportionately impacted minority communities, life expectancy for Blacks was a full three years less than for white Americans. The very air we breathe is more polluted, our water is more contaminated, our local food options are toxic, and our jobs are underpaid. Despite the obvious need, the quality of our health care is tragically inadequate. Our communities are statistically less safe than the average, and yet we're terrorized by the law-enforcement and criminal-justice systems that are supposed to protect us, sending Blacks to prison at five times the rate of whites. Not least, our means of addressing these injustices—voting—is perennially under assault. It's enough to drive you crazy. Well, guess what? According to Cigna, Blacks are 20 percent more likely to report "psychological distress" yet "50 percent less likely to receive counseling or mental health treatment." It's almost like the entire country has been structured with no regard for our welfare. Hmmm. Whether you're Black, white, brown, or Asian, don't leave home without arming yourself with How to Survive America!

"In discussing a wide array of legal, biological, and sociocultural definitions, Eva Garroutte documents how these have frequently been manipulated by the federal government, by tribal officials, and by Indian and non-Indian individuals to gain political, social, or economic advantage. Whether or not one agrees with her solutions, anyone seriously concerned with contemporary American Indian issues should read this book."—Garrick Bailey, editor of *The Osage and the Invisible World*
"Real Indians is a remarkably candid, engaging, and compelling book. It tells the important and often controversial story of how 'Indian-ness' is negotiated in American culture by indigenous peoples, policy makers, and scholars."—Robert Wuthnow, author of *Creative Spirituality*
"Eva Marie Garroutte has done an exemplary job of combining scholarly sources, personal accounts, interview data, and self-reflection to catalog and examine the ways in which individual and collective identities are asserted, negotiated, and revitalized. She invites readers to imagine an intellectual space where scholarly and traditional ways of knowing and telling come face to face in an epistemological landscape where the 'traditions' of social science and 'radical indigenism' can confront one another in constructive dialogue."—Joane Nagel, author of *Race, Ethnicity, and Sexuality*

Named as a 2020 Book of the Year by The Times Literary Supplement
Survival Is a Style, Christian Wiman's first collection of new poems in six years, may be his best book yet. His many readers will recognize the musical and formal variety, the voice that can be tender and funny, credibly mystical and savagely skeptical. But there are many new notes in this collection as well, including a moving elegy to the poet's father, sharp observations and distillations of modern American life, and rangy poems that merge and juxtapose different modes of speech and thought. The cumulative effect is extraordinary. Reading Survival Is a Style, one has the sense one is encountering work that will become a permanent part of American literature.

"A powerful, poetic memoir about what it means to exist as an indigenous woman in America, told in snapshots of the author's encounters with gun violence--for readers of Jesmyn Ward and Terese Marie Mailhot. Toni Jensen grew up in the Midwest around guns: As a girl, she learned how to shoot birds with her father, a card-carrying member of the NRA. As an adult, she's had guns waved in her face in the fracklands around Standing Rock, and felt their silent threat on the concealed-carry campus where she teaches. And she has always known she is not alone. As a Mætis woman, she is no stranger to the violence enacted on the bodies of indigenous women, on indigenous land, and the ways it is hidden, ignored, forgotten. In Carry, Jensen maps her personal experience onto the historical, exploring how history is lived in the body and redefining the language we use to speak about violence in America. In the title chapter, Jensen recalls the discrimination she faced in college as a Native American student from her roommate to her faculty adviser. "The Worry Line" explores the gun and gang violence in her neighborhood the year her daughter was born. "At the Workshop" focuses on her graduate school years, during which a classmate repeatedly wrote stories in which he killed thinly veiled versions of her. In "Women in the Fracklands," Jensen takes the reader inside Standing Rock during the Dakota Access pipeline protests, as well as the peril faced by women, in regions overcome by the fracking boom. In prose at once forensic and deeply emotional, Toni Jensen shows herself to be a brave new voice and a fearless witness to her own difficult history--as well as to the violent cultural landscape in which she finds her coordinates as a Native American woman. With each chapter, Carry reminds us that surviving in one's country is not the same as surviving one's country"--

To save both democracy and a decent economy, here's why it's crucial that Americans elect a truly progressive president. The 2020 presidential election will determine the very survival of American democracy. To restore popular faith in government—and win the election—Democrats need to nominate and elect an economic progressive. The Stakes explains how the failure of the economy to serve ordinary Americans opened the door to a demagogic president, and how democracy can still be taken back from Donald Trump. Either the United States continues the long slide into the arms of the bankers and corporate interests and the disaffection of working Americans—the course set in the past half century by Republican and Democratic presidents alike—or we elect a progressive Democrat in the mold of FDR. At stake is nothing less than the continued success of the American experiment in liberal democracy. That success is dependent on a fairer distribution of income, wealth, and life changes —and a reduction in the political influence of financial elites over both parties. The decay of democracy and economic fairness began long before Trump. The American republic is in need of a massive overhaul. It will take not just a resounding Democratic victory in 2020 but a progressive victory to pull back from the brink of autocracy. The Stakes demonstrates how a progressive Democrat has a better chance than a centrist of winning the presidency, and how only this outcome can begin the renewal of the economy and our democracy. A passionate book from one of America's best political analysts, The Stakes is the book to read ahead of the 2020 primaries and general election.

As consumerism and a meat-heavy, processed diet become the norm and the world's population continues to grow at an exponential rate, more and more people are looking toward a more sustainable path for food. Authors Douglas Boudreau and Mykel Hawke believe that the future of food lies in the wild foods of times spanning back to before the mass-agriculture system of today. People have become distanced from the very systems that provide their food, and younger generations are increasingly unable to identify even the trees in their backyards. In response, Boudreau and Hawke have provided a compendium of wild edible plants in North America. Foraging for Survival is a comprehensive breakdown of different plant species from bearded lichen to taro, and from all over the United States. There are also tips for growing local native plants in the backyard to facilitate learning and enhance table fare at home. In this profound study of America's persistent racial divide, Molefi Kete Asante, one of our leading scholars of African American history and culture, discusses the festering issue of systemic racism. As Asante makes clear, America continues to be a nation of two peoples with very different histories and perspectives - a white majority that mainly perceives a land of promise and a black minority very much aware that too many African Americans are still consigned to a ghetto wilderness on the margins of society. Despite the legal and social progress of African Americans since the Civil Rights movement of the 1950s and 1960s, the bitter legacy of slavery and subsequent racial injustice continues to haunt American society. Asante pinpoints the greatest source of frustration and anger among African Americans in recent decades: what he calls "the wall of ignorance" that attempts to hide the long history of racial injustice from public consciousness. This is most evident in each race's differing perspectives on racial matters. Though most whites view racism as a thing of the past, a social problem largely solved by the Civil Rights movement, blacks continue to experience racism in many areas of social life: encounters with the police; the practice of red lining in housing; difficulties in getting bank loans, mortgages, and insurance policies; and glaring disparities in health care, educational opportunities, unemployment levels, and incarceration rates. Though such problems are not expressions of the overt racism of legal segregation and lynch mobs - what most whites probably think of when they hear the word "racism" - their negative effect on black Americans is almost as pernicious. Such daily experiences create a lingering feeling of resentment that percolates in a slow boil till some event triggers an outburst of rage, like the Los Angeles riots of 1992. Only then does the majority start to pay attention. Asante argues that America cannot long continue as a cohesive society under these conditions. As we embark upon the new century, he urges more public focus on redressing the wrongs of the past and their continuing legacy. Above all, he thinks that Americans must seriously consider some system of reparations to deal with both past and present injustices, an apology, and our own truth-and-reconciliation committee that addresses both the history of slavery and present-day racism. Only in this way, he feels, can we ever hope to heal the racial divide that never seems to be erased. This is a powerful, deeply perceptive analysis of a crucial social problem by one of America's leading thinkers on race.

" Serves as a model of what a state-level survey of the Civil War can achieve. . . . a potent combination of description and analysis. " —The Civil War Monitor
Connecticut in the American Civil War offers a remarkable window into the state ' s involvement in a conflict that challenged and defined the unity of a nation. The arc of the war is traced through the many facets and stories of battlefield, home front, and factory. Matthew Warshauer masterfully reveals the varied attitudes toward slavery and race before, during, and after the war; Connecticut ' s reaction to the firing on Fort Sumter; the dissent in the state over whether or not the sword and musket should be raised against the South; the raising of troops; the sacrifice of those who served on the front and at home; and the need for closure after the war. This book is a concise, amazing account of a complex and troubling war. No one interested in this period of American history can afford to miss reading this important contribution to our national and local stories.

"10 clinically proven strategies from the leading experts on pain management--Cover"

Over the last thirty years, conservative evangelicals have been moving to the Northwest of the United States, where they hope to resist the impact of secular modernity and to survive the breakdown of society that they anticipate. These believers have often given up on the politics of the Christian Right, adopting strategies of hibernation while developing the communities and institutions from which a new America might one day emerge. Their activity coincides with the promotion by prominent survivalist authors of a program of migration to the "American Redoubt," a region encompassing Idaho, Montana, parts of eastern Washington and Oregon, and Wyoming, as a haven in which to endure hostile social change or natural disaster and in which to build a new social order. These migration movements have independent origins, but they overlap in their influences and aspirations, working in tandem to offer a vision of the present in which Christian values must be defended as American society is rebuilt according to biblical law. This book examines the origins, evolution, and cultural reach of this little-noted migration and considers what it might tell us about the future of American evangelicalism. Drawing on Calvinist theology, the social theory of Christian Reconstruction, and libertarian politics, these believers are projecting significant soft power. Their books are promoted by leading mainstream publishers and listed as New York Times bestsellers. Their strategy is gaining momentum, making an impact in local political and economic life, while being repackaged for a wider audience in publications by a broader coalition of conservative commentators and in American mass culture. This survivalist evangelical subculture recognizes that they have lost the culture war - but another kind of conflict is beginning.

""Political Survival" is that rarest of books in comparative politics: a theoretically innovative work with an empirical, cross-national focus. Apart from its evident technical and conceptual polish, the book is a good read. "Political Survival" raises the ante in comparative studies of public policy by bringing sophisticated, systematic thinking to the analysis of decision-making in the Third World."--Peter McDonough, University of Michigan

America was founded on certain First Principles which are the critical underpinnings of our free society: the rule of law, unalienable rights, equality, the Social Compact, and limited government. Supported by extensive research and fuelled by a true passion and respect for the profound vision of America's Founding Fathers, Michael Warren proves how they have guided us in our journey to become the greatest and most free nation in the world. He exposes how our knowledge of our principles and history has eroded to the point of near non-existence--and that this is a threat to our survival much more serious than what may come to us from outside our borders. Warren proposes thoughtful and needed reforms to enable America to rise above the impending doom from within and reclaim the greatness envisioned by the Founding Fathers.

In this thrilling novel in A. American's Survivalist series, a man learns that in a world with no rules, the strength of family is the only thing that can pull you through. When society ceases to exist, who can you trust? After the collapse of the nation's power grid, America is under martial law—and safety is an illusion. As violence erupts around him, Morgan Carter faces one of his most difficult decisions yet: whether to stay and defend his home, or move to a more isolated area, away from the prying eyes of the government. He and his family are hesitant to leave their beloved Lake County, but with increasingly suspicious activities happening in a nearby refugee camp, all signs point towards defecting. Morgan and his friends aren't going to leave without a fight, though—and they'll do anything to protect their freedoms.

Survival Math

Hunting, Trapping, Woodwork, and More

“A vibrant memoir of race, violence, family, and manhood...a virtuosaic wail of a book” (The Boston Globe), Survival Math calculates how award-winning author Mitchell S. Jackson survived the Portland, Oregon, of his youth. This “spellbinding” (NPR) book explores gangs and guns, near-death experiences, sex work, masculinity, composite fathers, the concept of “hustle,” and the destructive power of addiction—all framed within the story of Mitchell Jackson, his family, and his community. Lauded for its breathtaking pace, its tender portrayals, its stark candor, and its luminous style, Survival Math reveals on every page the searching intellect and originality of its author. The primary narrative, focused on understanding the antecedents of Jackson’s family’s experience, is complemented by survivor files, which feature photographs and riveting short narratives of several of Jackson’s male relatives. “A vulnerable, sobering look at Jackson’s life and beyond, in all its tragedies, burdens, and faults” (San Francisco

Chronicle), the sum of Survival Math’s parts is a highly original whole, one that reflects on the exigencies—over generations—that have shaped the lives of so many disenfranchised Americans. “Both poetic and brutally honest” (Salon), Mitchell S. Jackson’s nonfiction debut is as essential as it is beautiful, as real as it is artful, a singular achievement, not to be missed.

A devastating cyber-attack.A deadly winter storm. And a lone man who will stop at nothing to save his familyThe largest snowstorm in a hundred years is barreling down on the northern United States. Like millions of others, ex-cop Nate Bauer and his family are bracing for the coming storm, unaware that it will test them in ways they could never have imagined. For hidden deep within the malignant code lies an even greater threat. One that holds the potential to destroy America forever.In the end, only a single question will matter. When the lights go out for good, who will have what it takes to survive?

Whether you’re a hiker taking a walk through your local wilderness, or a chef looking for new ingredients to incorporate in your dishes, Foraging for Survival is the book for you. As consumerism and a meat-heavy, processed diet become the norm and the world’s population continues to grow at an exponential rate, more and more people are looking toward a more sustainable path for food. Authors Douglas Boudreau and Mykel Hawke believe that the future of food lies in the wild foods of times spanning back to before the mass-agriculture system of today. People have become distanced from the very systems that provide their food, and younger generations are increasingly unable to identify even the trees in their backyards. In response, Boudreau and Hawke have provided a compendium of wild edible plants in North America. Foraging for Survival is a comprehensive breakdown of different plant species from bearded lichen to taro, and from all over the United States. There are also tips for growing local native plants in the backyard to facilitate learning and enhance table fare at home. Other information you’ll find inside: A list of different types of edible wild plants Foraging techniques Bugs and other grubs that can be consumed Warning signs of poisonous plants And much more! An authentic, rich tapestry of women's lives in colonial America Using a host of primary sources, author Brandon Marie Miller recounts the roles, hardships, and daily lives of Native American, European, and African women in 17th- and 18th-century colonial America. Hard work proved a constant for most women—they ensured their family's survival through their skills while others sold their labor or lived in bondage as indentured servants and slaves. Elizabeth Ashbridge survived an abusive indenture to become a Quaker preacher, Anne Bradstreet penned epic poetry while raising eight children in the wilderness, Anne Hutchinson went toe-to-toe with Puritan authorities, Margaret Hardenbroeck Philipse built a trade empire in New Amsterdam, and Martha Corey lost her life in the vortex of Salem's witch hunt. With strength, courage, resilience, and resourcefulness, these women and many others played a vital role in the mosaic of life in colonial America.

"This book's great service is that it challenges us to consider the ways in which our institutions and systems, and the assumptions, positions and divisions that undergird them, leave us ill prepared for the next crisis."—Robert Rubin, The New York Times Book Review "Full of valuable insight and telling details, this may well be the best thing to read if you want to know what happened in 2020." --Paul Krugman, New York Review of Books Deftly weaving finance, politics, business, and the global human experience into one tight narrative, a tour-de-force account of 2020, the year that changed everything--from the acclaimed author of Crashed. The shocks of 2020 have been great and small, disrupting the world economy, international relations and the daily lives of virtually everyone on the planet. Never before has the entire world economy contracted by 20 percent in a matter of weeks nor in the historic record of modern capitalism has there been a moment in which 95 percent of the world's economies were suffering all at the same time. Across the world hundreds of millions have lost their jobs. And over it all looms the specter of pandemic, and death. Adam Tooze, whose last book was universally lauded for guiding us coherently through the chaos of the 2008 crash, now brings his bravura analytical and narrative skills to a panoramic and synthetic overview of our current crisis. By focusing on finance and business, he sets the pandemic story in a frame that casts a sobering new light on how unprepared the world was to fight the crisis, and how deep the ruptures in our way of living and doing business are. The virus has attacked the economy with as much ferocity as it has our health, and there is no vaccine arriving to address that. Tooze's special gift is to show how social organization, political interests, and economic policy interact with devastating human consequences, from your local hospital to the World Bank. He moves fluidly from the impact of currency fluctuations to the decimation of institutions--such as health-care systems, schools, and social services--in the name of efficiency. He starkly analyzes what happened when the pandemic collided with domestic politics (China's party conferences; the American elections), what the unintended consequences of the vaccine race might be, and the role climate change played in the pandemic. Finally, he proves how no unilateral declaration of "independence" or isolation can extricate any modern country from the global web of travel, goods, services, and finance.

Millions of low-income African Americans in the United States lack access to health care. How do they treat their health care problems? In Health Care Off the Books, Danielle T. Raudenbush provides an answer that challenges public perceptions and prior scholarly work. Informed by three and a half years of fieldwork in a public housing development, Raudenbush shows how residents who face obstacles to health care gain access to pharmaceutical drugs, medical equipment, physician reference manuals, and insurance cards by mobilizing social networks that include not only their neighbors but also local physicians. However, membership in these social networks is not universal, and some residents are forced to turn to a robust street market to obtain medicine. For others, health problems simply go untreated. Raudenbush reconceptualizes U.S. health care as a formal-informal hybrid system and explains why many residents who do have access to health services also turn to informal strategies to treat their health problems. While the practices described in the book may at times be beneficial to people's health, they also have the potential to do serious harm. By understanding this hybrid system, we can evaluate its effects and gain new insight into the sources of social and racial disparities in health outcomes.
