

American Ephemeris For The 21st Century At Noon

Since the 1976 publication of his first version of *The American Ephemeris, 1931-1980*, Neil F. Michelsen's ground-breaking series of ephemerides have consistently set standards for accuracy in astrology, becoming indispensable to astrologers worldwide at every level from student to professional. The tradition continues with this Revised & Expanded Third Edition of *The American Ephemeris for the 21st Century, 2000-2050 at Noon*. Revisions and additions are programmed by Rique Pottenger, who became head programmer for ACS Publications after Michelsen's passing. Additions and improvements include new Jet Propulsion Laboratory data and programming refinements that enable finding double ingresses in a single day plus more accurate station times. A new formula increases the accuracy of the Galactic Center. Phenomena in the Astro Data section are now sorted by time as well as by date, and R appears with Planetary Ingress Data if a planet is retrograde when it ingresses. The most notably obvious additions in this new edition include the dwarf planet Ceres in daily longitude listings between Mars and Jupiter, and monthly positions are given for Eris, Chiron, Pallas, Juno and Vesta.

This book shows how the discovery of the asteroids Ceres, Pallas Athena, Juno, and Vesta coincided with the shift of a woman. The creating, supporting, nurturing aspect held by the goddess Ceres, the universal mother, brings us to how we feel nurtured and how we function with our roles of mother-child. She embodies the principle of unconditional love. Pallas Athena is our Warrior Goddess, a woman in a man's world, carrying the principle of creative intelligence. Vesta, our goddess of Focus and Commitment, is our High Priestess. Juno, the Queen of Heaven and Divine Consort, is our capacity for meaningful relationships. Understanding the themes that each goddess holds enriches our understanding of that function and expression in our lives.

"*The American Ephemeris for the 20th Century at Noon*" was recently updated with the very latest data from the Jet Propulsion Laboratory -- the most accurate ephemeris in the world today! It includes solar and lunar eclipses; aspectation of Jupiter through Pluto; Chiron, Synetic Vernal Point; Moon phases and more.

God is Me: The Path to Enlightenment Through Self-reflection

What's Your Astrostyle? From Dating to Dressing to Discovering Your Dreams Will a Leo-Scorpio match spawn a royal rumble or a sweet success? Why do some Tauruses seem more in love with their reflections than with you? Which clothes will maximize your sign's mojo and which will prompt the fashion police to put you under house arrest? Dishing the hottest advice under the sun signs, AstroTwins Tali & Ophira Edut -- the official astrologers for Teen People -- will guide you through the wild world of relationships, personal style, and everyday life -- with glamour, style, and a pinch of celebrity stardust. Spicing their savvy advice with insights into pop icons like J. Lo (a classic Leo megastar), Josh Hartnett (a sensitive Cancer boy), and Britney Spears (a feisty Sagittarius), the AstroTwins cover the whole universe of teen experience, including: Love: How to make any astro relationship last -- and how to end it fast Fashion: Cosmic wardrobe hints, custom-made for your sign Livin' it up: Tips on picking friends, managing your issues, and finding a favorite hangout Destiny: How the stars can guide you to fame, fortune, and figuring it all out

Now back in print, this splendid and complete reference work from the late Neil F. Michelsen's best-selling American Ephemeris series offers daily tables of planetary positions in the Sidereal Zodiac from 2001-2025 in. This volume, especially sought by anyone who studies the Sidereal Zodiac as used in Western astrology, uses the Synetic Vernal Point of the Fagan-Bradley school. Includes to-the-second listings of planetary longitudes, plus right ascension and declination, all lunar and planetary sign ingresses into new Sidereal sectors, Moon at both midnight and noon, exact time of direct/retrograde stations, true lunar node, and more. An introductory article by James A. Eshelman and Kenneth Irving discusses the sidereal zodiac and the use of this valuable ephemeris.

A new full 21st century ephemeris, fully updated from prior versions of The American Ephemeris series with the most recent available data, including the addition of Ceres to the daily planet lineup and Eris, plus the asteroids Pallas, Juno and Vesta to the monthly positions, that also include Chiron and an improved calculation for Galactic Center, plus other refinements of data such as the ability to find double ingresses on a single day and more accurate station times. This book is dedicated to its originator Neil F. Micheslen, and includes his chart, memorial text from his writings and commentary from others capsulizing the early development of computer technology for astrology.

The New American Ephemeris for the 20th Century, 1900 to 2000, at Noon

Featuring Longitudes and Declinations for the Sun, Moon, Planets, Chiron and the Asteroids

The American Ephemeris for the 21st Century at Noon

Great Conjunctions- Shifting Times

A Workbook for Beginners

Astrologers worldwide made the late Neil F. Michelsen's American Ephemeris series best sellers. In 2006, Rique Pottenger revised and updated Michelsen's earlier work with *The New American Ephemeris for the 21st Century 2000-2100 at Midnight*, complete with newly named planets Ceres and Eris, plus much more. Now, following the debut of the big full century book, astrologers will find this new, lightweight 14-year version a "must have!" In easy -to-scan 8.25 x 11 format, it has all the new features of its forerunner and even more. For each month you'll also find a daily Declination and Latitude Table and a detailed Daily Aspectarian. Both Ceres and Chiron are included in daily longitude positions, and in the aspectarian. In Declination and Latitude, Sun through Saturn (including Ceres) are given daily, with Chiron, Uranus, Neptune, Pluto, Pallas, Juno, Vesta and Eris in 5 day increments.

OVER HALF A MILLION COPIES SOLD! This is the classic guide to astrological history, legend, and practice! Readers will enjoy simple, computer-accurate planetary tables that allow anyone born between 1900 and 2100 to pinpoint quickly their sun and moon signs, discover their ascendants, and map out the exact positions of the planets at the time of their birth. In addition to revealing the planets' influence on romance, health, and career, *The Only Astrology Book You'll Ever Need* takes a closer look at the inner life of each sign. Celebrated astrologer Joanna Martine Woolfolk offers abundant insights on the personal relationships and emotional needs that motivate an individual, on how others perceive astrological types, and on dealing with the negative aspects of signs. Readers will also welcome the inclusion of new discoveries in astronomy. Lavishly illustrated and with an updated design, this new edition is an indispensable sourcebook for unlocking the mysteries of the cosmos through the twenty-first century and beyond.

"*The American Ephemeris For The 21st Century at Midnight*" contains ephemeris data for the first 50 years of the 21st century. The millennium is almost here, and it's time to look ahead.

Reading the Planets through Capital, Power, and Labor

The Astrolabe World Ephemeris, 2001-2050 at Midnight

The Michelsen Book of Tables combines two prior books, *The American Book of Tables* and *The Koch Book of Tables*, into one volume that contains tables for both Placidus and Koch house systems, *Tables of Diurnal Motion to minimize math calculations*, *Time Zones of the World (names and hours from Greenwich)*, *Solar-Sidereal Time Correction*, *Time Correction for Longitude log tables*, *Universal to Ephemeris Time Correction (Delta T)*, various interpolation tables and more. Also included is an extensive list of major USA and international cities with longitudes and latitudes, such that with this book and your ephemeris you can calculate precise planetary positions and correct house cusps for a great many locations. Add *The American Atlas* or *The International Atlas* plus your American Ephemeris or New American Ephemeris for the years needed, and you're equipped to do accurate charts for anywhere in the world. A special bonus section "How to Cast a Natal Horoscope," by Rob Hand and Joshua Brackett, offers complete step-by-step instructions on erecting a horoscope, painlessly and accurately, plus explanations of tables and of the Koch and Placidus house systems and how each is derived. An understanding of horoscope calculation is highly useful even for those who use computer software to produce charts because one is then aware when a chart is wrong though that occasional error in data entry. Also, chart calculation is an essential skill for those seeking professional certification in astrology.

The perennial fascination with astrology is as strong today as it has ever been. Nicholas Campion, probably most well-known for his astrological columns in national newspapers such as the Daily Mail, applies his wealth of experience and substantial expertise as a teacher taking the reader through the steps involved in the calculation and interpretation of birth charts. He then explains in straightforward language the basic predictive techniques and the methods used for comparing two charts. *The Ultimate Astrologer* is unique in that it also covers--The answering of specific questions (horary astrology)--The selection of auspicious moments to begin new enterprises--Health, healing and relationships--Gardening and agriculture, business and finance--History and politics (including the Age of Aquarius)--Science and Chinese astrologyThe handy tables at the back of the book are specially commissioned for ease of use, enabling the reader to work out horoscopes for family members, friends and colleagues. Sales Points--This beautiful book demonstrates that there's far more to astrology than reading people's charts. Its main strength is in showing the vastness of the terrain.' Rob Hand, author of *Planets in Transit--The author's style is exemplary. The sentences are simple, their mood light and clear. A good and much needed book, recommended, without reservation.* 'Astrology Quarterly--A new edition of Nicholas Campion's unparalleled text *The Practical Astrologer* which has sold over 100,000 copies, revised and updated for the twenty-first century

THE AMERICAN EPHEMERIS FOR THE 21ST CENTURY AT MIDNIGHT 2000-2050, 2E, is the most essential (#1) astrological reference book. Daily planetary positions from 2000-2050, moon phases, eclipses, void of course times, aspects, direct and retrograde station times, and "astrological weather" are included.

Temperament - Astrology's Forgotten Key

The Only Astrology Book You'll Ever Need

This specialized reference work from the late Neil F. Michelsen's best-selling American Ephemeris series provides the heliocentric planetary data that is considered especially valuable for astrologers researching planetary cycles for financial markets. It covers the years 2001-2050, and is based on Jet Propulsion Laboratory data. Included are daily longitude positions of Mercury, Venus, Earth and Mars to 1 minute of arc and longitudes for Jupiter, Saturn, Uranus, Neptune and Pluto to 1/10 of a minute of arc. Also provided: latitudes, perihelia, aphelia, monthly heliocentric north nodes and radius vector, plus a complete daily aspectarian. The Introduction, an informative article on heliocentric technique and its uses, is by renowned astrologer Robert Hand.

"American Heliocentric Ephemeris for the 21st Century 2001-2050" features calculations for 0 hours (midnight). This book is especially valuable for people researching planetary cycles and working with financial markets.

THE AMERICAN EPHEMERIS FOR THE 21ST CENTURY AT NOON 2000-2050, 2E is the #1 most essential astrological reference book. Daily planetary positions from 2000-2050, moon phases, eclipses, void of course times, aspects, direct and retrograde station times, and "astrological weather" are included.

Astrology for Real Life

Astrostyle

Placidus System

A fun and sassy no-nonsense invitation to the practice of astrology with easy-to-understand tools for self-development and conscious living Astrology books are typically either overly simplistic sun-sign books or overly complicated chart calculations filled with astro jargon. Astrology for Real Life goes beyond simple sun-sign interpretation and at the same time cuts through the complications of horoscope analysis to make understanding your chart in depth, simple and easy. The goal is to make astrology accessible to total newbies and provide a working reference guide for intermediates. The book is presented in workbook format exploring each part of chart interpretation—signs, planets, houses, aspects—with exercises following each chapter and fill-in-the-blank lessons that take the reader through all the just-learned steps. The tone is warm, fun, and personal, and the exercises give the reader experiential hands-on practice. The end result: once you learn the basics in Astrology for Real Life, you can easily navigate the cosmos by making them work for you. It's kind of like a roadmap where we begin by understanding the terrain and the tools available. From there, the planets will guide you in making brave, excellent choices in love, work, and life. It's profound, fun, and practical. You'll learn how to interpret your chart with confidence and use astrology in a practical, proactive way, with no astro excuses (blaming the stars for your issues).

God is Me has been written as a collection of notes and reflections, so unlike a traditional book structure, there is no beginning, middle or end. 6.02 billion people all over the world believe in God in some form. Probably more if you were to refer to God as a synonym for Universe, angels, source, infinite intelligence, energy, cosmos or whatever truth aligns with you, which is what I do in God is Me. God is Me, is a reflective piece of writing based on the concept of enlightenment through self-reflection. The realization that in fact I may not be God, but God is me. And once I become self-aware, that is, aware that I possess the same unlimited power that God does, and that power lives within me, within all of us, and the only thing that I need to do to access that power is to align with my own well-being, my own joy, I am finally free. Free to live intentionally instead of by default. God is Me isn't to evoke a learning experience as much as it is to allow for the reader to remember what they already know within the depths of their soul. A book about our re-connection to the One Source.

This compilation of house cusps is an authoritative reference for the accurate division of the zodiac into twelve houses. Designed to meet the most demanding needs of astrologers and those doing astrological research, the tables cover the range of latitudes from 0 to 66 degrees and list all cusps to one-tenth of a minute of arc. The tables list the cusps at even four minute intervals of sidereal time, making linear interpolation practical and straightforward. There are 360 separate tables of house cusps with each showing the house cusps for latitudes 0 to 66 degrees at a single value of sidereal time. At the top of each table the sidereal time is printed in hours, minutes, and seconds on the left, and in degrees, minutes, and seconds on the right. Since the Midheaven remains the same for all latitudes, it is printed once at the top of the page, and because of its importance is listed to a precision of one second of arc The general rule for finding southern latitude cusps is to add twelve hours to the sidereal time, look up the cusps as if the latitude were north, and then reverse the zodiacal sign of all the cusps found. This process is made easier in this volume through the use of separate headings for southern latitudes at the bottom of each table. Instead of adding twelve hours to the sidereal time, use the sidereal time headings at the bottom of the page when locating the proper table. This gives the same table that would be found by adding the twelve hours and using the northern latitude headings. It is usually necessary to interpolate to find cusps for an exact time or latitude that falls between two listings in the tables. Interpolation is the process of finding a small correction to be added or subtracted from a cusp in the tables to compensate for the difference between the value of the cusp at the listed sidereal time or latitude and the value of the cusp at the actual sidereal time or latitude. Generally speaking, interpolation must be done twice for each cusp: a correction for the sidereal time and another for the latitude. The Midheaven need only be corrected for sidereal time since it remains the same at all latitudes. It is no surprise that the difficulty of interpolation depends upon the accuracy required. Included in this book are explicit instructions for three techniques for finding the house cusps, each of which gives successively more accurate results. All tables needed for all three techniques are included in the book.

Postcolonial Astrology

For the Year. 1878. - 1875

This volume, a directory of astrological correspondences, is the result of a research project that drew together the thoughts of many others into a reference book, assuming the role of a dictionary to astrologers, but vastly more complete. It is the only place where all sign, planetary and house rulerships have been brought together and put in a good workable order. It is organized in such a way that one can use the book for quick and easy reference, and it eliminates the need to search through various other volumes. In four parts: an alphabetical listing, a listing by planets, a listing by signs, a listing by houses. Plus an Appendix with special listings: principal bones of the body, principal veins of the body, chart of an organization, flavors and handwriting forms. Enthusiastically endorsed and used by professionals and students alike, no reference library is complete without this best-selling volume.

Compiled and programmed by Neil F. Michelsen; revisions by Rique Pottenger.

Tapping into the political power of magic and astrology for social, community, and personal transformation. In a cross-cultural approach to understanding astrology as a magical language,

Alice Sparkly Kat unmasks the political power of astrology, showing how it can be channeled as a force for collective healing and liberation. Too often, magic and astrology are divorced from their potency and cultural contexts: co-opted by neoliberalism, used as a force of oppression, or distilled beyond recognition into applications that belie their individual and collective power. By looking at the symbolic and etymological histories of the sun, moon, Saturn, Venus, Mercury, Mars, and Jupiter, we can trace and understand the politics of magic--and challenge our own practices, interrogate our truths, and reshape our institutions to build better frameworks for communities of care. Fearless, radical, and fresh, Sparkly Kat's Postcolonial Astrology ushers in a new wave of astrology revival, refusing to apologize for its magickism and connecting its power to the spirituality and politics we need now.

Intersectional, inclusive, and geared towards queer and POC communities, it uses our historical and collective constructs of the planets, sun, and moon to re-chart our subconscious history, redefine the body in the world, and assert our politics of the personal, in astrology and all things.

The American Ephemeris for the 20th Century at Noon

RAPHAEL'S EPHEMERIS 2021

The Study of Fate and Fortune

The Michelsen Book of Tables

The author gives a full history of the origins of temperament in astrology, then shows clearly and succinctly how readers can work to assess temperaments themselves. Copious case histories support her technique.

Available in late June 2009- the ultimate ephemeris for the years when all but the youngest among us were born. Neil F. Michelsen's The American Ephemeris for the 20th Century, 1900-2000 at Noon, and its companion volume for Midnight, became the most highly trusted and widely used reference works for astrologers worldwide. Now substantially revised, updated and expanded by Rique Pottenger, The New American Ephemeris for the 20th Century, 1900-2000 at Noon, Michelsen Memorial Edition, has improvements and refinements that permit more accurate station times, a more accurate position for the Galactic Center and more. Ceres is added to daily longitude listings, Sun through Pluto, and monthly positions are provided for Eris, Chiron, Pallas, Juno and Vesta.

Featuring Longitudes and Declinations for the Sun, Moon, Planets, Chiron and the Asteroids. The Astrolabe World Ephemeris combines reading ease and clarity with 21st Century accuracy and precision of data. This unique ephemeris is one of the most complete and convenient references available for astrological calculation. Includes: daily longitudes and declinations for the planets calculated to the second of arc, Chiron and the four major

asteroids, void-of-course Moon data, 12 hour Moon positions, Monthly planetary and Lunar ingresses, Lunar phases and an introduction by Robert Hand.

A Simple Guide to Calculating and Interpreting Birth Charts for Effective Application in Daily Life

Raphael's Astronomical Ephemeris of the Planets' Places

Star-studded Advice for Love, Life, and Looking Good

American Ephemeris for the 21st Century Noon Edition

The American Ephemeris 1950-2050 at Midnight, The Trans-Century Edition, is published in response to multiple requests for a one hundred year ephemeris covering these "most useful years." With the years 1950 through 2050, only one ephemeris needs to be at hand, especially when traveling, for an astrologer to do quick lookups of both birth data and transiting data over the expected life span of most people currently living. Since the 1976 publication of the first version of The American Ephemeris, 1931-1980, Neil F. Michelsen's ground-breaking series of ephemerides for astrologers have consistently set standards for accuracy in astrology, becoming indispensable to astrologers worldwide at every level from student to professional. The tradition continues with the addition of this new tropical ephemeris spanning from mid 20th century through mid 21st century. Rique Pottenger has revised and expanded the Michelsen programming with updated Jet Propulsion Laboratory data and improvements in the computer generating program that, for example, enable finding double ingresses in a single day, plus more accurate station times. A new formula increases the accuracy of the Galactic Center calculation. Other new features have been added, the most obvious of which are the dwarf planets Ceres and Eris, in response to the 2006 decisions of the International Astronomical Union. Monthly positions have also been added for the remaining three of the former four major asteroids in wide use among astrologers, Pallas, Juno and Vesta, and also for the centaur, Chiron.

Hellenistic astrology is a tradition of horoscopic astrology that was practiced in the Mediterranean region from approximately the first century BCE until the seventh century CE. It is the source of many of the modern traditions of astrology that still flourish around the world today, although it is only recently that many of the surviving texts of this tradition have become available again for astrologers to study. Hellenistic Astrology: The Study of Fate and Fortune is one of the first comprehensive surveys of this tradition in modern times. The book covers the history, philosophy, and techniques of ancient astrology, with a special focus on demonstrating how many of the fundamental concepts underlying the practice of western astrology originated during the Hellenistic period.

The American Ephemeris 1950-2050 at Noon, Trans-Century Edition, is published in response to multiple requests for a one hundred year ephemeris covering these "most useful years." With the years 1950 through 2050, only one ephemeris needs to be at hand, especially when traveling, for an astrologer to do quick lookups of both birth data and future transits for most people he or she might encounter. Since the 1976 publication of the first version of The American Ephemeris, 1931-1980, Neil F. Michelsen's ground-breaking series of ephemerides for astrologers have consistently set standards for accuracy in astrology, becoming indispensable to astrologers worldwide at every level from student to professional. The tradition continues with the addition of this new tropical ephemeris spanning from mid 20th century through mid 21st century, which is published in two versions. This one is calculated for noon UT, and the other for Midnight UT. Rique Pottenger has revised and expanded the Michelsen programming with updated Jet Propulsion Laboratory data and improvements in the computer generating program that, for example, enable finding double ingresses in a single day, plus more accurate station times. A new formula increases the accuracy of the Galactic Center calculation. Other new features have been added, the most obvious of which are the dwarf planets Ceres and Eris, in response to the 2006 decisions of the International Astronomical Union. Monthly positions have also been added for the remaining three of the former four major asteroids in wide use among astrologers, Pallas, Juno and Vesta, and also for the centaur, Chiron. 978-1-934976-27-2 624 pages \$29.95
