Venture Capital and How to Get It

A Wall Street Journal Bestseller! What are venture capitalists saying about your startup behind closed doors? And what can you do to influence that conversation? If Silicon Valley is the greatest wealth-generating machine in the world, Sand Hill Road is its humming engine. That's where you'll find the biggest names in venture capital, including famed VC firm Andreessen Horowitz, where lawyer-turned-entrepreneur-turned-VC Scott Kupor serves as managing partner. Whether you're trying to get a new company off the ground or scale an existing business to the next level, you need to understand how VCs think. In Secrets of Sand Hill Road, Kupor explains exactly how VCs decide where and how much to invest, and how entrepreneurs can get the best possible deal and make the most of their relationships with VCs. Kupor explains, for instance:

- **Why most VCs typically invest in only one startup in a given business category.**
- **Why the skill you need most when raising venture capital is the ability to tell a compelling story.**
- **How to handle a "down round," when startups have to raise funds at a lower valuation than in the previous round.**
- **What to do when VCs get too entangled in the day-to-day operations of the business.**
- **Why you need to build relationships with potential acquirers long before you decide to sell. Filled with Kupor's firsthand experiences, insider advice, and practical takeaways, Secrets of Sand Hill Road is the guide every entrepreneur needs to turn their startup into the next unicorn.**

American Headway 1 can be used by both true and false beginners. Integrated skills work is an important feature of the series. All four skills are developed in context. Universal topics are selected from a wide variety of material.

Parentology

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

A collection of twelve lessons that teach English language grammar, vocabulary, functional language, listening and pronunciation, reading and writing and speaking.
