The purpose of this book is to serve as a supplemental reference text for 21st century elementary classrooms. The primary objective is to help teachers inspire and engage their students in the STEM (science, technology, engineering, and mathematics) subjects. The push for incorporating STEM education in elementary school has become increasingly important, yet most educators and publishers have offered problem-based activities, without considering one of the most important pedagogical entry points to lesson planning – the hook or the opening, and attachment: initial; background-size: initial; background-origin: initial; background-clip: initial; background-position: initial; background-repeat: initial;">Inspiring STEM Minds aims at providing teachers an effective, easy to use text that they can use to discuss specific mathematicians, engineers, inventors, and scientists (although the individuals chosen for each section of the book are in no way an exhaustive or selective group that may characterize each discipline). This reference text is organized into four key sections, depicting the four disciplines that make up STEM education. Each section briefly gives historical background, as well as provides a problem or short activity designed to use everyday materials so that teachers can implement the activity in their classrooms. The classroom activities are directly related to each biography and have, we believe, great potential to engage students in the classroom. Each activity is also correlated to the National Standards, and we also supplement the activities with suggestions for interdisciplinary connections.

We hope this book serves as a valuable resource for classroom teachers.

This is an invaluable Biblical commentary on both the Old and new Testaments.

Referred to as the "most segregated city in America," Birmingham, Alabama, became a hotbed for civil rights activity in the early 1960s. Great African-American leaders, including Dr. Martin Luther King, Jr. and the Reverend Fred Shuttlesworth, helped lead the civil rights movement in the city. In Birmingham, African-American youth marched, sang, and spoke out against segregation. Although they faced police dogs and fire hoses, they offered non-violent resistance and did not back down. This book explores the civil rights leaders who organized the movement and the brave children and teens at the heart of the fight.

Summarizing–Grades 5-6 contains guided activities that help develop and achieve this skill. Students will progress from selecting main ideas and details to writing their own summaries. As this skill is practiced in reading, students will naturally begin to use the skill in writing and speaking. Summarization is a concept used throughout the curriculum. Social studies, science, language, and reading all use the skill of summarization in written, read, and oral lessons. This book provides activities that will give students the opportunity to discuss, examine, choose, and write summaries. It will also provide the chance to practice using active verbs, and colorful, interesting nouns in their work.

This book presents an analysis of active ageing and physical activity from a multidisciplinary perspective. With descriptions of exercises, adequately illustrated with pictures, this book shows that regular physical activity reduces the prevalence of chronic diseases associated with ageing, as well as the risk of morbidity and mortality of the elderly. It confirms that exercise programs minimize the psychomotor decline, prevent the loss of functionality, inability and dementia, and foster significant gains in health and well-being, leading to increased quality of life of the elderly.

ADP 1-01 guides Army professionals (both Soldiers and Department of the Army Civilians) in their understanding of the entire body of professional knowledge and beliefs that shape the art and science of their profession. It addresses what doctrine is ,why it is important, and which major ideas underlie it. The publication also discusses the most important taxonomies and terms used in the conduct of operations and the way they fit together as a single coherent whole. The principal audience for the ADP 1-01 is all members of the Army Profession. Commanders and subordinates ensure that their decisions and actions comply with applicable United States, international, and in some cases host-nation laws and regulations. Commanders at all levels ensure that their Soldiers operate in accordance with the law of war and the rules of engagement. (See FM 27-10)

Lively political and public debates on war and morality have been a feature of the post-Cold War world. The Price of Peace argues that a re-examination of the just war tradition is therefore required. The authors suggest that despite fluctuations and transformations in international politics, the just war tradition continues to be relevant. However they argue that it needs to be reworked to respond to the new challenges to international security represented by the end of the Cold War and the impact of terrorism. With an interdisciplinary and transatlantic approach, the book provides a dialogue between theological, political, military and public actors. By articulating what a reconstituted just war tradition might mean in practice, it also aims to assist policy-makers and citizens in dealing with the ethical dilemmas of war.

National Jewish Book Awards Finalist for the Barbara Dobkin Award for Women's Studies, 2012. In February 1912 thirty-eight American Jewish women met at Temple Emanuel in New York and founded Hadassah, the Women's Zionist Organization of America. This has become the largest Zionist organization in the Diaspora and the largest and most active Jewish women's organization ever. Its history is an inseparable part of the history of American Jewry and of the State of Israel, and the relationship between them. Hadassah is also part of the history of Jewish women in the United States and in the modern world more broadly. Its achievements are not only those of Zionism but, crucially, of women, and throughout this study Mira Katzburg-Yungman pays particular attention to the life stories of the individual women who played a role in them. Based on historical documentation collected in the United States and Israel and on broad research, the book covers many aspects of the history of Hadassah and analyses significant aspects of the fascinating story of the organization. A wide-ranging introductory section describes the history and challenges of Hadassah's history from its founding to the birth of the State of Israel. Subsequent sections explore in turn the organization's ideology and its activity on the American scene after Israeli statehood: its political and ideological role in the World Zionist Organization; and its involvement in the new State of Israel in the twin fields of activity: in medicine and health care and in its work with children and young people. The final part of the book deals with topics that enrich our understanding of Hadassah in additional dimensions, such as gender issues, comparisons of Hadassah with other Zionist organizations, and the importance of people of the Yishuv and later of Israelis in Hadassah's activities. The study concludes with an Epilogue that considers developments up to 2005, assessing whether the conclusions reached with regard to Hadassah as an organization remain valid. It considers developments within Hadassah in the 1990s and 1990s, years in which the organization was affected by the significant changes within the wider American Jewish community, specifically the enormous increase in intermarriage between non-Jews and the impact of the so-called 'second wave' of feminism. This extensive, diverse, and balanced study offers a picture of Hadassah in both arenas of its activity: in the land that is now the State of Israel, and in the United States. In doing so it makes a contribution not only to Zionist history but also to the history of American Jewish women and of Jewish women more widely.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
