This monograph presents a collection of major developments leading toward the implementation of white space spectrum usage in India and South Africa. The Cyber Ecosystem can be a replica of our natural ecosystem where different living and non-living things interact with each other to revolutionize our lifestyle by creating smart, intelligence (AI), and the mechanisms providing cybersecurity. This book documents how this blend of technologies is powering a digital sustainable socio-economic infrastructure which improves our life quality. It offers advanced automation methods fitted with amended business and audits models, universal authentication schemes, transparent governance, and inventive prediction analysis.

"Pankaj Mishra transforms a visceral, intimate story of one man's humble origins into a kaleidoscopic portrait of a society bedazzled by power and wealth—what it means on a human level, and what it costs. Run and Hide is a spectacular, illuminating work of fiction." —Jennifer Egan, author of Manhattan Beach Growing up in a small railway town, Arun always dreamed of escape. His acceptance to the prestigious Indian Institute of Technology, enabled through great sacrifice by his low-caste parents, is seemingly his golden ticket out of a life plagued by everyday cruelties and deprivations. At the predominantly male campus, he meets two students from similar backgrounds. Unlike Arun—scarred by his childhood, and an uneasy interloper among go-getters—they possess the sheer will and confidence to break through merciless social barriers. The alumni of IIT eventually go on to become the financial wizards of their generation, working hard from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of their generation, working hard from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of their generation, working hard from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of their generation, working hard from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of their generation, working hard from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of their generation, working hard from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of their generation, working hard from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of their generation, working hard from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of their generation, working hard from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of their generation from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of their generation from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of their generation from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of their generation from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of their generation from East Hampton to Tuscany—the beneficiaries of unprecedented financial wizards of the East Hampton to Tuscany—the beneficiaries of unprecedent from East Hampton to Tuscany—the beneficiaries of unprecedent from East Hampton to Tuscany—the Beneficiaries of unprece

writerly life, retreating to a small village in the Himalayas with his aging mother. Arun 's modest idyll is one day disrupted by the arrival of a young woman named Alia, who is writing an expose of his former classmates. Alia, beautiful and sophisticated, draws Arun back to the prospering world where he must be someone else if he is to belong. When he is implicated in a terrible act of violence committed by his closest friend from IIT, Arun will have to reckon with the person he has become. a life for himself with someone else. Many, many years later, when their paths cross once again, will their destinies be interlinked at last? Or have they already lost their chance to find someone to love? From the bestselling author Ruchita Misra, here is another moving story of learning to love all over again. This book provides an introduction to the mathematical and algorithmic foundations of data science, include the counterintuitive nature of data in high dimensions, important linear algebraic techniques such as singular value decomposition, the theory of random walks and Markov chains, the fundamentals of and important algorithms for machine learning, algorithms and analysis for clustering, probabilistic techniques are developed including the law of large numbers, tail inequalities, analysis of random projections, generalization guarantees in machine learning, and moment methods for analysis of phase transitions in large random graphs. Additionally, important structural and complexity measures are discussed such as matrix norms and VC-dimension. This book is suitable for both undergraduate courses in the design and analysis of algorithms for data. An intensely personal novel about childhood, memory, and history by one of today's most celebrated authors, now available in the us for the first time. Friend of My Youth begins with the novelist Amit Chaudhuri returning to Bombay, the city in which he grew up, to give a reading. Ramu, the friend of his youth, with whom he likes to get together when he comes back, is not there: after years of disabling drug addiction, Ramu has signed up for an intensive rehab program. But Amit Chaudhuri has errands to run in Bombay for his mother and wife, which take him back to the Taj Mahal Hotel, the site, not that long before, of a brutal terrorist attack. Amit Chaudhuri writes novels the way an extraordinary instrumentalist makes music, stating and tropping them out in different keys and to various effect, developing and dropping them, only to pick them up again and turn them completely around. He engages both our minds and our hearts. He makes us marvel. Friend of My Youth, his deceptively casual and continually observant and inventive new novel, makes us see and feel the great city of Bombay while bringing us into the passage of time, the experience of friendship, the indignities of youth and middle age, the lives of parents and children, and, for all the humor that can strike from nowhere, the terror that is a fact of daily life. Friend of My Youth is fearfully and wonderfully made.

Evolutionary Diversity as a Source for Anticancer Molecules discusses evolutionary diversity as source for anticancer agents derived from bacteria, algae, bryophytes, and gymnosperms. The book goes over the isolation of anticancer drugs. The book also includes discussion of the nutraceuticals and natural products derived from invertebrates that can be used as part of cancer treatment. Evolutionary Diversity as a Source for Anticancer Molecules also deals with anticancer potential. Discusses the application of natural products in place of conventional drugs to minimize the side effects in cancer treatment Explains the relation between evolutionary mechanisms and climate change for production of secondary metabolites

This comprehensive book on Endocrine Surgery covers disorders of thyroid, parathyroid, adrenal glands along with neuroendocrine tumors of pancreas and gastrointestinal tract. It is a comprehensive, up-to-date treatise covering embryology, anatomy, etiology, clinical manifestations, diagnoses, and treatment modalities of surgical endocrine diseases. The authors explore the pertinent surgical endocrinology topics with a South Asian perspective. Color illustrations, flowcharts and tables make the topics lucid for professionals. This book provides the essential information surgeons require for evaluation and management of patients, both with straight forward, and complex endocrine diseases Discusses Robot Assisted Endocrine Surgery and explores its impact on healthcare finances Highlights the difference between practices used in western and resource limited countries by incorporating a South Asian perspective for region specific diseases.
