*Exploring the literature of environmental moral dilemmas from the Hebrew Bible to modern times, this book argues the necessity of cross-disciplinary approaches to environmental studies, as a subject affecting everyone, in every aspect of life. Moral dilemmas are central in the literary genre of protest against the effects of industry, particularly in Romantic literature and 'Condition of England' novels. Writers from the time of the Industrial Revolution to the present—including William Blake, Elizabeth Gaskell, Charles Dickens, Emily Zola, Henrik Ibsen, Anton Chekhov, T.S. Eliot, John Steinbeck, George Orwell, and J.M. Coetzee—follow the Bible in seeing environmental problems in moral terms, as a consequence of human agency. The issues raised by these and other writers—including damage to the environment and its effects on health and quality of life, particularly on the poor; economic conflicts of interest; water and air pollution; deforestation, and the environmental effects of war—are fundamentally the same today, making their works a continual source of interest and insight. Sketching a brief literary history on the impact of human behavior on the environment, this volume will be of interest to readers researching environmental studies, literary studies, religious studies and international development, as well as a useful resource to scientists and readers of the Arts. Guy Gavriel Kay, bestselling author of the groundbreaking novels Under Heaven and River of Stars, once again visits a world that evokes one that existed in our own past, this time the tumultuous period of Renaissance Europe - a world on the verge of war, where ordinary lives play out in the grand scheme of kingdoms colliding. From the small coastal town of Senjan, notorious for its pirates , a young woman sets out to find vengeance for her lost family. That same spring, from the wealthy city-state of Sereusa, famous for its canals and lagoon, come two very different people: a young artist traveling to the dangerous east to paint the Grand Khalif at his request - and possibly to do more - and a fiercely intelligent, angry woman, posing as a doctor's wife in her role of a spy. The trading ship that carries them is commanded by the clever younger son of a merchant family - with ambivalence about the life he's been born to live. And farther east a boy trains to become a soldier in the elite infantry of the khalfi - to win glory in the war everyone knows is coming. As these lives entwine, their fates-and those of many others - will hang in the balance, when the khalfif sends out his massive army to take the great fortress that is the gateway to the western world . . .

We are the last humans. We are hunted. We are refugees. We must return to Earth. The alien scorpions attack us across the galaxy. They butcher millions. Humans are now an endangered species. We will rise again!

Despite the fame Ted Hughes's poetry has achieved, there has been surprisingly little critical writing on his children's literature. This book identifies the importance of Hughes's children's writing from an ecocritical perspective and argues that the healing function that Hughes ascribes to nature in his children's literature is closely linked to his responsibility. This book will be the first sustained examination of Hughes's greening in relation to his writing for children, providing a detailed reading of Hughes's children's literature through his poetry, prose and drama as well as his critical essays and letters. In addition, it also explores how Hughes's children's writing is a window to the consciousness and concern to reconnect a society that has become alienated from nature. This book will be of great interest to not only those studying Ted Hughes, but also students and scholars of environment and literature, ecocriticism, children's literature and twentieth-century literature.

Earth refugees threaten a peaceful space settlement in this influential novel from the Golden Age science fiction author of 2001: A Space Odyssey. More than two thousand years in the future, a small human colony thrives on the ocean paradise of Thalassa—sent there centuries ago to continue the human race before Earth ’ s destruction. Thalassa ’ s resources are vast—and the human colony has lived a bucolic life there. But their existence is threatened when the spaceship Magellan arrives on their world—carrying one million refugees from Earth, fleeing the dying planet. Reputed to be Arthur C. Clarke ’ s favorite novel, The Songs of Distant Earth addresses several fascinating scientific questions unresolved in their time—including the question of why so few neutrinos from the sun have been measured on Earth. In addition, Clarke presents an inventive depiction of the use of vacuum energy to power spacecraft—and the technical logistics of space travel near the speed of light. " Clarke ’ s simple, musical style never falters in this sobering yet far from bleak commentary on humanity ’ s longing for the stars. Highly recommended. " —Library Journal

People feel at home in Belle Haven, and in many ways it is like any other small town, with a cafe where regulars come for the fresh cinnamon rolls and to talk about the weather, or one another, often staying all day. It's a town with the usual collection of quirky characters—the people everyone knows who, by staying in one place long enough, have become part of its landscape. But what sets Belle Haven apart is its especially strong sense of community, which is both strengthened and tested by the uncontrollable mine fire that burns below the town. Sometimes it breaks through the earth's surface to swallow somebody's garden or a garbage can, even a beloved pet, or to threaten a house. Those Who Favor Fire is the love story of Rachel Hearn, who has lived in Belle Haven all her life, and the man everyone calls Just Joe, who has arrived only recently—and the story of their love for the town that has brought them together. But as the fire intensi- fies, endangering Belle Haven and its people, it also threatens what Joe and Rachel have found together. Though some reluctantly consider relocating, Rachel refuses to leave the only place she's ever called home, the place that holds her richest memories. But Joe knows the danger of becoming too firmly rooted in a place. Ultimately, Rachel and Joe must decide whether to abandon their beloved town. In her wonderful debut novel, Lauren Wolk has created a town every bit as real as the Mitford of Jan Karol's novels and populated it with characters as quirky, lively, and endearing as Fannie Flagg's.
