Modern-day archaeological discoveries in the Near East continue to illuminate man's understanding of the ancient world. This illustrated handbook describes the culture, history, and people of Mesopotamia, as well as their struggle for survival and happiness.

Investing—the commitment of resources to achieve a return—affects individuals, families, companies, and nations, and has done so throughout history. Yet until the sixteenth century, investing was a privilege of only the elite classes. The story behind the democratization of investing is bound up with some of history's most epic events. It is also a tale rich with lessons for professional and everyday investors who hope to make wiser choices. This entertaining history doubles as a sophisticated account of the opportunities and challenges facing the modern investor. It follows the rise of funded retirement; the evolution of investment vehicles and techniques; investment misdeeds and regulatory reform; government economic policy; the

development of investment theory; and the emergence of new investment structures. Norton Reamer and Jesse Downing map these trends and profile the battle between low cost index and exchange-traded funds, on the one hand, and the higher-fee hedge funds and private equity, on the other. By helping us understand this history and its legacy of risk, Reamer and Downing hope to better educate readers about the individual and societal impact of investing and ultimately level the playing field.

The ancient world of Mesopotamia (from Sumer to the subsequent division into Babylonia and Assyria) vividly comes alive in this portrayal of the time period from 3100 bce to the fall of Assyria (612 bce) and Babylon (539 bce). Students, teachers, and interested readers will discover fascinating details about the lives of these people taken from the ancients' own quotations and descriptions. These detailed anecdotes from the people themselves easily convey factual material. A wealth of information is provided on such varied topics as: education; literature; mathematics and science; city vs. country life; family life; and religion, as well as many other subjects. they wore, to the jewelry they adorned themselves with, and to the ways they wore their hair. Readers can expect an enjoyable read that provides them with much insight into these ancient lives. This book investigates the founding and building of cities in the ancient Near East. The creation of new cities was imagined as an ideological project or a divine intervention in the political narratives and mythologies of Near Eastern cultures, often masking the complex processes behind the social production of urban space. During the Early Iron Age (c.1200-850 BCE), Assyrian and Syro-Hittite rulers developed a highly performative official discourse that revolved around constructing cities, cultivating landscapes, building watercourses, erecting monuments and initiating public festivals. This volume combs through archaeological, epigraphic, visual, architectural and environmental evidence to tell the story of a region from the perspective of its spatial practices, landscape history and architectural technologies. It argues that the cultural processes of the making of urban spaces shape collective memory and identity as well as sites of political performance and state spectacle. The legacy of past civilizations is still with us today. In Ancient

Explore an insightful account of the reception of Mesopotamia in modern cinema In *Reception of Mesopotamia on Film*, Dr. Maria de Fátima Rosa explores how the Ancient Mesopotamian civilization was portrayed by the movie industry, especially in America and Italy, and how it was used to convey analogies between ancient and contemporary cultural and moral contexts. Spanning a period that stretches from the beginning of the 20th century to the present day, the book explores how the Assyrian and Babylonian elites, particularly kings, queens, and priestesses, were perceived and represented on screen by filmmakers. A focus on the role played by Ancient Near Eastern women and on the polytheistic religion practiced in the land between the rivers will be provided. This book also offers an insightful interpretation of the bias message that most of these films portray and how the Mesopotamian past and Antiquity brought to light and stimulated the debate on emerging 20th century political and social issues. The book also offers: A thorough introduction to the Old Testament paradigm and the romanticism of classical authors A comprehensive exploration of the literary

Marc Van De Mieroop examines urban life in the historical period, investigating urban topography, the role of cities as centres of culture, their political and social structures, economy, literature, and the arts. He draws on material from the entirety of Mesopotamian history, from c. 3000 to 300 BC, and from both Babylonia and Assyria, arguing that the Mesopotamian city can be regarded as a prototype that inspired the rest of the ancient world and shared characteristics with the European cities of antiquity. -

Iraq), was the original site of many of the major developments in human history, such as farming, the rise of urban literate societies and the first great empires of Akkad, Babylonia and Assyria. Dr. Matthews places the discipline within its historical and social context, and explains how archaeologists conduct their research through excavation, survey and other methods. In four fundamental chapters, he uses illustrated case-studies to show how archaeologists have approached central themes such as: * the shift from hunting to farming * complex societies * empires and imperialism * everyday life. This will be both an ideal introductory work and useful as background reading on a wide range of courses.

"This splendid work of scholarship . . . sums up with economy and power all that the written record so far deciphered has to tell about the ancient and complementary civilizations of Babylon and Assyria."—Edward B. Garside, New York Times Book Review Ancient Mesopotamia—the area now called Iraq—has received less attention than ancient Egypt and other long-extinct and more spectacular civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. "To any serious student of Mesopotamian civilization, this is one of the most valuable books ever written."—Leonard Cottrell, Book Week "Leo

Second, that the Christology of Theodore of Mopsuestia, as read as an expression of this School, is orthodox by the Chalcedonian standard. This book combines archaeological and textual evidence to outline the process of mourning, burying, and venerating dead elites in Early Dynastic Mesopotamia. It argues that these ritual acts constituted a locus of ideological production and empowerment for early rulers. This volume presents recent research on the relationship between the material format of text-bearing artefacts, the texts they carry, and their genre. The essays cover a vast period, from the counting stones of the late 4th millennium BCE to the time of the Great Hittite Kingdom in the 2nd millennium BCE. The sacred consciousness that prevailed in antiquity is the key

to unlocking our future • Shows how scientific consciousness, which gives primacy to the sense of sight, estranged us from the participatory spiritual consciousness of antiquity • Explores the vital importance of the imagination in reconnecting us to the spirit world

The Future of the Ancient World sheds new light on the evolution of consciousness from antiquity to modern times. The twelve essays in this book examine developments in human consciousness over the past five thousand years that most history books do not touch. In ancient times, human beings were finely attuned to the invisible world of the gods, spirits, and ancestors. Today, by contrast, our modern scientific consciousness regards what is physically imperceptible as unreal. Our experience of the natural world has shifted from an awareness of the divine presence animating all things to the mere scientific analyses of physical attributes, a deadened mode of awareness that relies on our ability to believe only in what we can see. In these richly illustrated and wide-ranging essays that span the cultures of ancient Egypt, Mesopotamia, Greece, Rome, and the early Christian period, Jeremy Naydler shows how the consciousness that prevailed in ancient times may inspire us

toward a future in which we once again reconnect with invisible realms. If the history of consciousness bears witness to the loss of visionary and participatory awareness, it also shows a new possibility--the possibility of developing a free and objective relationship to the spirit world. Naydler urges us not only to draw inspiration from the wisdom of the ancients but to carry this wisdom forward into the future in a renewed relationship to the spiritual that is based on human freedom and responsibility.

Ancient kings who did not honor the gods overlooked an indispensable means for ruling effectively in their communities. In many traditional societies royal authority was regarded as a divine gift bestowed according to the quality of the relationship of the king both to God or the gods and to the people. The tension and the harmony within these human and divine relationships demanded that the king repeatedly strive to integrate the community's piety with his political strategies. This fascinating study explores the relationship between religion and royal authority in three of history's most influential civilizations: Homeric Greece, biblical Israel, and

Old Babylonian Mesopotamia. Dale Launderville identifies similar, contrasting, and analogous ways that piety functioned in these distinct cultures to legitimate the rule of particular kings and promote community well-being. Key to this religiopolitical dynamic was the use of royal rhetoric, which necessarily took the form of political theology. By examining a host of ancient texts and drawing on the insights of philosophers, poets, historians, anthropologists, social theorists, and theologians, Launderville shows how kings increased their status the more they demonstrated through their speech and actions that they ruled on behalf of God or the gods. Launderville's work also sheds light on a number of perennial questions about ancient political life. How could the people call the king to account? Did the people forfeit too much of their freedom and initiative by giving obedience to a king who symbolized their unity as a community? How did the religious traditions serve as a check on the king's power and keep alive the voice of the people? This study in comparative political theology elucidates these engaging concerns from multiple perspectives, making Piety and Politics of interest to readers

The late W.G. Lambert (1926-2011) was one of the foremost Assyriologists of the latter part of the twentieth century. His principle legacy is a large number of superb critical editions of Babylonian literary compositions. Many of the texts he edited were on religious and mythological subjects. He will always be remembered as the editor of the Babylonian Job (Ludlul bel nemeqi, also known as the Poem of the Righteous Sufferer), the Babylonian Flood Story (Atrahasis) and the Babylonian Creation Epic (Enuma elish). The present book is a collection of twenty-three essays Lambert published between the years 1958 and 2004. These endure not only as the legacy of one of the greatest authorities on ancient Mesopotamian religion and mythology, but also because each makes statements of considerable

validity and importance. As such, many are milestones in the fields of Mesopotamian religion and mythology.

After more than fifty years since the last publication, the cuneiform texts relating to the treatment of the loss of male sexual desire and vigor in Mesopotamia are collected in this volume. The aim of the book is to present Mesopotamian medical tradition regarding the so-called n?š libbi therapies. Šà-zi-ga in Sumerian, n?š libbi in Akkadian, lit. "raising of the 'heart'", is the expression used to indicate a group of texts intended to recover the male sexual desire. This medical tradition is preserved from the Middle Babylonian period to the Achaemenid one. This broad range testifies to the importance of the transmission of this material throughout Mesopotamian history. The book provides the edition of this textual corpus and analyzes it in the light of new knowledge on ancient Near Eastern medicine. Moreover, this volume aims to show how theories and methodologies of Cultural Anthropology, Ethnopsychiatry and Gender Studies are useful for understanding the Mesopotamian medical system. This edition is an important tool for understanding Mesopotamian medical knowledge for Assyriologist, however since the texts have been translated and discussed using the anthropological and gender perspectives they are accessible also to scholars of other research fields, such as History of Medicine, Sexuality and Gender.

Andrei A. Orlov examines the tradition about the seventh antediluvian patriarch Enoch, tracing its development from its roots in the Mesopotamian lore to the Second Temple apocalyptic texts and later rabbinic and Hekhalot materials where Enoch is often identified as the supreme angel Metatron. The first part of the book explores the imagery of the celestial roles and titles of the seventh antediluvian hero in Mesopotamian, Enochic and Hekhalot materials. The analysis of the celestial roles and titles shows that the transition from the figure of patriarch Enoch to the figure of angel Metatron occurred already in the Second Temple Enochic materials, namely, in 2 (Slavonic) Enoch, a Jewish work, traditionally dated to the first century CE. The second part of the book demonstrates that mediatorial polemics with the traditions of the exalted patriarchs and prophets played an important role in facilitating the transition from Enoch to Metatron in the Second Temple period.

Want to speak Hittite? Hold out a glass and ask for "wa-tar." This unique activity book for children ages nine and up shows what life was like among the Nubians, Mesopotamians, Hittites, and their neighbors the Egyptians from around 3100 B.C., when Upper and Lower Egypt became one kingdom, to the death of Queen Cleopatra under the Romans, in 30 B.C. Projects such as building a Nubian irrigation machine, creating a Mesopotamian cylinder seal out of clay, making kilts like those worn by Egyptian boys and men, and writing in Hittite cuneiform help young readers to connect with these ancient cultures and see how profoundly they have influenced our own.
