Environmental Science & Engineering

About Book - The inspiration behind this book is when I felt that there is need of simplified book on "Ad Hoc and Sensor Networks" that can help the students to understand the concepts in an easy manner. This book is written as per the latest Anna University syllabi (Regulation 2017). This book contains five units which covers the whole syllabus. Unit 1: Deals with the fundamentals of Ad hoc network and Sensor Network. It also describes the different

## Third Semester

routing protocols for Ad Hoc Wireless Networks. Unit 2: Provides an in-depth knowledge on sensor network architecture and design issues. Unit 3: Understands the MAC layer and transport layer issues. It also describes the protocols used in MAC later and transport layer. Unit 4: Illustrates the security issues possible in Ad hoc and Sensor networks. Unit 5: Provides an exposure to mote programming platforms and tools. At the end of every unit, possible short answer and long answer questions are also given. This book will be beneficial for the Engineering students as it helps in easy understanding of the concepts in best and easier way.

Total Quality Management Revised Edition: For Anna University, 3/e

Fundamentalof Microprocessors & its Application

***This practice-oriented book, now in its second edition, presents a lucid yet comprehensive coverage of the engineering properties and uses of the materials commonly used in building construction in India. Profusely illustrated with tables and diagrams, the book brings into light the basics of building materials and their specifications. Besides giving information regarding the traditional building materials, the text now acquaints the reader with up-to-date and in-depth information pertaining to modern materials available in the market. The references to IS codes and standards make this text suitable for further study and field use. The second edition possesses some substantial changes in***

## Third Semester

*Chapters 12, 13, 14 and 20. Now, the book offers a new section on durability of concrete in Chapter 12; a modified section regarding revision of IS 10262 (1982) code on concrete mix design to IS 10262 (2009) and a new section on classification of exposure conditions in Chapter 13; and a new section relating to large advances made in concrete construction and repair chemicals in Chapter 14. Besides, the content of Chapter 20 has been completely updated, with a particular emphasis on the extensive use of aluminium in building construction. Primarily intended for the students pursuing undergraduate degree (B.E./B.Tech.) and diploma courses in civil engineering and architecture, the book, on account of lecture-based presentation of the subject, should also prove eminently utilitarian for the young teachers to use it in their classroom lectures as well as for practising engineers to get a clear understanding of the fundamentals of the subject. NEW TO THE SECOND EDITION Review questions at the end of each chapter enable the reader to recapitulate the topics Considerable attention is given on field practice Syllabus of laboratory work on construction materials and a model question paper (Anna University) are given in appendices to guide the reader. Legal Aspects of Business is an important constitute of the business and corporate environment. No Corporate entity can effectively work and survive without meeting legal obligations. This book says it all in the form of Questions and Answers. Questions are framed in such a way that the readers will be able to quickly connect with the content and subject. The appropriate answers given under each question will lessen the burden of the students unlike the conventional means, where learners try to navigate for answers for hours and hours. As per the syllabus of Anna University, University of Madras, Annamalai University, and other Universities Appendix to the Journals of the House of Representatives of New Zealand*

**Dr. Arun Luiz T is currently working as Assistant Professor at SSN College of Engineering, Kalavakkam. He completed his Master in science from St. Mary's College (University of Calicut), Sulthan Bathery, Kerala in 2002. He Stood First in his College for B.sc and M.sc. (Chemistry). He received his Ph. D. in Inorganic Chemistry from IIT Madras in the year 2010. His research interest includes phosphorus- based ligands in synthetic inorganic chemistry and organometallic chemistry. He has Published four research papers in reputed national and international journals. He has more than four years of teaching experience in various engineering colleges.**

**PREFACE This text book is an outcome of more than 22 years of teaching experience of the authors through classroom lectures, faculty feedback, student's expectations and university demands. It is designed to cover all the units of third semester, Anna University, Chennai, as per the new regulations. The authors have calculated more than thirteen years past question papers and prepared a very comprehensive material that help the students directly to handle all types of questions in the examinations. Salient features 100 % syllabus coverage. More examples with step-by-step explanation. Complicated problems are simplified. Supported by clear illustrations. Anna University Q & A are solved. Each and every step is explained very clear. Related formulas are given in each problem. Easy to understand solutions. Diagrams are given wherever necessary. Each unit is added with solved**

**This book covers the analysis and design of reinforced concrete elements in foundations and superstructures in a logical, step-by-step fashion. The theory of reinforced concrete and the derivation of the code formulae have been clearly explained. The text is backed up by numerous illustrations, design charts and tables referring frequently to the relevant codes of practice. A large number of worked examples cover almost all types of reinforced concrete elements. The step-by-step approach will ensure that all design requirements are logically adhered to, a standardized approach is established in a design office and that a simplified procedure for checking and for quality assurance can be implemented.**

#### Engineering Chemistry-I

Applied Geology is a multidisciplinary subject that interacts with other disciplines, such as mineralogy, petrology, structural geology, hydrogeology, seismic engineering, rock engineering, soil mechanics, geophysics, remote sensing (RS-GIS-GPS), environmental geology, etc. This book, entitled Applied Geology, is the only one of its kind in the Indian market that caters to the needs of all these subjects. This book covers all aspects of Applied Geology and is intended to serve B.Tech students. A plethora of examples and case studies relevant to the Indian context have been included for better understanding of the geological challenges faced by engineers.

Education in India*

*World first Microprocessor INTEL 4004(a 4-bit Microprocessor)came in 1971 forming the series of first generation microprocessor.Science then with more and advancement in technology ,there have been five Generations of Microprocessors.However the 8085,an 8-bit Microprocessor,is still the most popular Microprocessor.The present book provied a simple explanation,about the Microprocessor,its programming and interfaceing.The book contains the description,mainly of the 8-bit programmable Interrupt Interval Timer/Counter 8253,Programmable communication Interface 8251,USART 8251A and INTEL 8212/8155/8256/8755 and 8279.*

# Online Library Anna University Question Paper Third Semester

*Language, unlike other engineering subjects, is more a skill that has to be practiced constantly. With this in mind, English for Engineering Students has been written to help building engineers use technical English appropriately in all situations. The objective of this book is to facilitate the practice of the four major study skills (Listening, Speaking, Reading and Writing) along with their sub-skills. The book is divided into 4 units of 3 chapters each. Each unit is accompanied by a revision exercise. At the end of the book are the supplementary tasks along with keys, an appendix of phonetic symbols and their use, and a model question paper.*
