***Teachers' attitudes have been a subject of study and interest for many years. Originally published in 1986, this bibliography attempts to review the large field of research between the years 1965 and 1984. To identify all the sources of information, and to list documents that discuss research on teachers' attitudes. It does not include an assessment of the quality of the research reported in the listed documents, however, the value is in its comprehensiveness. Users of the bibliography can locate the listed studies and then evaluate the studies using criteria relevant to their individual purposes.***

***College students are expected to master new genres in every course they take. Yet composition instructors can't possibly teach students every genre they will need for their college courses or careers. Instead of telling students how to write a genre, authors Jack and Pryal help***

students learn how a genre works using a genre toolkit that asks three questions: "What is it?" "Who reads it?" and "What's it for?" By taking this problem-solving approach to writing, *How Writing Works* prepares students for any writing situation that they may encounter at school, home, or work. *Distinctive Features* \* The Genre Toolkit helps students identify a genre's structure, audience, and purpose \* Integrated Assignments show students how to construct a series of small assignments that lead up to a major chapter project \* Individual, Team, and Multimedia Projects draw from a variety of popular, professional, and academic examples to address rhetorical challenges of visual, written, and oral communication \* Supplements like the Companion Website, the Instructor's Manual, and the Annotated Instructor's Edition include a variety of resources for students and professors
