

Annual Report Beximco

From taxi rides, hotel stays, car driving, to communicating and paying, everything we knew as normal has changed beyond recognition. To lead effectively in today ' s brave new world, you have to question EVERYTHING. For the first time in human history, knowledge is free and almost every boundary to communication has been lifted. This open source world has permanently altered the business landscape. And you can count on the fact that the pace of change will only accelerate. Yet... companies still rely on management tools and practices that were, at best, mildly effective in their heyday. In Open Source Leadership, Rajeev Peshawaria reveals the vision, insight, and practices he has used to help some of today ' s largest and most influential organizations meet the open source world head on. It all starts with asking the right questions: What ' s the most effective leadership style in a world of 24/7 connectivity? How has the very concept of leadership changed in the open source era? How do you inspire and reward performance in the " gig economy? " How do you measure engagement and effectively address the gaps? How can you lead innovation--quickly and continuously? Peshawaria reveals the answers to these questions--and they will surprise you. Based on his company ' s groundbreaking research spanning 28 countries, he concludes that traditional industrial age thinking needs a massive upgrade to successfully navigating the brave new world of business. Open Source Leadership rewrites the rules of management, giving you a unique look at the most common misperceptions, illusions, and downright wrong information you ' ve been getting about what works and what doesn ' t. It provides a new, counterintuitive model for seizing competitive edge in any industry. Among other issues the book argues convincingly that " positive autocracy " must replace democratic leadership; talent and innovation are abundant not scarce; early identification of high-potentials is counter-productive; and setting employees free to do as little as they want will increase productivity.

Objectives: The study drives to assess and scrutinize Beximco Pharmaceutical Ltd's critical aspects of financial performance for the period of 2004-05 and 2013-14. **Methods/statistical analysis:** This study has followed a triangulation strategy consists of expert interview, literature evaluation, and statistical analysis is utilized to justify the financial performance trends of Beximco. Phamra ltd. Data from secondary sources are obtained, i.e. Beximco Pharmaceuticals Ltd's annual report. This research used statistical technique such as Spearman's rank correlation analysis, multiple correlation analysis, and Kendall's coefficient of concordance analysis, but the Chi-square test and run test were used at appropriate positions. **Findings:** Run test result shows that the current ratio (CR), return turnover ratio (RTR), inventory turnover ratio (ITR), long-term turnover of assets turnover ratio (LAT), and debt equity ratio are random, but Kendall's concordance analysis coefficient displays that CR, RTR, ITR, LAT, and WTR are significant in evaluating Beximco Pharmaceuticals Ltd's financial performance patterns. The study recommended that the company concerned gradually improve its overall financial position by managing its assets efficiently. **Application:** Findings emanating of the study is applicable for pharmaceutical companies; proper management of long-term asset and working capital management increases overall profitability of a firm and helps to future critical financial decision.

The finance sector in Bangladesh remains at an early stage of development. It needs to be strengthened and invigorated so it can fulfill its dual role of reducing poverty and promoting economic growth. This book presents a comprehensive analysis of the finance sector in Bangladesh and pinpoints areas of weakness in its subsectors.

Anderson and Vincze prepare students to recognize, embrace, and manage change by focusing on higher-level strategic issues and decision making in marketing management. The Second Edition features an integrated approach that combines both theory and cases in a single volume for easy reference and evaluation. One of the most up-to-date collections available, the comprehensive cases have all been class-tested and cover a range of small, medium, and large organizations across several industries and environments. Mini-cases offer more choices for flexible casework in and outside of class and the Marketing Plan appendix can be assigned throughout the semester. Experiential exercises encourage students to practice applying chapter concepts to real-world scenarios.

A Scrutiny on Beximco Pharmaceutical Ltd

Across the world, developing countries are attempting to balance the international standards of intellectual property concerning pharmaceutical patents against the urgent need for accessible and affordable medicines. In this timely and necessary book, Monirul Azam examines the attempts of several developing countries to walk this fine line. He evaluates the experiences of Brazil, China, India, and South Africa for lessons to guide Bangladesh and developing nations everywhere. Azam's legal expertise, concern for public welfare, and compelling grasp of principal case studies make Intellectual Property and Public Health in the Developing World a definitive work. The developing world is striving to meet the requirements of the World Trade Organization's TRIPS Agreement on intellectual property. This book sets out with lucidity and insight the background of the TRIPS Agreement and its implications for pharmaceutical patents, the consequences for developing countries, and the efforts of certain representative nations to comply with international stipulations while still maintaining local industry and public health. Azam then brings the weight of this research to bear on the particular case of Bangladesh, offering a number of specific policy recommendations for the Bangladeshi government—and for governments the world over. Intellectual Property and Public Health in the Developing World is a must-read for public policy-makers, academics and students, non-governmental organizations, and readers everywhere who are interested in making sure that developing nations meet the health care needs of their people.

Historically, the study of corporate social responsibility (CSR) reporting has largely been within the context of Western economies. However, in the wake of highly publicized incidents such as Bhopal and the struggle of the Ogoni people in Nigeria, many large corporations now claim to be taking steps to improve their environmental and social performance within developing countries. Using the lens of stakeholder theory, this book examines whether the current practice of CSR reporting in developing countries is motivated by a desire to discharge accountability to all relevant stakeholders or whether it is being driven by the imperative of advancing corporate economic interests. While concepts like CSR reporting have become more fashionable, they vary widely in different national contexts; this book therefore clarifies the types and roles of CSR reporting and the underlying corporate motivations. The author considers the current CSR reporting practices in a number of developing countries, with particular attention given to illuminating a case study of Bangladesh.

The availability of geographically referenced data, the proliferation of geospatial technologies, and advances in spatial analytics have been a boom to applied geographers. Geospatial Technologies and Advancing Geographic Decision Making: Issues and Trends is a resource for private and public sector applied geographers engaged as geospatial technicians, analysts, scientists, and managers. It includes chapters that highlight the use of geospatial technologies to explore applied geographic issues and problems; studies from economic geography, urban geography, population geography, medical geography, political geography, geography of education, geography of crime, and transportation geography are considered.

The Discreet Pleasures of Rejection

Another mordantly hysterical tale from the author of the cult favorite How I Became Stupid A funny yet poignant tour of one young man's existential crisis. The Discreet Pleasures of Rejection is another short novel from France's Martin Page. Virgil comes home from work one day to a message on his answering machine-his girlfriend is breaking up with him. This news should be devastating, but instead it's deeply troubling, because Virgil doesn't know the woman and doesn't have any memory of being in a relationship with her. The event sends Virgile into a tailspin of unrelenting self-analysis, causing him to question his memory, his sanity, even his worth as a lover. The seamless translation by Bruce Benderson perfectly captures Page's delicate, witty style, bringing this audacious gem of a novel to English-speaking audiences.

These volumes assemble contributions presented at the XIX International Colloquium on Latin Linguistics in Munich (2017). They embrace essential topics of Latin linguistics with different theoretical and methodological approaches: The volumes contain chapters on Latin lexicography, etymology, morphology, phonology, Greek-Latin language contact, Latin syntax, semantics, and discourse-pragmatics.

This is volume 3 of a three-volume publication on Bangladesh's trade prospects. Bangladesh's ambition is to build on its very solid growth and poverty reduction achievements, and accelerate growth to become a middle income country by 2021, and share prosperity more widely amongst its citizens. This includes one of its greatest development challenges: to provide gainful employment to the over 2 million people that will join the labor force each year over the next decade. Moreover, only 54.1 million of its 94 million working age people are employed. Bangladesh needs to use its labor endowment even more intensively to increase growth and, in turn, to absorb the incoming labor. The Diagnostic Trade Integration Study identifies the following actions centered around four pillars to sustain and accelerate export growth: (1) breaking into new markets through a) better trade logistics to reduce delivery lags ; as world markets become more competitive and newer products demand shorter lead times, to generate new sources of competitiveness and thereby enable market diversification; and b) better exploitation of regional trading opportunities in nearby growing and dynamic markets, especially East and South Asia; (2) breaking into new products through a) more neutral and rational trade policy and taxation and bonded warehouse schemes; b) concerted efforts to spur domestic investment and attract foreign direct investment, to contribute to export promotion and diversification, including by easing the energy and land constraints; and c) strategic development and promotion of services trade; (3) improving worker and consumer welfare by a) improving skills and literacy; b) implementing labor and work safety guidelines; and c) making safety nets more effective in dealing with trade shocks; and (4) building a supportive environment, including a) sustaining sound macroeconomic fundamentals; and b) strengthening the institutional capacity for strategic policy making aimed at the objective of international competitiveness to help bring focus and coherence to the government's reform efforts. This third volume provides in-depth analysis of eight different manufacturing and services sectors of the Bangladeshi economy, which help to illustrate the thematic analysis of volume 2 and ground it in sector experiences. Besides pointing to cross-cutting themes, the analysis also highlights some specific issues and actions that could help relieve constraints to faster export growth in these sectors.

From an unpromising start as 'the basket-case' to present day plaudits for its human development achievements, Bangladesh plays an ideological role in the contemporary world order, offering proof that the neo-liberal development model works under the most testing conditions. How were such rapid gains possible in a context of chronically weak governance? The Aid Lab subjects this so-called 'Bangladesh paradox' to close scrutiny, evaluating public policies and their outcomes for poverty and development since Bangladesh's independence in 1971. Countering received wisdom that its gains owe to an early shift to market-oriented economic reform, it argues that a binding political settlement, a social contract to protect against the crises of subsistence and survival, united the elite, the masses, and their aid donors in the wake of the devastating famine of 1974. This laid resilient foundations for human development, fostering a focus on the poorest and most precarious, and in particular on the concerns of women. In chapters examining the environmental, political and socioeconomic crisis of the 1970s, the book shows how the lessons of the famine led to a robustly pro-poor growth and social policy agenda, empowering the Bangladeshi state and its non-governmental organizations to protect and enable its population to thrive in its engagements in the global economy. Now a middle-income country, Bangladesh's role as the world's laboratory for aided development has generated lessons well beyond its borders, and Bangladesh continues to carve a pioneering pathway through the risks of global economic integration and climate change.

Open Source Leadership: Reinventing Management When There's No More Business as Usual

In this book, Shank and Govindarajan demonstrate how strategic cost management - an analytical framework which relates meaningful accounting information to a firm's business strategy - is changing accounting practices in leading companies. Using case studies, including Ciba-Geigy, Ford, Motorola and Texas Instruments, they show how the tools of strategic cost management - value chain analysis, strategic positioning analysis and cost driver analysis - provide a sustainable competitive advantage over companies whose cost systems are in disarray.

Reconfiguring Global Health Innovation presents the findings of multi-year research, contrasting experiences of different latecomer countries in building health innovation systems to cater to local needs. It analyses the emerging industrial structures in health innovation as more and more latecomer countries are foraying into what is a highly difficult and technologically intensive sector, with the aim of finding ways and means to balance these promising developments with public health needs worldwide. The bookpresents empirical findings from six countries across Asia and Africa on health innovation, namely, India, Bangladesh, Vietnam, Kenya, Tanzania and Nigeria. The book concludes that the growth of knowledge and the accumulation of capabilities influence the ability of a country to generate wealth.

Managing Drug Supply (MDS) is the leading reference on how to manage essential medicines in developing countries. MDS was originally published in 1982; it was revised in 1997 with over 10,000 copies distributed in over 60 countries worldwide. The third edition, *MDS-3: Managing Access to Medicines and Health Technologies* reflects the dramatic changes in politics and public health priorities, advances in science and medicine, greater focus on health care systems, increased donor funding, and the advent of information technology that have profoundly affected access to essential medicines over the past 14 years. Nearly 100 experts from a wide range of disciplines and virtually every corner of the world have contributed to this third edition. In addition to many new country studies, references, and extensive revisions, *MDS-3* offers new chapters on areas such as pharmaceutical benefits in insurance programs, pricing, intellectual property, drug seller initiatives, and traditional and complementary medicine. The revisions and new chapters echo the wide variety of issues that are important to health practitioners and policy makers today. *MDS-3* will be a valuable tool in the effort to ensure universal access to quality medicines and health technologies and their appropriate use.

The COVID-19 pandemic is inflicting high and rising human costs worldwide, and the necessary protection measures are severely impacting economic activity. As a result of the pandemic, the global economy is projected to contract sharply by -3 percent in 2020, much worse than during the 2008-09 financial crisis. In a baseline scenario--which assumes that the pandemic fades in the second half of 2020 and containment efforts can be gradually unwound--the global economy is projected to grow by 5.8 percent in 2021 as economic activity normalizes, helped by policy support. The risks for even more severe outcomes, however, are substantial. Effective policies are essential to forestall the possibility of worse outcomes, and the necessary measures to reduce contagion and protect lives are an important investment in long-term human and economic health. Because the economic fallout is acute in specific sectors, policymakers will need to implement substantial targeted fiscal, monetary, and financial market measures to support affected households and businesses domestically. And internationally, strong multilateral cooperation is essential to overcome the effects of the pandemic, including to help financially constrained countries facing twin health and funding shocks, and for channeling aid to countries with weak health care systems.
