TEACHING CHILDREN ABOUT HEALTH takes a case study approach and is written especially for the elementary classroom teacher. The goal of this text is to help teachers

become more knowledgeable about and comfortable with health topics, to be more reflective in their practice of teaching about health, and better equipped with activities for incorporating health subjects into their curriculum. Each chapter considers health from a physical, social, and

programs do not have separate health education experiences for students, and since these are the primary learning years, it is the responsibility of the classroom teacher to initiate learning about health.

This book disseminates original research on learning in and from

practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the

capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'.

However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their

own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on

research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges

faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where “safe spaces” or laboratories are created for student teachers to learn and grow professionally. These could either be

simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of
