Air Force Cop An Autobiography By: Kelly D. Harrison

The enforcement of law in the US Armed Forces is covered by the Uniform Code of Military Justice and, when applicable, Title 18 of the US Code. There are other regulations and directives that can result in punitive action. The US Armed Forces is a US taxpayer funded enterprise with the US Army and US Navy almost as old as the nation itself. Crimes against property in the armed forces are not like that of breaking into a privately owned jewelry store in New York City, since all property "owned" by the military branches is property of the US Government. Military members and others who damage, destroy or steal property of the US Government and fellow military

members are dealt with harshly. This includes those military members and civilians who commit murder, rape, acts of serious bodily injury and other “index crimes” such as auto theft, arson, kidnapping, etc., within the jurisdiction of the federal government. The US Armed Forces have several consolidated confinement facilities and the US Disciplinary Barracks at Ft. Leavenworth, Kansas. Each military branch has their own police and investigative agencies for dealing with crimes against property and people. In the US Air Force, there are the Security Forces (previously known as Air Police and Security Police) for protection of base resources, traffic control enforcement and investigation of misdemeanor

offenses. The Air Force Office of Special Investigations (AFOSI) is a cadre of enlisted, officer and civilian special agents (all with Federal Law Enforcement Officer status) who are highly trained in specialties such as forensics, fraud, counter-intelligence, polygraph, computer crimes, electronic technical support (hidden cameras, electronic sweeping for covert recording devices, etc.) and general crimes such as arson, homicides, child abuse along with every other imaginable offense against property and people.

With a foundation in Gestalt and Psychodynamic theory, the WDCT has been used widely throughout Europe, South America, and Japan, but only recently has become available in the United States. Initial scoring systems for the WDCT were considered cumbersome and lacked research-driven validation. In response to these factors, Alessandro Crisi, following years of clinical practice and research, developed the Crisi Wartegg System (CWS; 1998, 2007), a normed and standardized administration, scoring, and interpretation system for the WDCT. Over the past three decades, Dr. Crisi has refined and expanded the CWS through research, broadening the scope of the measure, and increasing the accessibility of the

answer unless we know our own truths, how our minds work, and why we feel the way we do about the world we live in. With that in mind, Henry Rathbun combines personal anecdotes with hypnosis methodologies, meditation, and ancient teachings in order to encourage others to embrace a simpler way to experience life. As a former professional hypnotist, Rathbun learned much living between two worlds: the subconscious minds of others and his own reality. While providing a glimpse into his personal experiences during a time when he
