What to do with the "Final Quarter" of your life, presumably post-retirement. Everything that those approaching (or in) retirement need to know but often are uncomfortable discussing or asking about. The author treats serious subjects with wit and from his own experiences, but he does not shy away from expressing opinions that may offend some readers, even as they encourage fresh thinking.

As part of the series Leadership and Executive Coaching, Corporate Emotional Intelligence is a seminal work for business communication, management and organisational behaviour in the 21st Century, setting a new precedent for business leadership and management books. It analyses how human behaviour is conditioned within corporate cultures, how managers come to adopt unconscious controlling habits that are counter-productive and which create cultures of fear. It shows how through the art of coaching and mentoring, breaking habits and personal development, transformational leadership within teams can result and, through theory and practise, shows us how to lead when managing people in the business environment. Unique to this leadership coaching book is the introduction of the Corporapath- the Corporate Hostage and to the anxiety disorder CTSD - Corporate Traumatic Stress Disorder, yielding a profound new level of self-awareness for all corporate citizens. Success now requires a different kind of business intelligence: IQ + EQ is no longer sufficient. We now need CEQ - Corporate Emotional Intelligence - the ability to read, understand and manage the psychological states and behaviours that are unique to corporate cultures and emotionally intelligent leadership.

This guide covers every aspect of prostate cancer, from potential causes including diet to tests for diagnosis, curative treatment, and innovative means of controlling advanced stages of cancer.

LAMBDA LITERARY AWARD FINALIST • An audacious and wryly funny coming-of-age story about a pregnant pizza delivery girl who becomes obsessed with one of her customers. Eighteen years old, pregnant, and working as a pizza delivery girl in suburban Los Angeles, our charmingly dysfunctional heroine is deeply lost and in complete denial. She's grieving the death of her father, avoiding her supportive mom and loving boyfriend, and flagrantly ignoring her future. Her world is further upended when she becomes obsessed with Jenny, a stay-at-home mother new to the neighborhood, who comes to depend on weekly deliveries of pickled-covered pizzas for her son's happiness. As one woman looks

toward motherhood and the other toward middle age, the relationship between the two begins to blur in strange, complicated, and ultimately heartbreaking ways.

This theory-focused casebook provides the reader with an overview of multiple counseling theories and utilizes specific cases representing a variety of clients to demonstrate the integration of theory in clinical counseling and social work practice. Through the use of dynamic cases, the reader is shown how theory informs day-to-day practice. Each theoretical case study includes a section on cultural considerations and discussion questions: Object Relations Theory: The Case of Elyse Self Psychology Theory: The Case of Evan Person-Centered Therapy: The Case of Tommy Solution-Focused Brief Therapy: The Case of Jim Relational Cultural Theory: The Case of Monica Systems Theory: The Case of Esperanza Experiential Therapy: The Case of Sam Discovering Theory in Clinical Practice: A Casebook for Clinical Counseling and Social Work Practice is an essential text for instructors to teach the development of a theoretical foundation that easily integrates into core topics of relevance for graduate students in social work, counseling, psychology, marriage and family therapy, and human behavior who intend to work with a diverse set of client populations. The book also will be a great asset to early-career practitioners and clinical supervision participants who are continuing to build a professional working template of skills in both theory and practice as they conceptualize patient problems and develop treatment plans.

Teaches scientists and engineers leadership skills and problem solving to facilitate management of team members, faculty, and staff This textbook introduces readers to open-ended problems focused on interactions between technical and nontechnical colleagues, bosses, and subordinates. It does this through mini case studies that illustrate

scenarios where simple, clear, or exact solutions are not evident. By offering examples of dilemmas in technical leadership along with selected analyses of possible ways to address or consider such issues, aspiring or current leaders are made aware of the types of problems they may encounter. This situational approach also allows the development of methodologies to address these issues as well as future variations or new issues that may arise. Leadership by Engineers and Scientists guides and facilitates approaches to solving leadership/people problems encountered by technically trained individuals. Students and practicing engineers will learn leadership by being asked to consider specific situations, debate how to deal with these issues, and then make decisions based on what they have learned. Readers will learn technical leadership fundamentals; ethics and professionalism; time management; building trust and credibility; risk taking; leadership through questions; creating a vision; team building and teamwork; running an effective meeting; conflict management and resolution; communication; and presenting difficult messages. Describes positive traits and characteristics that technically-trained individuals bring to leadership positions, indicates how to use these skills, and describes attitudes and approaches necessary for effectively serving as leaders Covers negative traits and characteristics that can be detrimental when applied to dealing with others in their role as leaders Discusses situations and circumstances routinely encountered by new and experienced leaders of small teams Facilitates successful transitions into leadership and management positions by individuals with technical backgrounds Indicates how decisions can be reached when constraints of different personalities, time frames, economics, and organization politics and culture inhibit consensus Augments technical training by building awareness of the criticality of people skills in effective leadership Leadership by Engineers and Scientists is an excellent text for technically trained individuals who are considering, anticipating, or have recently been promoted to formal leadership positions in industry or academia. Becoming a manager for the first time means mastering a new set of business and personal skills. HBR's 10 Must Reads for New Managers Collection offers the ideas and strategies to help get you there.

Included in this set are HBR's 10 Must Reads for New Managers, HBR's 10 Must Reads on Managing People, HBR's 10 Must Reads on Managing Yourself, and HBR's 10 Must Reads on Managing Across Cultures. This unique compilation offers insights from world-class experts on the topics most important to your success as a new manager, including assessing your team and enhancing its performance; developing your

emotional intelligence and persuasion skills; navigating relationships with your employees, bosses, and peers; dealing with conflict; giving effective feedback; managing diverse teams; and fortifying your own physical and mental energy. The collection includes forty articles selected by HBR's editors from renowned thought leaders including W. Chan Kim, Renee Mauborgne, and Daniel Goleman and features the indispensable article "Managing Oneself," by Peter F. Drucker. It's time to develop the mindset and presence to successfully manage others for the first time. HBR's 10 Must Reads for New Managers Collection will help you do just that. HBR's 10 Must Reads series is the definitive collection of ideas and best practices for aspiring and experienced leaders alike. These books offer essential reading selected from the pages of Harvard Business Review on topics critical to the success of every manager. Each book is packed with advice and inspiration from leading experts such as Clayton Christensen, Rosabeth Moss Kanter, John Kotter, Michael Porter, Theodore Levitt, and Rita Gunther McGrath. In the next few years the world will be facing a huge talent shortage. Demographic trends in America, Europe, Russia, and Japan are reducing the pool of new workers. As the need for talent grows, China's and India's educational systems won't be able to produce enough qualified graduates for themselves, let alone the rest of the world. But the heart of the problem is that the education-to-employment system worldwide is badly outmoded. We're not producing graduates with the kinds of technical, communications, and thinking skills needed in the 21st century. In *Winning the Global Talent Showdown*, Ed Gordon surveys the sorry state of the world talent pipeline, with separate chapters on the Americas, Asia, and Europe. Each region faces its own challenges, yet the result is the same: a dramatic shortage of workers who can function in what Gordon calls our "cyber-mental" age. But this is fundamentally a book about solutions. Gordon argues that we need to completely reinvent our talent-creation system—and some pioneering efforts are already underway. He describes dozens of "gateways to the future," innovative partnerships in which local governments, schools, businesses, labor unions, parents, training organizations, community activists, and others are collaborating to develop completely new approaches to education. Based on personal experience, Gordon outlines how concerned citizens can establish these partnerships in their own communities. And he looks down the road to 2020, explaining how we can build on the best of these new ideas so that the jobs pipeline flows freely again. Like every parent of a disabled child, Randy Lewis fears for the future of his son. People like Austin need the security of a job. Randy was a senior executive at one of the largest and fastest growing retailers in America. If his distribution centres did not deliver efficiently and economically, Walgreens could not serve its customers and would lose out to competitors. Randy's motto is what's the use of having power if you don't use it to do good? He set out to create an inclusive workplace where people with disabilities could thrive in jobs with equal pay and conditions, held to the same standards as those without disabilities. *No Greatness without Goodness* tells how Randy and his team achieved

their goal, the impact it had, and how companies throughout the world like Boots and Marks & Spencer have been inspired by this example.

Choosing Leadership is a new take on executive development that gives everyone the tools to develop their leadership skills. In this workbook, Dr. Linda Ginzel, a clinical professor at the University of Chicago's Booth School of Business and a social psychologist, debunks common myths about leaders and encourages you to follow a personalized path to decide when to manage and when to lead. Thoughtful exercises and activities help you mine your own experiences, learn to recognize behavior patterns, and make better choices so that you can create better futures. You'll learn how to: Define leadership for yourself and move beyond stereotypes Distinguish between leadership and management and when to use each skill Recognize the gist of a situation and effectively communicate it with others Learn from the experience of others as well as your own Identify your "default settings" and become your own coach And much more Dr. Linda Ginzel is a clinical professor of managerial psychology at the University of Chicago's Booth School of Business and the founder of its customized executive education program. For three decades, she has developed and taught MBA and executive education courses in negotiation, leadership capital, managerial psychology, and more. She has also taught MBA and PhD students at Northwestern and Stanford, as well as designed customized educational programs for a number of Fortune 500 companies. Ginzel has received numerous teaching awards for excellence in MBA education, as well as the President's Service Award for her work with the nonprofit Kids In Danger. She lives in Chicago with her family.

Using current examples and step-by-step behavioral models, the Seventh Edition of Leadership: Theory, Application, and Skill Development equips your students with the leadership skills they need to thrive in today's business world.

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy

of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. “ Some of the key concepts discerned in the study, ” comments Jim Collins, “fly in the face of our modern business culture and will, quite frankly, upset some people. ” Perhaps, but who can afford to ignore these findings?

You want the most important ideas on management all in one place. Now you can have them—in a set of HBR's 10 Must Reads, available as a 7-volume paperback boxed set or as an ebook set. We've combed through hundreds of Harvard Business Review articles on change, leadership, strategy, managing people, and managing yourself and selected the most important ones to help you maximize your own and your organization's performance. The HBR's 10 Must Reads Boxed Set includes seven bestselling collections: HBR's 10 Must Reads on Leadership (ways you can transform yourself from a good manager into an extraordinary leader); HBR's 10 Must Reads on Managing Yourself (the path to your own professional success starts with a critical look in the mirror and what you see there—your greatest strengths and deepest values—are the foundations you must build on); HBR's 10 Must Reads on Strategy (will help galvanize your organization's strategy development and execution); HBR's 10 Must Reads on Change (70% of all change initiatives fail, but the odds turn in your company's favor once you understand that change is a multi-stage process—not an event—and that persuasion is key to establishing a sense of

urgency, winning support, and silencing naysayers); HBR's 10 Must Reads on Managing People (will help you determine what really motivates people, how to deal with problem employees, and how to build an effective team); HBR's 10 Must Reads: The Essentials (which brings together the best thinking from management's most influential experts); and HBR's 10 Must Reads on Emotional Intelligence (the trait that is twice as important as other competencies in determining outstanding leadership). HBR's 10 Must Reads Boxed Set with Bonus Emotional Intelligence also makes a smart gift for your team, colleagues, or clients. The ebook set is available in PDF, ePub and mobi formats.

And the Leader Is... Gareth Chick's second leadership coaching book, is a critical mentoring guide in business culture, management and organisational behaviour, showing us how to lead effectively with heightened Corporate Emotional Intelligence (CEQ). Drawing on his 40 year experience in every aspect of the Corporate World, from CEO to performance coaching; from manager to trainer, Gareth Chick covers the fundamentals of emotional intelligence coaching to create high performance teams through transformational leadership and authentic change management. In his first book Corporate Emotional Intelligence Gareth provided a compelling analysis of Corporate Psychology; giving us a profound new understanding of how working in the business environment can cause thoroughly decent human beings to behave in unnatural and inhuman ways. The book concluded by outlining the 4 Pillars of Corporate Emotional Intelligence (CEQ), equipping us with personal development strategies to raise our leadership effectiveness. And the Leader Is... completes Gareth's personal corporate life mission to give hard pressed modern managers the practical competencies to be more effective leaders, more fulfilled and more sustainable. While each of his two leadership books stands on its own merits, the combination of the two forms arguably the most important work on corporate leadership since Dr Edwards Demings' writings of the late 20th Century. It is fitting therefore that the Foreword is written by Tony Barnes, the last surviving member of the Deming team that revolutionised Japanese business and manufacturing practices in the 1950s and 1960s. "A bible of common sense; a book that cuts to the core of achieving great business results whilst caring for the people you lead." Fionnuala Meehan, VP EMEA Global Marketing Solutions and Head of Ireland, Google "It's like no other book I've ever experienced. It's intensely personal - the insights, the examples, the honesty. This is much more than a book. It's a deep journey." Alison Platt, Non Executive Director, Tesco Plc "I have read many great books on coaching, leadership and teams. However, this is even greater, with all of these areas more expertly placed in one

book". Becky Ivers, People Director - Expansion, Heathrow Airport "I was transported into 'And the Leader is....Tina'. Easy to read 'brain food' providing simple strategies to unlock human potential. This book is becoming my own personal coach." Tina Jennings, HR Director, Global Consumer Brands, Walgreens Boots Alliance

The founders of a beauty brand share stories, inspiration, and advice on how entrepreneurs can grow their companies rapidly, ethically, and environmentally responsibly, recounting the decisions that have affected their partnership.

We are entering the age of sustainability - a business era where every company, big and small, must adapt its way of doing business to meet the realities of climate change, a finite supply of natural resources, evolving attitudes about inequality, increasing digitisation and automation. At the same time companies must meet the demands of consumers as they adjust to this rapidly changing way of life. Supercharging this change in consumer behaviour is social media - a communications revolution that is democratising and disrupting society in ways never seen before. In this book, Matthew Yeomans explains why embracing sustainability is key to helping companies articulate their sense of purpose (and their reason to exist) in a world where social media is eroding trust in all institutions. The book shows how social media has made sustainability a mainstream concern for all society, how it compelled companies to be more authentic and accountable in their actions and how it will continue to shape how companies communicate the importance of sustainability to all of society. This book is a powerful guide for both communication and marketing professionals in business, especially Fortune 500, FTSE 250 companies and agencies, on how to use social media to communicate with their audiences and stakeholders in an authentic way. It is also a guide/text book for the growing field of sustainability communication in higher education.

A Casebook for Clinical Counseling and Social Work Practice

A Novel

People want to buy from, work for, and partner with companies that matter. So how do you build a company that matters? Companies

and people that matter have successfully become the obvious choice in the hearts and minds of their customers, their employees, and their communities. They elevate themselves by consistently finding ways to solve the most pressing needs their markets face. The result? They create more value year after year and build a sustainable, differentiated organization. In *Matter*, Peter Sheahan and Julie Williamson show you how to identify the place where you can create the most value—your edge of disruption—at the intersection of old and new, where your existing profits, reach, and reputation enable you to create the markets of the future. This is the place where the most important problems are solved and where the fewest people can solve them. Your edge of disruption is where your opportunity to matter is found. *Matter* uses extensive case studies of real companies that have successfully become the obvious choice in their markets—from high-profile corporations like Adobe and Burberry to lesser-known brands like Littlefield and BlueShore Financial. Their stories define innovative and impactful approaches to business that you can use to influence and partner with the right customers and clients to win in our radically changing world. Through their journeys, you will find the inspiration and courage to lean in to complexity and solve the higher value problems that matter most. Don't just read this book—use it to identify and act on opportunities to create the most value and accelerate your own journey to becoming a person and a company that matters.
