This book represents the first multidisciplinary scientific work on a deep volcanic maar lake in comparison with other similar temperate lakes. The syntheses of the main characteristics of Lake Pavin are, for the first time, set in a firmer footing comparative approach, encompassing regional, national, European and international aquatic science contexts. It is a unique lake because of its permanently anoxic monimolimnion, and furthermore, because of its small surface area, its substantially low human influence, and by the fact that it does not have a river inflow. The book reflects the scientific research done on the general limnology, history, origin, volcanology and geological environment as well as on the geochemistry and biogeochemical cycles. Other chapters focus on the biology and microbial ecology whereas the sedimentology and paleolimnology are also given attention. This volume will be of special interest to researchers and advanced students, primarily in the fields of limnology, biogeochemistry, and aquatic ecology.

This in-depth analysis of French trade in Istanbul in the eighteenth century deals extensively with the nature and mechanisms of this trade, Ottoman monetary and financial history, bills of exchange, Ottoman traders and guilds, and Ottoman economic integration with Europe.

In this book, the distinguished scholar Hanna Batatu presents a comprehensive analysis of the recent social, economic, and political evolution of Syria's peasantry, the segment of society from which the current holders of political power stem. Batatu focuses mainly on the twentieth century and, in particular, on the Ba`th movement, the structures of power after the military coup d'état of 1963, and the era of ʿîvfiz al-Asad, Syria's first ruler of peasant extraction. Without seeking to prove any single theory about Syrian life, he offers a uniquely rich and detailed account of how power was transferred from one demographic group to another and how that power is maintained today. Batatu begins by examining social differences among Syria's peasants and the evolution of their mode of life and economic circumstances. He then scrutinizes the peasants' forms of consciousness, organization, and behavior in Ottoman and Mandate times and prior to the Ba`thists' rise to power. He explores the rural aspects of Ba`thism and shows that it was not a single force but a plurality of interrelated groups--prominent among them the descendants of the lesser rural notables--with different social goals and mental horizons. The book also provides a perceptive account of President Asad, his personality and conduct, and the characteristics and power structures of his regime. Batatu draws throughout on a wide range of socioeconomic and biographical information and on personal interviews with Syrian peasants and political leaders, offering invaluable insights into the complexities of a country and a regime that have long been poorly understood by outsiders.

This valuable collection of essays brings leading Middle Eastern scholars together in one volume and provides an unparalleled view of the modern Middle East. Covering two centuries of change, from 1789 to the present, the selection is carefully designed for students and is the only available text of its kind. It will also appeal to anyone with a general interest in the Middle East. The book is divided into four sections: Reforming Elites and Changing Relations with Europe, 1789-1918; Transformations in Society and Economy, 1789-1918; The Construction of Nationalist Ideologies and Politics up to the 1950s; and The Middle East since the Second World War. “My standpoint is then one of tension, a tension that I bear in my flesh and in my intellectual and spiritual life: I heard the two voices. And it is the weight of this tension that has pressed me to think and study about it, to teach about it, and eventually to write about it. It is the Jewish-Christian tension in my flesh and in my scholarly and professional life that has given birth to this book. In echo to Israel Zangwill, I will set my questions straight: Were Jesus and Moses indeed irreconcilable? Are our theological and historical clichés in agreement with the original intention of prophetic revelation and with what indeed took place in history?”

—From the Preface: The Two Jews

In Belated Travelers, Ali Behdad offers a compelling cultural critique of nineteenth-century travel writing and its dynamic function in European colonialism. Arriving

too late to the Orient, at a time when tourism and colonialism had already turned the exotic into the familiar, late nineteenth-century European travelers to the Middle East experienced a sense of belatedness, of having missed the authentic experience once offered by a world that was already disappearing. Behdad argues that this nostalgic desire for the other contains an implicit critique of Western superiority, a split within European discourses of otherness. Working from these insights and using analyses of power derived from Foucault, Behdad engages in a new critique of orientalism. No longer viewed as a coherent and unified phenomenon or a single developmental tradition, it is seen as a complex and shifting field of practices that has relied upon its own ambivalence and moments of discontinuity to ensure and maintain its power as a discourse of dominance. Through readings of Flaubert, Nerval, Kipling, Blunt, and Eberhardt, and following the transition in travel literature from travelog to tourist guide, Belated Travelers addresses the specific historical conditions of late nineteenth-century orientalism implicated in the discourses of desire and power. Behdad also views a broad range of issues in addition to nostalgia and tourism, including transvestism and melancholia, to specifically demonstrate the ways in which the heterogeneity of orientalism and the plurality of its practice is an enabling force in the production and transformation of colonial power. An exceptional work that provides an important critique of issues at the forefront of critical practice today, Belated Travelers will be eagerly awaited by specialists in nineteenth-century British and French literatures, and all concerned with colonial and post-colonial discourse. Featuring 118 objects excavated from the city's ruins, all reproduced in full color, Antioch: The Lost Ancient City recreates the spatial sensation, visual splendor, and cultural richness of this urban center."--Jacket.

The colonnaded axes define the visitor's experience of many of the great cities of the Roman East. How did this extraordinarily bold tool of urban planning evolve? The street, instead of remaining a mundane passage, a convenient means of passing from one place to another, was in the course of little more than a century transformed in the Eastern provinces into a monumental landscape which could in one sweeping vision encompass the entire city. The colonnaded axes became the touchstone by which cities competed for status in the Eastern Empire. Though adopted as a sign of cities' prosperity under the Pax Romana, they were not particularly 'Roman' in their origin. Rather, they reflected the inventiveness, fertility of ideas and the dynamic role of civic patronage in the Eastern provinces in the first two centuries under Rome. This study will concentrate on the convergence of ideas behind these great avenues, examining over fifty sites in an attempt to work out the sequence in which ideas developed across a variety of regions-from North Africa around to Asia Minor. It will look at the phenomenon in the context of the consolidation of Roman rule.

The most complete account of the classical city of Antioch, this study incorporates the findings of the excavations of 1932-1939. Dr. Downey, who participated in the excavations, tells the story of the rise and fall of Antioch, with nineteen excursions, closely integrated with the text, affording a rich store of data on travel books, maps, and information on the walls, stadia, churches, etc. of the city. The year 2000, a bench-mark date in Christian civilization, prompted researchers to offer a scholarly look at the significance of religion in our civilization, past and present. The religious factor is examined from various scientific viewpoints--ethnological, historical, sociological, archaeological. It is seen that God, or whatever one might prefer to call him, or

her, has historically assumed many different shapes and sizes in our civilization and that his cultural presence has impacted significantly upon our culture, art, and way of thinking.

From late fourth century BC Seleucid enclave to capital of the Roman east, Antioch on the Orontes was one of the greatest cities of antiquity and served as a hinge between east and west. This book draws on a century of archaeological fieldwork to offer a new narrative of Antioch's origins and growth, as well as its resilience, civic pride, and economic opportunism. Situating the urban nucleus in the context of the rural landscape, this book integrates hitherto divorced cultural basins, including the Amuq Valley and the Massif Calcaire. It also brings into focus the archaeological data, thus proposing a concrete interpretative framework that, grounded in the monuments of Antioch, enables the reader to move beyond text-based reconstructions of the city's history. Finally, it considers the interaction between the environment and the people of the city who shaped this region and forged a distinct identity within the broader Greco-Roman world.

Why did Syrian political life continue to be dominated by a particular urban elite even after the dramatic changes following the end of four hundred years of Ottoman rule and the imposition of French control? Philip Khoury's comprehensive work discusses this and other questions in the framework of two related conflicts--one between France and the Syrian nationalists, and the other between liberal and radical nationalism.
