A New York Times Notable Book: A psychologist's "gripping and thought-provoking" look at how and why our brains sometimes fail us (Steven Pinker, author of *How the Mind Works*). In this intriguing study, Harvard psychologist Daniel L. Schacter explores the memory miscues that occur in everyday life, placing them into seven categories: absent-mindedness, transience, blocking, misattribution, suggestibility, bias, and persistence. Illustrating these concepts with vivid examples—case studies, literary excerpts, experimental evidence, and accounts of highly visible news events such as the O. J. Simpson verdict, Bill

*"This book is designed to help students
organize their thinking about psychology
at a conceptual level. The focus on
behaviour and empiricism has produced a
text that is better organized, has fewer
chapters, and is somewhat shorter than
many of the leading books. The beginning
of each section includes learning
objectives; throughout the body of each
section are key terms in bold followed by
their definitions in italics; key*
