Today's era of economic crisis has sent a powerful message: The age of "mercenary" capitalism is ending. We must finally embark on a new age of sustainable, stakeholder-based capitalism. While enlightened executives and policymakers understand the critical need for change, few have tangible plans for making it happen. In Capitalism at the Crossroads: Next Generation Business Strategies for a Post-Crisis World, Third Edition, Stuart L. Hart presents new strategies for identifying sustainable products, technologies, and business models that will drive urgently needed growth and help solve social and environmental problems at the same time. Drawing on his experience consulting with top companies and NGOs worldwide, Hart shows how to craft your optimal sustainability strategy and overcome the limitations of traditional "greening" approaches. In this edition, he presents new and updated case studies from the United States and around the world, demonstrating what's working and what isn't. He also guides business leaders in building an organizational "infrastructure for sustainability"--one that can survive budgeting and boardrooms, recharging innovation and growth throughout your enterprise. Discover: · The new business case for pursuing sustainable capitalism · Sustainability strategies that go far beyond environmental sensitivity · How to fully embed your enterprise in the local context--and why you should · Tactics for making long-term sustainability work in a short-term world

God's Crucible: Islam and the Making of Europe, 570-1215

Next Generation Business Strategies for a Post-Crisis World

CompTIA Cybersecurity Analyst (CySA+) CS0-002 Cert Guide

From the two-time Pulitzer Prize–winning author, God's Crucible brings to life "a furiously complex age" (New York Times Book Review). Resonating as profoundly today as when it was first published to widespread critical acclaim a decade ago, God's Crucible is a bold portrait of Islamic Spain and the birth of modern Europe from one of our greatest historians. David Levering Lewis's narrative, filled with accounts of some of the most epic battles in world history, reveals how cosmopolitan, Muslim al-Andalus flourished—a beacon of cooperation and tolerance—while proto-Europe floundered in opposition to Islam, making virtues out of hereditary aristocracy, religious intolerance, perpetual war, and slavery. This masterful history begins with the fall of the Persian and Roman empires, followed by the rise of the prophet Muhammad and five centuries of engagement between the Muslim imperium and an emerging Europe. Essential and urgent, God's Crucible underscores the importance of these early, world-altering events whose influence remains as current as today's headlines.

In this thoroughly engaging book, Natalie Haynes brings her scholarship and wit to the most fascinating true stories of the ancient world. The Ancient Guide to Modern Life not only reveals the origins of our culture in areas including philosophy, politics, language, and art, it also draws illuminating connections between antiquity and our present time, to demonstrate that the Greeks and Romans were not so different from ourselves: is Bart Simpson the successor to Aristophanes? Do the Beckhams have parallel lives with The Satiricon's Trimalchio? Along the way Haynes debunks myths (gladiators didn't salute the emperor before their deaths, and the last words of Julius Caesar weren't "et tu, brute?") from Athens to Zeno's paradox, this irresistible guide shows how the history and wisdom of the ancient world can inform and enrich our lives today.
