This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space. This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature, with no guarantee of success or safety. Acclaimed scientist and sci-fi author John Brury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity. The resulting volume is as much a memoir as a work of history, sharing a behind-the-scenes view of an enterprise which eventually took men to the moon, missiles to the planets, and satellites to outer space. A classic work in the history of science, and described as “a good book on rocket stuff...that’s a really fun one” by SpaceX founder Elon Musk, readers will want to get their hands on this influential classic, available for the first time in decades.

Love and tragedy dominate book four of Virgil’s most powerful work, building on the violent emotions invoked by the storms, battles, warring gods, and monster-plagued wanderings of the epic’s opening. Destined to be the founder of Roman culture, Aeneas, nudged by the gods, decides to leave his beloved Dido, causing her suicide in pursuit of his historical destiny. A dark plot, in which erotic passion culminates in sex, and sex leads to tragedy and death in the human realm, unfolds within the larger horizon of a supernatural sphere, dominated by power-conscious divinities. Dido is Aeneas’ most significant other, and in their encounter Virgil explores timeless themes of love and loyalty, fate and fortune, the justice of the gods, imperial ambition and its victims, and ethnic differences. This course book offers a portion of the original Latin text, study questions, a commentary, and interpretative essays. Designed to stretch and stimulate readers, Ingo Gildenhard’s incisive commentary will be of particular interest to students of Latin at both A2 and undergraduate level. It extends beyond detailed linguistic analysis to encourage critical engagement with Virgil’s poetry and discussion of the most recent scholarly thought.

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

The moon landing of 1969 stands as an iconic moment for both the United States and humankind. The familiar story focuses on the Journey of the brave astronauts, who brought home Moon rocks and startling photographs. But Apollo’s full account includes the earthbound engineers, mounds of their crumpled paper, and smoldering metal shards of exploded engines. How exactly did the nation, step by difficult step, take men to the Moon and back? In The Apollo Chronicles, fifty years after the moon landing, author Brandon R. Brown, himself the son of an Apollo engineer, revisits the men and women who toiled behind the lights. He relays the defining twentieth-century project from its roots, bringing the engineers’ work and personalities to bright life on the page. Set against the backdrop of a turbulent American decade, the narrative whisks audiences through tense deadlines and technical miracles, from President John F. Kennedy’s 1961 challenge to NASA’s 1969 lunar triumph, as engineers confronted wave after wave of previously unthinkable challenges. Brown immerses readers in key physical hurdles—from building the world’s most powerful rockets to keeping humans alive in the hostile void of space—using language free of acronyms and technical jargon. The book also pulls back from the detailed tasks and asks larger questions. What did we learn about the Moon? And what can this uniquely innovative project teach us today?

The solar system most of grew up with included nine planets, with Mercury closest to the sun and Pluto at the outer edge. Then, in 2005, astronomer Mike Brown made the discovery of a lifetime: a tenth planet, Eris, slightly bigger than Pluto. But instead of adding one more planet to our solar system, Brown ’s find ignited a firestorm of controversy that culminated in the demotion of Pluto from real planet to the newly coined category of “dwarf” planet. Suddenly Brown was receiving hate mail from schoolchildren and being bombarded by TV reporters—all because of the discovery he had spent years searching for and a lifetime dreaming about. A heartfelt and personal journey filled with both humor and drama, How I Killed Pluto and Why It Had It Coming is the book for anyone, young or old, who has ever imagined exploring the universe—and who among us hasn ’t?

The only work to date to collect data gathered during the American and Soviet missions in an accessible and complete reference of current scientific and technical information about the Moon.

In his critically acclaimed bestseller Shadow Divers, Robert Kurson explored the depths of history, friendship, and compulsion. Now Kurson returns with another thrilling adventure — the stunning true story of one man ’s heroic odyssey from blindness into sight. Mike May spent his life crashing through. Blinded at age three, he defied expectations by breaking world records in downhill speed skiing, joining the CIA, and becoming a successful inventor, entrepreneur, and family man. He had never yearned for vision. Then, in 1989, a chance encounter brought startling news: a revolutionary stem cell transplant surgery could restore May ’s vision. It would allow him to drive, to read, to see his children ’s faces. He began to contemplate an astonishing new world. Would music still sound the same? Would sex be different? Would he recognize himself in the mirror? Would his marriage survive? Would he still be Mike May? The procedure was filled with risks, some of them deadly, others beyond May ’s wildest dreams. Even if the surgery worked, history was against him. Fewer than twenty cases were known worldwide in which a person gained vision after a lifetime of blindness. Each of those people suffered desperate consequences we can scarcely imagine. There were countless reasons for May to pass on vision. He could think of only a single reason to go forward: Whatever his decision, he knew it would change his life. Beautifully written and thrillingly told, Crashing Through is a journey of suspense, daring, romance, and insight into the mysteries of vision and the brain. Robert Kurson gives us a fascinating account of one man ’s choice to explore what it means to see — and to truly live.

Based on Stanford University psychologist Kelly McGonigal’s wildly popular course “The Science of Willpower,” The Willpower Instinct is the first book to explain the science of self-control and how it can be harnessed to improve our health, happiness, and productivity. Informed by the latest research and combining cutting-edge insights from medicine, The Willpower Instinct explains exactly what willpower is, how it works, and why it matters. For example, readers will learn:
• Willpower is a mind-body response, not a virtue. It is a biological function that can be improved through mindfulness, exercise, nutrition, and sleep.
• Willpower is not an unlimited resource. Too much self-control Temptation and stress hijack the brain’s systems of self-control, but the brain can be trained for greater willpower
• Guilt and shame over your setbacks lead to giving in again, but self-forgiveness and self-compassion boost self-control.
• Giving up control is sometimes the only way to gain self-control.
• Willpower failures are contagious—your friends—but you can also catch self-control from the right role models.
In the groundbreaking tradition of Getting Things Done, The Willpower Instinct combines life-changing prescriptive advice and complementary exercises to help readers with goals ranging from losing weight to more patient parenting, less procrastination, better health, and more.

National Book Award Finalist: “This man’s ideas may be the most influential, not to say controversial, of the second half of the twentieth century.”—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes’s still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a few thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. “Don’t be put off by the academic title of Julian Jaynes’s The Origin of Consciousness in the Breakdown of the Bicameral Mind. Its prose is alive and the utmost intellectual rigor.”—The New York Times “When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis.”—John Updike, The New Yorker “He is as startling as Freud and equally as adept at forcing a new view of known human behavior.”—American Journal of Psychiatry

Just Keep Rowing is a self-empowerment book written by Katie and co-author, Mark Bowles, with 70 life lessons that parallel the number of days Katie spent alone at sea rowing across the Atlantic Ocean. The book is a personal conversation between you and Katie. During her journey she learned many vital life lessons from the Atlantic. As she found out, an ocean is a great teacher of the meaning of life. Katie became its student, sometimes reluctantly but often enthusiastically, and she wants to communicate these lessons because she believes they can be valuable for everyone. From students to business executives, and to people just wanting to find new ways to live life to the fullest, these lessons from the Atlantic will help you see the world from a new perspective.

21 exciting tales of Alternate History! What if fate had turned out differently in these United States? What if the Louisiana Purchase never happened? What if George Washington had been a Loyalist? What if a billionaire cloned the Founding Fathers? What if the Vikings had settled North America? What if the Apollo 11 moon landing had failed? From the bestselling author of The Bomber Mafia: discover Malcolm Gladwell’s breakthrough debut and explore the science behind viral trends in business, marketing, and human behavior. The tipping point is that magic moment when an idea, trend, or social behavior crosses a threshold, tips, and spreads like wildfire. Just as a single sick person can start an epidemic of the flu, so too can a small but precisely targeted push cause a fashion trend, the popularity of a new product, or a drop in the crime rate. This widely acclaimed bestseller, in which Malcolm Gladwell explores and brilliantly illuminates the tipping point phenomenon, is already changing the way people throughout the world think about selling products and disseminating ideas. “A wonderful page-turner about a fascinating idea that should affect the way every thinking person looks at the world.”—Michael Leavis

This text has been written so that it is current with all issues inherent in accounting and auditing practice, particularly in public accounting firms including coverage of the creation of the Public Companies Accounting Oversight Board, the passage of the Sarbanes-Oxley Act, and all of the major pronouncements issued by the AICPA. The text is also designed to provide flexibility for instructors; the twelve chapters focus on the auditing process while the eight modules provide additional topics that can be taught at the instructors’ discretion without interrupting the flow of the text.

For a moment on the cusp of the 13th century the town of Assisi was the focus for the two greatest powers in the Latin church. The election of Nicholas IV was the catalyst for the creation of frescoes in the Basilica of San Francesco. In this book the authors investigate the particular moment the frescoes were made casting new light on their patronage and iconography.

As we begin the new year, this title is currently the most up-to-date auditing textbook on the market, covering all of the latest pronouncements through the end of 2011. The book’s unique organization presents the auditing process in twelve concise chapters, with eight flexible, independent modules designed to be integrated into the course entirely at the instructor’s discretion. Perhaps most importantly, this title is the only book on the market to fully integrate the Codification of the New Clarity Standards (including new section #’s) issued by the Auditing Standards Board. As these standards will be effective for year-end audits after December 15, 2012, they will be covered on the CPA exam beginning in July 2013, when many current students will be taking the CPA exam after completing 150 hours of coursework. In addition, the Lowerers book also brings the real world into the classroom through the addition of extensive Auditing Insights involving real issues facing today’s professionals as well as the updated Apollo Shoes Casebook, the only stand-alone fraud audit case on the market (available on the book’s website, www.mhhe.com/lowers5e). Throughout the revised text, the Lowerers author team has updated each chapter to include the latest pronouncements, technology and case material for your auditing classes: This edition has fully integrated the eight new standards adopted by the PCAOB. And, most importantly, the risk assessment chapter was restructured to incorporate the exacting risk assessment process as outlined in the new PCAOB risk standards. The book has fully integrated the latest updates from the International Standards of Auditing (ISAs) and the Auditing Standards Board (ASB). Each chapter now begins with a list of the AU/ISA Sections that are covered from the Codification of Statements on Auditing Standards published by the AICPA and the list of PCAOB Auditing Standards covered in that chapter. This edition incorporates the major changes to the structure and the content of the auditing section of the CPA examination for 2011 and has been designed to provide multiple opportunities for students to practice questions that they will encounter on the CPA exam. Each chapter has an abundance of multiple choice questions. In addition, to provide experience with the task-based exam approach, Kaplan CPA Simulations are included in the text problem material and are also accessible at www.mhhe.com/lowers5e. These multiple choice questions and simulations allow the student to gain skills and pick up additional knowledge for success on the CPA Examination. The education version of ACL software is included free with the book. Exercises for use with the ACL software are available on the book’s website. The book is also fully integrated with McGraw-Hill’s Connect™ Accounting. The next evolution in online homework management and assessment, McGraw-Hill’s Connect™ Accounting is an online assignment and assessment solution that connects you with the tools and resources you’ll need to achieve success. Access to end-of-chapter material that provides immediate feedback and reports directly to your instructor’s reports. Access to lectures and study tools like PowerPoint® slides. If you are interested in a straight-forward, interactive and eco-friendly knowledge acquisition process, the Lowerers text can help. The book is now integrated fully with McGraw-Hill’s Connect™ Plus Accounting, you also receive access to a searchable, integrated online version of the textbook to help you successfully complete your work whenever and wherever you choose. If your instructor chooses to use McGraw-Hill’s Connect™ Accounting with your course, you can purchase access from the Online Learning Center at www.mhhe.com/lowers5e. This wide-ranging, interdisciplinary collection explores different ways of visualising Greek and Roman epic from Homer to Statius, in both ancient and modern culture. The book presents new perspectives on Homer, Virgil, Ovid, Lucan, Valerius Flaccus and Statius, and covers the re-working of epic matter in tragedy, opera, film, late antique speeches of praise, story-boarding, sculpture and wall-painting. The chapters use a variety of methods to address the relationship between narrative and visually, exploring how and why epic has inspired artists, authors and directors, and offering fresh visual interpretations of epic texts. Themes and issues discussed include: intermediality, ekphrasis and panegyric, illusion and deception, imagery and deferral, alienation and involvement, the multiplicity of possible visual responses to texts, three-dimensionality, miniaturisation, epic as cultural capital, and the specificity of genres, both literary and visual.

In the near future, political tensions between the United States and China are at an all-time high. Then a catastrophic explosion on the moon cleaves a vast gash in the lunar surface, and the massive electromagnetic pulse it unleashes obliterates Earth’s electrical infrastructure. To plumb the depths of the newly created lunar fissure and excavate the source of the power surge, the feuding nations are forced to cooperate on a high-risk mission to return mankind to the moon. Now, a diverse, highly skilled ensemble of astronauts—and a pair of maverick archaeologists plucked from the Peruvian jungle—will brave conspiracy on Earth and disaster in space to make a shocking discovery. Ocean of Storms is an epic adventure that spans space and time as its heroes race to fulfill an ancient mission that may change the course of humanity’s future.

START-UP NATION addresses the trillion dollar question: How is it that Israel— a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country’s adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the “Israel effect”, there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-

do spirit, there’s never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

All Dane Galle ever wanted was to be a successful writer. After a few sessions with his new friends Rose and Sherry at a romance book club, well, the more romances they read, the more they’re convinced they can do better. And do they ever! They join their creative forces to become “Pamela Claiice,” self-published romance novelist. When they look for a cover model for their first book, Dane sees the photos that will change his life. Paul Musegetes is the world’s most popular romance cover model, and the most secretive. Dane soon finds himself obsessed with this supernaturally handsome man, and when he meets Paul at the Romance Writers’ Ball on the Summer Solstice, he and Paul connect for one night of passion... After that night, Dane’s a writing machine. He can’t stop writing romances, and every story he touches turns to gold. But he also finds that he can’t write anything but romances. And soon he’s spending every waking moment of every day writing another after another... Then Dane finds out that this Midas touch has a heavy price. When the year is over, he’ll never write again. Not a romance, not a serious novel. Nothing. Not even a grocery list. And that leaves him with only one option – find Paul, and get him to break the curse. But before he can do that, he’ll have to track down Paul’s equally mysterious photographer, Jackson da Vinci... EXCERPT: I stopped crying around my third drink. Rose and Sherry patted me on the shoulder, and we’d reshuffled the chairs so that my back was to the rest of the bar and nobody could see me blubber. “What am I going to do?” I cried. “I’m going to be...nothing. All my life, all I ever wanted to do was write. And then this happened, and I was writing! And I loved it. But the whole idea was that I’d do this till I got rich, and then, I’d write more books like ‘The Doldrums,’ and if they didn’t sell, well, so what?” I finished off my concoction as Rose signaled for another round. “Maybe,” Sherry said, a little wobbly herself after two glasses of wine, “he’s been around forever. Paul.” “What do you mean?” Rose asked. “Maybe he’s been doing this throughout the ages,” Sherry mused. “For all we know, he’s been crowning the Queen of Romance Novels for eternity.” Rose’s eyebrows went up. “You mean, like, he schtupped Barbara Cartland?” This made me laugh at the worst moment, and I choked on my drink. But Sherry took her seriously. “Sure, or even Jane Austen, for all we know. Maybe she got some after all. And where else did all these ladies keep coming up with tall dark and handsome, huh?” “But that implies he’s immortal or supernatural or...” I tailed off. “We should find his old pics, and run them through some kind of facial recognition software. Compare them to the recent ones, see if he’s aged...” Rose shook her head. “No, he doesn’t look a day older, but he hasn’t been around that many years. And look at Elijah Wood! Ever since ‘Lord of the Rings,’ he hasn’t aged a day.” “Maybe he’s not human either,” Sherry speculated.
