Retailers nationwide are discovering that private label credit cards are one of the most dynamic marketing tools ever to come down the pike. Not only do they act as a powerful draw for new customers, but, according to recent marketing studies, private label cards help build customer loyalty. They are also a nearly limitless vehicle for promotional offers, discounts, premiums, and other potent customer incentives. And they provide retailers with an unprecedented means of gathering valuable customer-profile and purchasing information which can then be used to build a targeted database for generating mailing lists, strategically managing inventory, segmenting the most profitable customers, and more. Now, in the first and only book devoted exclusively to the subject, credit card marketing legend Bill Grady tells you everything you need to know to successfully develop and market a private label credit card, or to more effectively use an existing one to expand your customer base. The man behind many of the major innovations in the field, Bill created and managed the largest and most successful credit card program in the home center industry and has worked with many prestigious Fortune 500 companies to develop their programs. In Credit Card Marketing, he shares the fruits of his more than twenty-five years in the business and fills you in on all the successful credit marketing techniques now in use at today's sharpest, most innovative retail stores, banks, oil companies, and travel and entertainment providers. Writing in a warm, down-to-earth style, he takes you step-by-step through the entire process, from prescreened and preapproved solicitations, to direct mail, telemarketing, and in-store promotions, from premiums and sign-up programs, to frequent shopper and card enhancement programs. He also offers detailed scheduling guidelines to help you understand the lead times involved in various programs; guidelines on how to train employees to effectively market credit cards; and an entire chapter on how to develop and execute a winning credit card marketing plan. And along the way, Bill Grady reveals dozens of insider tips, insights, and rules of thumb that alone make Credit Card Marketing worth more than its weight in platinum. A guide to exploiting the full potential of one of today's most versatile marketing tools, Credit Card Marketing is must reading for all retailers, banks, and others. Peterson's Graduate Programs in the Environmental & Natural Resources 2011

In college, I started on a journey that would see me filing bankruptcy at age 30. I did not understand finances and was not taught in school. In addition, the books I read regarding money seem to have excluded some of the major challenges African-Americans face in the financial arena. This book was written to help young black people in America understand how to manage their money and achieve wealth so they do not suffer the same consequences I did.

This book constitutes, together with its companion LNCS 1606, the refereed proceedings of the International Work-Conference on Artificial and Neural Networks, IWANN'99, held in Alicante, Spain in June 1999. The 91 revised papers presented were carefully reviewed and selected for inclusion in the book. This volume is devoted to applications of biologically inspired artificial neural networks in various engineering disciplines. The papers are organized in parts on artificial neural nets simulation and implementation, image processing, and engineering applications.
