Answers is an excellent workbook containing over 50 sample questions and answers to the toughest teacher interview questions posed. There is an explanation of each question and tips and advice on how to respond. In addition there is a sample response for many of the questions that you can use as an aid to structure your own. In a tough careers job market it is essential that you structure your responses in line with the Job Description and Person Specification and this guide will show you how to do this to great effect. This book has been written for teachers of business education and economics in the years of their early professional development, including those on PGCE courses, those in their induction year, and those in years two and three of

their teaching career. The book will also be suitable for subject leaders with mentor responsibilities and Advanced Skills teachers undertaking specialist inset and teaching support. The book covers the training standards for NQTs and the Induction Standards. But it goes beyond this by fully exploring issues to do with subject knowledge in learning to teach, broadly accepting that an essential element of a secondary teacher's identity is tied up with the subject taught. The book is divided into three sections: framing the subject – which defines subject knowledge and raises questions about business education and economics as school subjects teaching the subject – which looks at pedagogical, curricular and pupil knowledge business, economics

and enterprise within the professional community – which focuses on the place of business education and economics within the wider curriculum and the teaching community. This book aims to provide stimulating assistance to subject specialists by helping them find ways of thinking about their specialism, how to teach with it and how to engage with what pupils learn through it.

reflection and aims to stimulate both novice and experienced teachers to think more deeply about their practice, and link research and evidence to what they have observed in schools. Chapters tackle established and contemporary issues enabling teachers to reach informed judgements and argue their point of view with deeper theoretical knowledge and understanding. Debates include teacherless classrooms; personalised learning; creativity; digital literacy; visual literacy; e-tools; learning platforms; and opportunities for lifelong learning.
