Meet Harley - an antiquated 50cc motorbike, top speed 25mph, who carried me on the backroads of Greece from the island of Evia to deliver the collected Jeeves and Wooster to a Moldovan monk on Mount Athos, a self-governing state run by monks. The road trip is a journey through the heart of Greece to its soul. We pass sites and sights from prehistory to the present: a Mycenaean beehive tomb, 3500 years old; the body of a Russian saint, who teleported pilaff; a refugee camp in a chicken factory; and many other extraordinary places as well as tavernas, cafes, cheap hotels and anywhere else I can find conversation and a jug of wine. We encounter the key moments in three thousand years of history that every Greek is familiar with and create their sense of who they are. Some are celebrated, for example the War of Independence from the Ottomans, others are no less powerful but unspoken, like the Civil War of 1946-49. As we meander north we come across the different peoples that created today's Greece. Whatever their origins, Greeks are brought up to believe they are direct descendants of the Ancient Greeks whose language they speak. They also believe they are custodians of the one true religion, Orthodoxy, the defining characteristic of Greekness for two thousand years. Having travelled through time and space,

I leave Harley at the frontier of Athos and plunge into a spiritual dimension. Wonder-working icons and relics are channels to the divine; everyday miracles are part of nature; the marvellous deeds of saints are facts not metaphors. Their reality permeates Greek culture and sense of self. Greece is two hundred years old. Since the bloody revolution against the Ottomans, Greeks have resisted British, French, Russian, German, Italian, Bulgarian and American incursion, invasion or domination. The struggle continues for independence from Brussels, Frankfurt and Washington that control its finances. Through turbulence and disaster Greeks have created a vibrant, enterprising, European democracy with a unique identity. It is an extraordinary story of an extraordinary people. Harley and the Holy Mountain is based on a lifetime's love of Greece. It is seasoned with experiences and memories, absurdity and humour, treats and discomforts, the terrors and boredom of the slow lane, and above all comedy. With a glimmer of enlightenment at the end.

What happens to gender at 120mph? Are Harley-Davidsons more masculine than Yamahas? The Gendered Motorcycle answers such questions through a critical examination of motorcycles in film, advertising and television. Whilst bikers and biker cultures have been explored previously, the motorcycle itself has remained largely under-theorised, especially in relation to gender.

Esperanza Miyake reveals how representations of motorcycles can produce different gendered bodies, identities, spaces and practices. This interdisciplinary book offers new and critical ways to think about gender and motorcycles, and will interest scholars and students of gender, technology and visual cultures, as well as motorcycle industry practitioners and motorcycle enthusiasts.

The inclination towards two wheelers is not newer to the world. From the very beginning, two wheelers are recognized as a mark of triumph, independence and joy. These are considered fast, safe and easy mode of transportation with worthy fuel economy. With the arrival of automation and electronics in two wheelers, the study gained more momentum, which led Two and Three Wheeler Technology to emerge as a new discipline of automobile engineering. The book explains traditional and modern technologies in an easy to understand manner. Various technologies have been explicated with appropriate 2D and 3D diagrams to support learning. Text comprises the state-of-the-art developments in the field of two wheelers. Detailed explanation on the actual assemblies helps the students to cognize the technology systematically. Although the emphasis has been given to the two wheeler technology, considering the requirement of various syllabi, the last chapter is solely dedicated to three wheeler technology. Chapter-end review questions help students in preparing them for examination by self-assessment method. Primarily designed for the undergraduate and diploma students of automobile engineering, the lucid and simple presentation of the book makes it useful for the

commoner, who has keen interest in this area. It is a useful guide for a vehicle owner for understanding mechanism and parts, which may help him in maintaining his vehicle at best efficiency.

The New Optimism

The World's Top Performance Machines

This book represents a fresh and informative approach to the subject of motorcycles. In handy pocket-sized form, it chronicles 75 of the world's greatest machines.

L'investigatore privato Tarcisio Muzzo è un tipo che o lo si ama o si odia. Smodato amante degli eccessi, ma sempre genuino e mosso dalla ferrea volontà di spedire al posto che merita la peggiore feccia in circolazione, sogna di vivere come Magnur P.I., il celebre protagonista dell'omonima serie tv anni Ottanta. La realtà, però, è che le sue giornate scorrono tutte uguali, tra un adolescente disagiato da pedinamenti adulteri da cogliere in flagrante. Finché l'indagine sul misterioso suicidio di una giovane universitaria apre scenari inimmaginabili per la tranquilla realtà anconetana. E così, tra un Rosso Conero e un tuffo nelle acque cristalline del litorale marchigiano, tra epiche abbuffate di moscioli - le prelibate cozze di Portonovo - e capatine al night club, Tarcisio si muove nella sorniona vita di provincia; come un

eroe improbabile, dotato però di un sottile acume e una sorprendente profondità capirà che si nasconde ben altro dietro la morte della ragazza e si addentererà sempre più nelle pieghe oscure dell'animo umano.

The biggest, the rarest, the most powerful, the most expensive, and the most beautiful bikes on the planet, superbly photographed and lovingly described in great detail.

Excerpt: The Honda RC212V is a road racing motorcycle developed to race in the 800 cc (49 cu in) MotoGP series. Officially introduced on 30 October 2006 as the replacement in the MotoGP series, it was developed by Honda Racing Corporation (HRC) throughout 2006 and began officially racing in the 2007 season. The model name derives from the following: The RC212V features an 800 cc (49 cu in) liquid-cooled four-stroke DOHC 4-valve V4 to power the all new chassis built with mass centralization and handling as a priority. Dani Pedrosa testing the RC212V. Dani Pedrosa and Nicky Hayden rode the factory backed versions, while the customer machines were ridden by Marco Melandri, Toni Elías, Carlos Checa, and Shinya Nakano. A perennial issue with Honda's GP motorcycle is whether the team and rider receives the best parts and whether performance differences are due to the rider not the machine. Before the racing season started in 2007, Melandri was quoted as saying, "In the past few tests I've seen a big progression with Pedrosa's bike, but we're waiting for new parts from Honda." After a few rounds, Honda riders did not achieve the results expected, leading HRC chief Satoru Horiike to admit that they made a mistake. 20 Jahre Karriere, die Popularität eines Rockstars, neun Weltmeistertitel und ein bis

That all changed when Kenny Roberts exploded onto the Grand Prix racing scene and became the first American to win the world championship in motorcycle road racing's premier class. This is the story of the legendary American riders who beat the Europeans at their own game, including Freddie Spencer, Eddie Lawson, Wayne Rainey, Kevin Schwantz, Kenny Roberts Jr., and the most recent American world champion, Nicky Hayden.
