Orphaned at a young age, Erith Lock has a cruel upbringing at the hands of a harsh stepmother. At the tender age of sixteen, a ruthless act leaves her shattered, struggling for survival. When all she has is her word, she makes a solemn vow to three small children. But circumstances drastically change, and the promise could take years to fulfill. She fears it might be better broken. When her past must be confronted, Erith finds herself facing unbearable choices that resound with adversity and might cost her everything. Enduring self-doubt pushes Erith to her breaking point. Will she allow hope and kindness to guide her, or will it be safer to remain captive in the grip of her unfortunate past? 13-year old Clarence Griffin was on a weekend camping trip with his family and friends. His excursion turned out to be more than he bargained for when he was plunged into a world of deep peril filled with unworldly predators and dangers unseen within the darkest depths. Armed with only his slingshot and the equipment on his back, he must rely on his own survival skills and the talents of his three best friends and his little sister. Can he continue to defy inevitable demise and use his leadership to save himself and his companions in an unfamiliar realm?

Katharine Susannah Prichard was born in 1883 to Australian parents then living in Fiji, but she grew up in Tasmania, lived for a while in both Melbourne and London before finally settling in Western Australia. She was one of the co-founders of the Communist Party of Australia in 1921, and her status as a communist and a female writer led to her being frequently under surveillance and harassment by the Australian police and other government authorities. She wrote *The Black Opal* in 1921, and the novel focuses on the very close-knit opal-mining community living and working on Fallen Star Ridge, a fictitious location set in New South Wales, Australia. Life is hard for the miners as their fortunes rise and fall with the amounts and quality of black opal they can uncover. Black opal is a beautiful mineral with fiery gleams of color, much valued for jewelry. Finding productive seams of such opal is a matter of both hard work and good luck. The novel is a well-drawn study of the relationships of the people living on the Ridge, and the two main characters are portrayed with clarity: Michael Brady, an older man much respected by the other miners for this knowledge and ethical approach, and Sophie Rouminof, a beautiful teenage girl who is the darling of the camp but who abruptly runs away to America after being disappointed in love. Despite the difficulties the individual miners face, there is a community spirit and an agreement on basic values and principles of behavior at the Ridge. But this community of shared endeavor is eventually jeopardized by the influence of outsiders, in particular an American who wishes to buy up the individual mines, operate them under a company structure, and simply pay the miners a salary. This conflict between capitalism and honest manual labour becomes one of the most important themes of the work. The effort of anthropometric historians to unearth the broad patterns of human biological well-being has led to the examination of nearly forgotten, centuries-old records from dozens of practically all the continents of the globe. French historians in the *Annales* tradition were among the first to adopt methods from physical anthropology and from the biological sciences. The expansion of the field dates from the pathbreaking work of Richard Steckel and Robert Fogel, which launched the discipline of anthropometric history on American soil. Research has shown that physical stature is related to nutritional status and therefore to real family income, and thus to the general standard of living. Historians and development economists will find this useful, as it informs us about the standard of living of members of society for whom data on wages are seldom available—women, children, aristocrats, farmers, and slaves. In addition, it has shown that the biological standard of living may diverge from conventional indicators of welfare during the early stages of industrialization. Thus, per capita income is an ambiguous measure of welfare during some phases of growth, and it must be supplemented with data from other indicators, such as physical stature. The essays in this volume broaden our knowledge of the momentous economic changes of the last two centuries, extending analysis to regions for which such information has been lacking, including Russia, Canada, Indonesia, Italy, and Japan. Object technology pioneer Wirfs-Brock teams with expert McKean to present a thoroughly updated, modern, and proven method for the design of software. The book is packed with techniques that enable the practitioner to get the job done.

Four pipes and flush decks - these ships were a distinctively American destroyer design. Devised immediately prior to and during the United States' involvement in World War I they dominated the US Navy's destroyer forces all the way through to World War II. They were deployed on North Atlantic and Norwegian Sea convoys, and virtually everywhere in the Pacific, from Alaska to Australia. Fifty were given to Great Britain in its hour of need in 1940, and many would serve in other navies, fighting under the Soviet, Canadian, Norwegian, and even the Imperial Japanese flags. They also served in a variety of roles becoming seaplane tenders, high-speed transports, minesweepers and minelayers. One was even used as a self-propelled mine during Operation Chariot, destroying the dry dock at St. Nazaire. Fully illustrated throughout with commissioned artwork and contemporary photographs, this volume reveals the operational history of these US Navy ships that fought with distinction in both World Wars.

An essential and page-turning narrative on the history of drone warfare by the acclaimed author of Rumsfeld, exploring how this practice emerged, who made it happen, and the real consequences of targeted killing. Assassination by drone is a subject of deep and enduring fascination. Yet few understand how and why this has become our principal way of waging war. Kill Chain uncovers the real and extraordinary story; its origins in long-buried secret programs, the breakthroughs that made UAV operations possible, the ways in which the technology works and, despite official claims, does not work. Taking the reader inside the well-guarded world of national security, the book reveals the powerful interests - military, CIA and corporate - that have led the drive to kill individuals by remote control. Most importantly of all, the book describes what has really happened when the theories underpinning the strategy -- and the multi-billion dollar contracts they spawn -- have been put to the test. Drawing on sources deep in the military and intelligence establishments, Andrew Cockburn's Kill Chain unveils the true effects, as demonstrated by bloody experience, of assassination warfare, a revelation that readers will find surprising as well as shocking.

Accounting: A Smart Approach

The Exploits of Clarence Griffin Book 1

Volume 3

Speaking all over the United States about apologetics issues, Charlie Campbell has heard just about every question skeptics have to offer. In this concise, reader-friendly handbook, he provides brief responses to the top-40 questions that keep people from the faith, such as... What evidence do you have that God exists? How do you know the Bible is actually true? What about those who have never heard of Jesus? Will they be condemned to hell? If God is so loving, why does He allow evil and suffering? How can you say Jesus is the only way to heaven? Don't all religions basically teach the same thing? Aren't a lot of churchgoers hypocrites? With a gracious introductory note to skeptical readers and a generous sprinkling of inspiring quotes throughout, this handy resource is an enjoyable read as well as a powerful evangelistic tool.

For 100 years, the Isle of Man Tourist Trophy races have been the world's most dangerous organized sporting event. As one of thirty thousand fans who attended the annual spectacle, Mark Gardiner harbored no illusions about his own skill or bravery. He was, however, an avid motorcyclist for whom the race represented a boyhood dream. He went home, quit his job, sold everything he owned, and returned to the Island to race there himself. Riding Man is the account of an Everyman, struggling to qualify for -- and survive -- the TT races. If you're a dreamer, the lesson in this book is that the pursuit of any worthwhile goal involves risks, rewards and, almost inevitably some regrets. If you're not a dreamer, the lesson is more important: the deepest regrets are always over risks not taken.
