When a local context really makes the difference... The new edition of this original Australian text continues to offer the most balanced coverage of theory and research for Australian students and educators and appeals to students from many backgrounds. It covers the domains of development including neurological, cognitive, social, physical and personality. The text is organised chronologically by chapter. Within each chapter content is organised topically. This structure allows for a degree of flexibility and lecturers can choose the way they wish to approach the content, whether it is topically or chronologically.

Just as the clothes we wear can communicate our personality and how we want to be perceived, so fashion can reflect the politics and preoccupations of the society that produced it. A Cultural History of Western Fashion guides you through the relationships between haute couture and ready-to-wear designer fashions, popular culture, big business, high-tech production, as well as traditional and social media. Exploring fashion's interdisciplinary nature, English and Munroe also highlight the parallel evolution of clothing design and the other visual arts over the last 150 years. This new edition includes expanded coverage of the build up to the First World War and brings this classic text up to date. There is also a new chapter on smart textiles and technology, exploring the work of Hussein Chalayan and Iris Van Herpen among others, and expanded coverage of the role of sustainability in the contemporary fashion industry, including biosynthetic textile production and Stella McCartney's use of vegan leather.

This handbook provides a comprehensive historical account of the field of Quality of Life. It brings together theoretical insights and empirical findings and presents the main items of global quality of life and wellbeing research. Worldwide in its scope of topics, the handbook examines discussions of demographic and health development, the spread of democracy, global economic accounting, multi-item measurement of perceived satisfaction and expert-assessed quality of life and the well-being of children, women and poor people. It looks at well-being in specific regions, including North and Sub-Saharan Africa, Asia, South America and Eastern and Western Europe. In addition to contributions by leading and younger authors, the handbook includes contributions from International Organizations about their own work with respect to social reporting.

The Politics of Postmemory

A NEW YORK TIMES BESTSELLER! AS HEARD ON NPR MORNING EDITION AND ON BEING WITH KRISTA TIPPETT "Katherine May opens up exactly what I and so many need to hear but haven't known how to name." —Krista Tippett, On Being "Every bit as beautiful and healing as the season itself. . . . This is truly a beautiful book." —Elizabeth Gilbert "Proves that there is grace in letting go, stepping back and giving yourself time to repair in the dark...May is a clear-eyed observer and her language is steady, honest and accurate—capturing the sense, the beauty and the latent power of our resting landscapes." —Wall Street Journal An intimate, revelatory book exploring the ways we can care for and repair ourselves when life knocks us down. Sometimes you slip through the cracks: unforeseen circumstances like an abrupt illness, the death of a loved one, a break up, or a job loss can derail a life. These periods of dislocation can be lonely and unexpected. For May, her husband fell ill, her son stopped attending school, and her own medical issues led her to leave a demanding job. Wintering explores how she not only endured this painful time, but embraced the singular opportunities it offered. A moving personal narrative shot through with lessons from literature, mythology, and the natural world, May's story offers instruction on the transformative power of rest and retreat. Illumination emerges from many sources: solstice celebrations and dormice hibernation, C.S. Lewis and Sylvia Plath, swimming in icy waters and sailing arctic seas. Ultimately Wintering invites us to change how we relate to our own fallow times. May models an active acceptance of sadness and finds nourishment in deep retreat, joy in the hushed beauty of winter, and encouragement in understanding life as cyclical, not linear. A secular mystic, May forms a guiding philosophy for transforming the hardships that arise before the ushering in of a new season.

Drawing on both theory and practice, this insightful book offers a comprehensive analysis of the relationship between the United Nations Security Council (UNSC) and the International Criminal Court (ICC), centred on the referral mechanism. Arguing that the legal nature of the referral must be conceptualized as a conferral of powers from the UNSC to the ICC, the author explores the complex legal relationship between interacting international organizations.

The Hidden Lineage of Jesus and Other Mysteries

This is the first volume of three about the life of Saint Josemaría Escrivá. He has been hailed as a pioneer in helping ordinary Christians find God in their daily lives. Moved as a teenager by footprints of a barefoot Carmelite priest in the snow, Josemaría felt called to greater generosity in the priesthood and in his struggles to build up Opus Dei during the outbreak of the Spanish Civil War. This latest biography is the most extensively researched work on his family history, childhood, adolescence, and young adulthood. The reader benefits from an enormous wealth of details in extensive notes and appendices. Accompanying them are excerpts from his correspondence, spiritual writings and testimonials from dozens of friends and acquaintances. The remarkable story continues in volumes II and III.

There's more to Banksy than the painting on the wall: the first in-depth investigation into the mysteries of the world's most famous living artist. Banksy is the world's most famous living artist, yet no one knows who he is. For more than twenty years, his wryly political and darkly humorous spray paintings have appeared mysteriously on urban walls around the globe, generating headlines and controversy. Art critics disdain him, but the public (and the art market) love him. With this generously illustrated book, artist and critic Carol Diehl is the first author to probe the depths of the Banksy mystery. Through her exploration of his paintings, installations, writings, and Academy Award-nominated film, *Exit through the Gift Shop*, Diehl proves unequivocally that there's more to Banksy than the painting on the wall. Seeing Banksy as the ultimate provocateur, Diehl investigates the dramas that unfold after his works are discovered, with all of their social, economic, and political implications. She reveals how this trickster rattles the system, whether during his month-long 2013 self-styled New York "residency" or his notorious Dismaland of 2015, a full-scale dystopian "family theme park unsuitable for children" dedicated to the failure of capitalism. Banksy's work, Diehl shows, is a synthesis of conceptual art, social commentary, and political protest, played out not in museums but where it can have the most effect--on the street, in the real world. The questions Banksy raises about the uses of public and private property, the role of the global corporatocracy, the never-ending wars, and the gap between artworks as luxury goods and as vehicles of social expression, have never been more relevant.

The Referral Mechanism in Theory and Practice

Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as "social practice." Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

This volume examines recent examples of Argentine literature, film, theatre and visual art from the children of the disappeared. By exploring their creative narration of childhood memories and the controversial use of parody, humour and fantasy, Maguire considers how this post-dictatorship generation are increasingly looking towards the past in order to disrupt the politics of the present. More broadly, this interdisciplinary study also scrutinizes the relevance of postmemory in a Latin American context, arguing that the politics of local Argentine memory practices must be taken actively into account if such a theoretical framework is to remain a productive and appropriate analytical lens. *The Politics of Postmemory* thus engages critically with theories of cultural memory in the Argentine, Latin American and global contexts, resulting in a timely and innovative text that will be of significant interest to students and scholars in the fields of, among others, cultural studies, film studies, critical theory and trauma studies.

Demonstrating that similarities between Jewish and Christian art in the Middle Ages were more than coincidental, *Cultural Exchange* meticulously combines a wide range of sources to show how Jews and Christians exchanged artistic and material culture. Joseph Shatzmiller focuses on communities in northern Europe, Iberia, and other Mediterranean societies where Jews and Christians coexisted for centuries, and he synthesizes the most current research to describe the daily encounters that enabled both societies to appreciate common artistic values. Detailing the transmission of cultural sensibilities in the medieval money market and the world of Jewish money lenders, this book examines objects pawned by peasants and humble citizens, sacred relics exchanged by the clergy as security for loans, and aesthetic goods given up by the Christian well-to-do who required financial assistance. The work also explores frescoes and decorations likely painted by non-Jews in medieval and early modern Jewish homes located in Germanic lands, and the ways in which Jews hired Christian artists and craftsmen to decorate Hebrew prayer books and create liturgical objects. Conversely, Christians frequently hired Jewish craftsmen to produce liturgical objects used in Christian churches. With rich archival documentation, *Cultural Exchange* sheds light on the social and economic history of the creation of Jewish and Christian art, and expands the general understanding of cultural exchange in brand-new ways.

How the Politics of Literacy Shape Thinking in the Classroom

This book examines the use of image and text juxtapositions in conceptual art as a strategy for challenging several ideological and institutional demands placed on art. While conceptual art is generally identified by its use of language, this book makes clear exactly how language was used. In particular, it asks: How has the presence of language in a visual art context changed the ways art is talked about, theorised and produced? Image and Text in Conceptual Art demonstrates how artworks communicate in context and evaluates their critical potential. It discusses international case studies and draws resources from art history and theory, philosophy, discourse analysis, literary criticism and social semiotics. Engaging the critical and social dimensions of art, it proposes three methods of analysis that consider the work's performative gesture, its logico-semantic relations and the rhetorical operations in the discursive creation of meaning. This book offers a comprehensive method of analysis that can be applied beyond conceptual art.

This is a remarkable account of the revolutionary impact of modern dance on European cultural life in the early twentieth century. Edward Ross Dickinson uncovers modern dance's place in the emerging 'mass' culture of the modern metropolis, sufficiently ubiquitous and high-profile to spark media storms, parliamentary debates, and exasperated denunciations even from progressive art critics. He shows how modern dance spoke in multiple registers - as religious and as scientific; as redemptively chaste and scandalously sensual; as elitist and popular. He reveals the connections between modern dance and changing gender relations and family dynamics, imperialism, racism, and cultural exchanges with the wider non-European world, and new conceptions of selfhood. Ultimately the book finds in these complex and often contradictory connections a new way of understanding the power of modernism and modernity and their capacity to revolutionize and transform the modern world in the momentous, creative, violent middle decades of the twentieth century.

What determines the capacity of countries to design, approve and implement effective public policies? To address this question, this book builds on the results of case studies of political institutions, policymaking processes, and policy outcomes in eight Latin American countries. The result is a volume that benefits from both micro detail on the intricacies of policymaking in individual countries and a broad cross-country interdisciplinary analysis of policymaking processes in the region.

On William Morris and Mariano Fortuny

The Power of Rest and Retreat in Difficult Times

Communication Between Cultures

The Paris of Picasso, Stravinsky, Proust, Renault, Marie Curie, Gertrude Stein, and Their Friends through the Great War

From the winner of the Booker Prize: A ravishing book that opens a window into the lives, designs, and passions of Mariano Fortuny and William Morris, two remarkable artists whose lives and works are passions of the writer A. S. Byatt. Born a generation apart in the mid-1800s, Fortuny and Morris were seeming opposites: Fortuny a Spanish aristocrat thrilled by the sun-baked Crete and Knossos; Morris a member of the British bourgeoisie, enthralled by Nordic myths. Through their revolutionary inventions and textiles, both men inspired a new variety of art that is striking today as when it was first conceived. In this elegant meditation, Byatt traces their genius right to the source. Fortuny's Palazzo Pesaro Orfei in Venice is a warren of dark rooms imbued with the rich hues of Asia. In his attic workshop, Fortuny created intricate designs from glowing silks and velvets; in the palazzo he found "happiness in a glittering cavern" and the French model who became his wife and collaborator, including on the famous "Delphos" dress—a flowing, pleated gown that evoked the era of classical Greece. Morris's Red House outside London, with its Gothic turrets and secret gardens, helped inspire his stunning floral and geometric patterns; it likewise represented a coming together of life and art. But it was his "sweet simple old place" called Kelmscott Manor in the countryside that he loved best—even when it became the setting for his wife's love affair with the artist Dante Gabriel Rossetti. Generously illustrated with the artists' beautiful designs—pomegranates and acanthus, peacock and vine—among other aspects of their worlds, this marvel-filled book brings the lives and ideas of Fortuny and Morris to vivid life.

Mary McAuliffe's Dawn of the Belle Epoque took the reader from the multiple disasters of 1870–1871 through the extraordinary re-emergence of Paris as the cultural center of the world. Now, in Twilight of the Belle Epoque, McAuliffe portrays Paris in full flower at the turn of the twentieth century, where creative dynamos such as Picasso, Matisse, Stravinsky, Debussy, Ravel, Proust, Marie Curie, Gertrude Stein, Jean Cocteau, and Isadora Duncan set their respective circles on fire with a barrage of revolutionary visions and discoveries. Such dramatic breakthroughs were not limited to the arts or sciences, as innovators and entrepreneurs such as Louis Renault, André Citroën, Paul Poiret, François Coty, and so many others—including the magnificent men and women in their flying machines—emphatically demonstrated. But all was not well in this world, remembered in hindsight as a golden age, and wrenching struggles between Church and state as well as between haves and have-nots shadowed these years, underscored by the ever-more-ominous drumbeat of the approaching Great War—a catastrophe that would test the mettle of the City of Light, even as it brutally brought the Belle Epoque to its close. Through rich illustrations and evocative narrative, McAuliffe brings this remarkable

Could we understand, in biological terms, the unique and fantastic capabilities of the human brain to both create and enjoy art? In the past decade neuroscience has made a huge leap in developing experimental techniques as well as theoretical frameworks for studying emergent properties following the activity of large neuronal networks. These methods, including MEG, fMRI, sophisticated data analysis approaches and behavioral methods, are increasingly being used in many labs worldwide, with the goal to explore brain mechanisms corresponding to the artistic experience. The 37 articles composing this unique Frontiers Research Topic bring together experimental and theoretical research, linking state-of-the-art knowledge about the brain with the phenomena of Art. It covers a broad scope of topics, contributed by world-renowned experts in vision, audition, somato-sensation, movement, and cinema. Importantly, as we felt that a dialog among artists and scientists is essential and fruitful, we invited a few artists to contribute their insights, as well as their art. Joan Mir ó said that "art is the search for the alphabet of the mind." This volume reflects the state of the art search to understand neurobiological alphabet of the Arts. We hope that the wide range of articles in this volume will be highly attractive to brain researchers, artists and the community at large.

In recent years, the number of conflicts related to the misuse of street art and graffiti has been on the rise around the world. Some cases involve claims of misappropriation related to corporate advertising campaigns, while others entail the destruction or 'surgical' removal of street art from the walls on which they were created. In this work, Enrico Bonadio brings together a group of experts to provide the first comprehensive analysis of issues related to copyright in street art and graffiti. Chapter authors shed light not only on the legal tools available in thirteen key jurisdictions for street and graffiti artists to object to unauthorized exploitations and unwanted treatments of their works, but also offer policy and sociological insights designed to spur further debate on whether and to what extent the street art and graffiti subcultures can benefit from copyright and moral rights protection.

The Play World chronicles the history and evolution of the concept of play as a universal part of childhood. Examining texts and toys coming out of Europe between 1631 and 1914, Patricia Anne Simpson argues that German material, literary, and pedagogical cultures were central to the construction of the modern ideas and realities of play and childhood in the transatlantic world. With attention to the details of toy manufacturing and marketing, Simpson considers prescriptive texts about how children should play, treat their possessions, and experience adventure in the scientific exploration of distant geographies. She illuminates the role of toys—among them a mechanical guillotine, yo-yos, hybridized dolls, and circus figures—as agents of history. Using an interdisciplinary approach that draws from postcolonial, childhood, and migration studies, she makes the case that these texts and toys transfer the world of play into a space in which model childhoods are imagined and enacted as German. With chapters on the Protestant play ethic, enlightened parenting, Goethe as an advocate of play, colonial fantasies, children's almanacs, ethnographic play, and an empire of toys, Simpson's argument follows a compelling path toward understanding the reproduction of religious, gendered, ethnic, racial, national, and imperial identities, emanating from German-speaking Europe, that collectively construct a global imaginary. This foundational and deeply original study connects German-speaking communities across the Atlantic as they collectively engender the epistemology of the play world. It will be of particular interest to German studies scholars whose research crosses the Atlantic.
