This book brings together interviews with twenty-one artist-teachers from different parts of the world, offering many insights into their identities, challenges and creative and pedagogic practices they have adopted. This book explores the puzzling phenomenon of new veiling practices among lower middle class women in Cairo, Egypt. Although these women are part of a modernizing middle class, they also voluntarily adopt a traditional symbol of female subordination. How can this paradox be explained? An explanation emerges which

reconceptualizes what appears to be reactionary behavior as a new style of political struggle--as accommodating protest. These women, most of them clerical workers in the large government bureaucracy, are ambivalent about working outside the home, considering it a change which brings new burdens as well as some important benefits. At the same time they realize that leaving home and family is creating an intolerable situation of the erosion of their social status and the loss of their traditional identity. The new veiling expresses women's protest

against this. MacLeod argues that the symbolism of the new veiling emerges from this tense subcultural dilemma, involving elements of both resistance and acquiescence. In high school, everyone's talking about college. What to do. Where to go. Why it's important. Classes are given on it. Books are written about it. But details get left out. Every year, college graduates learn this the hard way as they step into adulthood. I was one of them. After earning a four-year degree, I went through two of the worst years of my life. Not that my situation is unique. I am a part of a

generation that was told to go to college first and sort out the details later. Most of us did. We chased the promise of a big shiny future, and we ended up being chased by the mistakes of our past. That's not to say we completely regretted going. This book isn't a list of privileged millennial complaints. It's a collection of wisdom gained in less than pleasant ways. It's a story of hardship, failure, victory, and perseverance. It's all of the things we wish someone had told us. And it takes place before college, in college, after college, and without college. This is the

Written 100 years ago, *The Art Spirit* by Robert Henri is most influential book for artists, and especially American artists. It still remains one of the best selling books on art and creativity, and it attracts new readers with every generation. Henri with the assistance of Margery Ryerson prepared this book from four decades

of his lecture notes and hundreds of letters to students and friends. The Art Spirit deserves to be in every artist's library. Although Henri offers practical advice on painting, the book is not just about how to do art, but how to become an artist. For Henri, there was no greater human ambition than to be an artist. Although Henri's own life was not without challenges, especially financial ones, he does not dwell on his personal adversities. The book is a glorification of the artist's life, and how mundane difficulties pale to the joys of the artistic life. The Art Spirit provides insights into the mind of one of America's most influential artists and teachers, and the reader-artist comes away with an uplifting sense in what it means to be a part of the great
