*The four principles that can help us to overcome our brains' natural biases to make better, more informed decisions--in our lives, careers, families and organizations. In Decisive, Chip Heath and Dan Heath, the bestselling authors of Made to Stick and Switch, tackle the thorny problem of how to overcome our natural biases and irrational thinking to make better decisions, about our work, lives, companies and careers. When it comes to decision making, our brains are flawed instruments. But given that we are biologically hard-wired to act foolishly and behave irrationally at times, how can we do better? A leading educator discusses the importance of the first six years of a child's normal physical and emotional development

The first wave of the Millennial Generation—born between 1980 and 2001—is entering the work force, and employers are facing some of the biggest management challenges they've ever encountered. They are trying to integrate the most demanding and most coddled generation in history into a workplace shaped by the driven baby boom generation. Like them or not, the millennials are America's future work force. They are actually a larger group than the boomers—92 million vs. 78 million. The millennials are truly trop

kids, the pride and joy of their parents who remain closely connected even as their children head off to college and enter the work force. Millennials are a complex generation, with some conflicting characteristics. Although they're hard working and achievement oriented, most millennials don't excel at leadership and independent problem solving. They want the freedom and flexibility of a virtual office, but they also want rules and responsibilities to be spelled out explicitly. "It's all about me," might seem to be the mantra of this demanding bunch of young people, yet they also tend to be very civic-minded and philanthropic. This book will let readers meet the millennials and learn how this remarkable generation promises to stir up the workplace and perhaps the world. It provides a rich portrait of millennials, told through the eyes of millennials themselves and

from the perspectives of their parents, educators, psychologists, recruiters, and corporate managers. Clearly, the millennials represent a new breed of student, worker, and global citizen, and this book explores in depth their most salient attributes, particularly as they are playing out in the workplace. It also describes how companies are changing tactics to recruit millennials in the Internet age and looks at some of this generation's dream jobs.

settings. From reviews of *Motivation in Education*: "I find it essential that students have access to such strong representation of the basic theories and work in the field of motivation. . . . This book goes a long way toward reinforcing the voices of experts who make data-driven decisions about how to foster motivation. . . . There are no available books [on motivation] as excellently crafted as this one." --Theresa A. Thorkildsen, University of Illinois at Chicago

"This book is certainly the most comprehensive treatment of motivation. Parent involvement in their childrens education and school life was studied in England through a telephone survey of 2,109 households. Around 1 in 3 parents (29%) felt very involved in their childs school life, and primary school parents were more likely to feel this way than secondary school parents. Mothers were more likely to say that they were very involved than were fathers. Around 72% of all parents agreed that they wanted more involvement, and a third definitely agreed. Among the barriers to involvement, parents cited the competing demands in their lives such as work commitments,

demands of other children, childcare difficulties, and lack of time generally. Almost all parents were happy with the schools attitude toward them, with a large majority finding the school welcoming (94%) and willing to involve them (84%). Parents particularly value face-to-face contact with teachers, but a significant minority thought that they would be labeled trouble makers if they talked too much. Parents were generally happy with the quality of written communications coming from schools, although a significant minority (27%) thought that the general information was spoiled by jargon. Many parents were not aware of the labels given to recent educational initiatives, and 35% did not recognize the term Home School Agreement, even though all had been invited to sign one. With so many "experts" touting different approaches to raising thriving children, how do you know which is the best one? Dr. Rhonda Spencer-Hwang, professor of public health at Loma Linda University and mom of three, had the same question. As a member of a community known worldwide for its health and longevity, often referred to as a Blue Zone, she decided to study the area's many centenarians to find out what they--or their parents--did right in childhood to make them so resilient to stress, disease, and the adversities of life. Sociologia e Ricerca Sociale, Italy It is not an easy task to be innovative in the large and increasing field of innovation studies. We should therefore thank and welcome the Roskilde School for achieving such a difficult task. This book provides a new and promising vision of innovation which is metaphorically called innovation with care . This new theory draws upon a sociological perspective in order to open up the black box of the organization. It brings interacting people and social process to the forefront of innovation phenomena. Innovation and the Creative Process explores innovation with care, illustrating that it is possible to integrate in the innovation theory a wide range of specialized and non-specialized actors, activities and forms of business and social innovations. Following the Schumpeterian tradition, it

provides a more comprehensive notion of innovation and enlarges the scope of innovation theory. This book represents a fruitful approach to innovation which academics, private and public practitioners should consider with much care. Faiz Gallouj, University of Lille, France This book explores new frameworks and methods of understanding and analysing innovation. These are set against a backdrop of innovation with care , which is seen as a phenomenon that takes place among many actors with different perspectives, ideas and cultures that must be carefully woven together in order to achieve the benefits of innovation The new perspectives presented by the contributors will be important in encouraging successful innovation across sectors, organizations and people. They examine how people and organizations deal

with the tensions and paradoxes in the innovative process between creativity and innovation, variation and selection, and sense and strategy-making. The book also includes a sociological approach to innovation as a complement to economic perspectives in order to better understand how people can benefit from innovation in a number of interesting private and public cases. To benefit from innovation, it concludes, people depend less on formal roles and formal organization than on a caring approach that enables them to deal with and interpret evolutions across people, organizations and sectors. This highly original, innovative book will provide fascinating reading for a diverse audience, including academics, researchers, policymakers and managers with an interest in innovation, organization studies,

The main focus of educational systems, all over the world is supposed to be the students. This book explains how so extremely our focus has been shifted away from the children and specifically their socioemotional development. Our focus has become fighting a virus and to serve this purpose we are neglecting our commitment to our student ' s mental and emotional well-being. Meskipun masih banyak kekurangan, akan tetapi kami sangat bergembira karena semester I (satu) sudah dapat memiliki buku secara mandiri tanpa harus menunggu menjadi sarjana, megister atau doktor. Untuk menjawab era Revolusi Industri 4.0, memang tidak boleh jika mahasiswa sekadar kuliah. Mereka (mahasiswa), menurut Pak Ibda, harus memiliki keunggulan "komparatif" dan "kompetitif". Komparatif in berkaitan dengan keunggulan akademik, intelektual, nilai IPK, atau kemampuan dalam menangkap ilmu pengetahuan.

Buku ini merupakan kumpulan artikel ilmiah yang ditulis mahasiswa sekelas dengan berbagai tema dan judul. ### Mengasuh Anak Dengan Energi Dan Emosi Positif Theories of Development

Adolescent researchers are increasingly aware that they must examine development both across time and across context. To do so, however, requires new conceptualizations and methodological approaches to the study of development, including attention to the pathways young people choose in adolescence and follow into adulthood. This volume assembles work by key researchers in the field who are

struggling to understand how developmental trajectories are constructed and maintained throughout the adolescent period. A complete understanding of developmental pathways requires the recognition that adolescents' social contexts--family, school, neighborhood, and/or peer group--are important influences on the choices they make at this developmental period. Researchers have traditionally studied contexts in isolation rather than examining the interrelationships among contexts and

their implications for adolescent development. The present volume seeks to address this gap in the literature, with attention given not only to the interrelationships among contexts for white, middle-class youth, but also to these issues for minority adolescents in neighborhoods that vary in terms of access to resources. It concludes with an examination of researcher-community collaboration as a strategy to move communities toward a greater awareness of adolescent development and the problems
