Edward C. Moore (1827–1891) was the creative leader who brought Tiffany & Co. to unparalleled originality and success during the late nineteenth century. A silversmith, designer, and prodigious collector, Moore sought out exceptional objects from around the world, which he then used as inspiration for Tiffany’s innovative silver designs. This informative, richly illustrated volume, the first study of Moore’s life, collection, and influence, presents more than 170 examples from his vast collection, ranging from Greek and Roman glass to Spanish vases, Islamic metalwork, and Japanese textiles. These are juxtaposed with sixty magnificent silver objects created by the designers and artisans at Tiffany who were inspired by Moore’s acquisitions. Included among them are the world-famous Bryant Vase drawing upon Greek examples, a love cup featuring ornate “Saracenic” decoration, and a chocolate pot incorporating novel techniques influenced by Japanese ceramics and lacquerware. The illuminating texts have been enriched by groundbreaking research into contemporary sources such as newspapers and periodicals, the Tiffany & Co. Archives, and a newly identified technical manual and supervisor’s diaries, all of which provide an intimate look at the firm’s design processes and Moore’s role in shaping them. A valuable contribution to the history of American decorative arts, Collecting Inspiration illuminates both the legendary Tiffany aesthetic and the legacy of a significant collector, designer, and entrepreneur of the Gilded Age.

Many music therapists work in adult mental health settings after qualifying. For many, it will be a challenging and even daunting prospect. Yet until now, there has been no psychiatric music therapy text providing advice on illness management and recovery. The new edition of this established and acclaimed text provides the necessary breadth and depth to inform readers of the psychotherapeutic research base and show how music therapy can effectively and efficiently function within a clinical scenario. The book takes an illness management and recovery approach to music therapy specific to contemporary group-based practice. It is also valuable for administrators of music therapy, providing innovative theory-based approaches to psychiatric music therapy, developing and describing new ways to conceptualize psychiatric music therapy treatment, educating music therapists, stimulating research and employment, and influencing legislative policies. For the new edition, all chapters have been updated, and 2 new chapters added - on substance abuse, and the therapeutic alliance. An important aim of the book is to stimulate both critical thought and lifelong learning concerning issues, ideas, and concepts related to mental illness and music therapy. Critical thinking and lifelong learning have been - and will likely continue to be - essential aspirations in higher education. Moreover, contemporary views concerning evidence-based practice rely heavily upon the clinician’s ability to think critically, seek a breadth of contradicting and confirmatory evidence, implement meta-cognition to monitor thoughts throughout processes, and synthesize and evaluate knowledge to make informed clinical decisions relevant and applicable to idiosyncratic contextual parameters. For both students and clinicians in music therapy, this is an indispensable text to help them learn, develop, and hone their skills in music therapy.

**The Brockport Physical Fitness Test revolutionized fitness testing for youngsters with disabilities when it first came out in 1999. This significantly updated edition takes up where the original left off, offering adapted physical education teachers the most complete health-related fitness testing program available for youngsters with physical and mental disabilities. This new edition of Brockport Physical Fitness Test Manual: A Health-Related Assessment for Youngsters With Disabilities comes with an online web resource with reproducible charts and forms as well as video clips that demonstrate assessment protocol for the tests. The text helps teachers understand these aspects:
• The conceptual framework for testing
• How to administer tests to youngsters with various specific disabilities
The text also supplies a glossary and many appendixes, including a body mass index chart, guidelines on purchasing and constructing unique testing supplies, conversion charts for body composition and PACER, data forms, and frequently asked questions. Brockport Physical Fitness Test Manual: A Health-Related Assessment for Youngsters With Disabilities is compatible with Fitnessgram 10. The text's updates include standards and language that help teachers use Brockport and Fitnessgram side by side in providing youngsters and parents or guardians with the best possible individualized education programs (IEPs). Through Brockport Physical Fitness Test Manual, adapted physical education teachers can do the following:
• Rely on research-based assessments and standards for people with disabilities.
• Provide youngsters with disabilities the same opportunities as other students to have their health-related fitness assessed.
• Apply a unified approach for all students based on the test’s compatibility with Fitnessgram.
• Create appropriate IEPs for students with disabilities.
Brockport Physical Fitness Test Manual: A Health-Related Assessment for Youngsters With Disabilities has been adopted by the Presidential Youth Fitness Program as its assessment program for students with disabilities. Its online resources include reproducible forms and tables that help teachers administer the tests. Included in the online resources are video clips that demonstrate assessment protocol for the tests. This text provides teachers with all the information and tools they need for assessing students with disabilities, evaluating their readiness for inclusion in nonadapted PE classes, and generating and assessing IEPs for students. As perspectives on private art therapy practice evolve, this book provides an overview of the range of approaches, clinical settings, ethical issues and professional considerations when working outside of the formal structures of publically-funded services. An essential guide for art therapy students and experienced practitioners moving into private practice, it considers the impact of a private context on theory, practice and research. The book features contributions from art therapists with extensive experience in both private practice and public services and gives practical advice on potential difficulties, such as managing relationships with fee-paying clients, self-promotion and maintaining boundaries when practising from home.**

This volume works towards overcoming the lack of systematic impact evaluation in higher education, particularly analyses which are not restricted to ex-post gathered data and expert assessments. Since (higher) education is more important than ever in knowledge societies, high priority should be ascribed to quality management (QM) in higher education institutions (HEIs). Consequently, impact evaluation of QM effectiveness is indispensable because it generates the knowledge required for quality (management) improvement. The introductory chapter elucidates the motivation and objective of impact analyses of QM in HEIs and provides an overview of the volume’s other contributions. One chapter reflects on success factors and un-/intended effects of QM, while another one analyses more discursive ways of evidence-informed guidance of QM policies which are complementary to rigorous impact studies. Five chapters investigate QM effectiveness in HEIs by ex-post and simultaneous impact evaluation in European case studies, including assessments of students, teachers, quality managers, and institutional leadership. The case studies comprise universities from Germany, Spain, Finland, and Romania. The final chapter reports a SWOT analysis of impact evaluation of QM in HEIs, which is suggested as a tool for bridging the notorious gap between the demanding methodology of impact evaluation and its proper implementation. This book was originally published as a special issue of the European Journal of Higher Education.

Intellectual Property Branding in the Developing World identifies success stories in the areas of intellectual property (IP) and branding for non-technological innovation in the developing world. The author examines the relationship between IP, branding and innovation to demonstrate that innovation, in general, and non-technological innovation, in particular, must go hand in hand with branding. Branding of non-technological innovations should be a good strategic tool to be used by countries in the developing world mainly in the areas where they have competitive advantages. This book will assist scholars and academics dealing with innovation, branding, and IP issues, providing context and guidance to policymakers from the developing world. It is also relevant to researchers and students in the fields of intellectual property law, commercial law, international law, management, and innovation.

Museum Learning is a vital component of the lifelong-learning process. In this new edition of The Manual of Museum Learning, leading museum education professionals offer practical advice for creating successful learning experiences in museums and related institutions (such as galleries, zoos, and botanic gardens) that can attract and intrigue diverse audiences. The original Manual of Museum Learning was published in 2007. The editors have totally rethought this new edition. This second edition focuses on the ways museum staffs (and the departments for which they work) can facilitate the experience in a way that capitalizes on their individual institutional strengths. The goal of this new edition is to provide museums with guidance in developing a strategic approach to their learning programs. There is a close connection between institution-wide strategic planning – where an institution decides what course and direction it will take for a five to seven-year period – and its approach to museum learning. One size does not fit all, and what each museum is (or aspires to be) will affect its individual approach. Thus there are many routes for museums to take, many alternative ways for them to play this role. No one museum can be all things to all prospective learners; they will be better suited to some approaches than to others. This new edition identifies these approaches and enables museums to find the paths for which they are individually best suited, to help them identify their own unique approaches to facilitating museum learning. Each one’s mission and vision, its relationships with institutional and public stakeholders, local cultural and market factors, its individual collection and programmatic strengths, its financial position – all of these things matter. This second edition aims to help each museum find the right approach to learning for its unique situation by showing them the range of museum “personalities” in terms of their being learning institutions, what constitutes each type, and what the implications are of choosing one or another approach for a particular museum. A major theme of the 2nd edition of The Manual of Museum Learning is museum as connector; the ways in which museums are facilitating self-directed learning by connecting people with resources. Not all will connect audiences with learning vehicles in the same way. If museum learning is affective learning, then it is the role of the museum to connect its visitors, program participants and others who benefit from its knowledge to the learning resources that best suit the institution’s strengths and matches them to the learning needs of the museum’s audiences. By connecting users to the resources they are most interested in, or which best suit each individual’s particular learning styles, museums are at their best when they empower individuals to design their own learning experience in ways that resonate best with each individual.

Since it was first published in 1993, the Sourcebook for Research in Music has become an invaluable resource in musical scholarship. The balance between depth of content and brevity of format makes it ideal for use as a textbook for students, a reference work for faculty and professional musicians, and as an aid for librarians. The introductory chapter includes a comprehensive list of bibliographical terms with definitions; bibliographic terms in German, French, and Italian; and the plan of the Library of Congress and the Dewey Decimal music classification systems.

Integrating helpful commentary to instruct the reader on the scope and usefulness of specific items, this updated and expanded edition accounts for the rapid growth in new editions of standard works, in fields such as ethnomusicology, performance practice, women in music, popular music, education, business, and music technology. These enhancements to its already extensive bibliographies ensures that the Sourcebook will continue to be an indispensable reference for years to come.

Cultural heritage and contemporary arts benefit from being showcased in events. Arts-related events are each unique in reflecting local culture; they may be therefore spontaneous (street art and so on) or planned (i.e. studio tours or arts festivals). The Arts and Events explores the nature and complexity of managing arts events and fills a significant gap in the available literature. It investigates the history, development and management of arts events to offer much needed insight into creating economic, social and cultural capital. It therefore contributes to a greater understanding of how arts events can create a beneficial experience for the individual and the community as well as their future sustainable development. The title explores a broad range of events from around the globe including: inspirational events for building creative (social, cultural and human) capital; affirming events for encouraging links to cultural identity or heritage; pleasurable events that offer enjoyable recreational, leisure and touristic experiences; enriching events that create opportunities for personal growth and/or to sell products or experiences, and finally, celebratory events that enhance cultural diversity. This significant volume is a valuable source for researchers, policy-makers and managers of arts events around the globe.

This research-based book outlines career models for artists, methods of creative engagement, artistic options including individuality and branding, production practices, the realities of being a musician in the new industries, and implications for popular music education. Due to the profound effects of the digitisation of music, the music industries have undergone rapid transformation. The former record label dominated industry has been supplanted by new industries, including digital aggregators, strategists and online platforms. These new music industries now facilitate ‘direct’ access to both artists and their music. While such accessibility and the potential for artist exposure have never been greater, the challenge to stand out or to even navigate a musical career pathway is formidable. A useful resource for musicians and educators, this text highlights the ways in which the new music industries facilitate increased opportunities for 21st Century popular musicians to collaborate, communicate and interact with others interested in their music.

This timely book brings to the foreground the considerable tensions between the need to engage the public in the importance of environmental governance and the need of professional expertise to address the issues which arise. In doing so, it highlights that not only can public opinion deviate from scientific knowledge, but scientific knowledge itself can be lacunose or contradicting. Drawing together insights from some of the leading scholars, this engaging work will provide guidance to decision makers, including judges, on how to govern public participation procedures and professional expertise and the role that the precautionary principle can play in this regard. This book examines the benefits and uses of art therapy in the treatment of addiction and trauma, highlighting its effectiveness at revealing underlying causes and relapse triggers, as well as treating co-occurring conditions that impair learning and recovery. This book also focuses on art therapy for trauma within specific populations, including incarcerated individuals, military personnel and survivors of commercial sexual exploitation. Quinn discusses how art therapy is often carried out alongside combined approaches, such as CBT and DBT, and how it can help those with cognitive issues to learn through treatment. Furthermore, this book explores the benefits art therapy has for people with co-morbid conditions, such as dementia, emotional disorders and traumatic and acquired brain injuries. With co-authored chapters from leading researchers in art therapy, the book demonstrates how art therapy can help to uncover triggers, process trauma and find a means of self-expression whilst working towards a sustained recovery.
