Netflix and its competitors like Disney+, Amazon Prime and Hulu have brought unprecedented levels of entertainment to consumers everywhere, providing the richest, most abundant aggregate of motion pictures and cinematic television the world has ever seen. Behind the facade, however, things are not as pleasant. A very costly paradigm shift is underway, altering not only conventional business and finance models, but also threatening long-established avenues of entertainment such as movie theaters, traditional television, and home video, and wreaking havoc on independent filmmakers and veteran producers alike. This book attempts to make sense of ongoing economic and creative shifts of infrastructure and intellectual property, to understand where the industry is headed, and to distinguish which business models should be maintained and which ones should be left behind. Featuring exclusive interviews with some of the industry's most prolific filmmakers and executives, it dives into the trenches of Hollywood to provide readers with the knowledge necessary to rethink the business, see past the turmoil, recognize the new opportunities, and take advantage of exciting new possibilities. Change sparks innovation, and innovation brings about great opportunity--but only for the well-informed and prepared. There is also a significant international dimension to Volume I with contributions from Carole Christensen (Copenhagen) and - (South Africa), with Velda Harris (Central School of Speech and Drama) offering a critical evaluation of her work with nomadic tribes people in Azerbaijan. As with the series as a whole, the focus for this first collection is a fusion of high-quality scholarly research with dynamic and perceptive accounts from practitioners in their field of work. Similarly this collection

represents an eclectic mix of material that is absolutely contemporary and previously unpublished, offering a unique insight into some of the ideological, methodological and aesthetic issues surrounding the generic area of Interventionist and Community Theatre.

Author Joseph Ashley explains video astronomy's many benefits in this comprehensive reference guide for amateurs. Video astronomy offers a wonderful way to see objects in far greater detail than is possible through an eyepiece, and the ability to use the modern, entry-level video camera to image deep space objects is a wonderful development for urban astronomers in particular, as it helps sidestep the issue of light pollution. The author addresses both the positive attributes of these cameras for deep space imaging as well as the limitations, such as amp glow. The equipment needed for imaging as well as how it is configured is identified with hook-up diagrams and photographs. Imaging techniques are discussed together with image processing (stacking and image enhancement). Video astronomy has evolved to offer great results and great ease of use, and both novices and more experienced amateurs can use this book to find the set-up that works best for them. Flexible and portable, they open up a whole new way of seeing space.

(Guitar). The Moderne is an electric guitar designed by Gibson in 1957 alongside the Flying V and Explorer as part of a stylistically advanced line. Sources claim that Gibson made a handful of prototypes, but an original has yet to surface. The Moderne was eventually put into production in 1982. Because of their very limited production and forward design, Modernes are highly sought by collectors. Here is the story, explained in interviews and photos, of this curious development associated with the golden era of guitar making.
